

### *Natural Environment*

- The surrounding Hills of Ringwood and ridge line
- Local geology
- Mullum Creek Native Habitat
- Ringwood Lake

### *Cultural Connections*

- The Clock tower form & War Memorial
- Dandy Advertising Signs (refers to substantial signage)
- Motorbikes, Cars & Auto Obsessions
- Brick & Tile Manufacture

### ***Incorporation of design influences***

The intent of the Guidelines is to incorporate these design influences into new public domain elements such that there is a tangible representation of them within the streetscapes and parks of the Ringwood Transit City. Specifically, the Guidelines draw on:

- The natural environment, through greater use of indigenous street trees and other plants, and through the use of natural timber finishes to some furniture items.
- The human history, through the use of metal finishes to recall the mining history, and potentially through the influences of Ringwood's indigenous past in the design of one or more of the key public spaces in future.

In terms of colours, finishes and motifs, the approach of the Guidelines is to highlight inherent characteristics of materials and elements rather than applying motifs and colours to them. Examples include using the colours present in the foliage and bark of trees, flowers and shrubs and the natural timber and stainless steel finishes of some street furniture elements.

The design of other elements, and the colour finishes applied to such elements as bins and planter boxes, is more muted, with the intention that these elements are coordinated yet at the same time visually-recessive, allowing the key features and activities of the public domain to provide the prevailing image of the Ringwood Transit City.

## **1.4 Public domain design principles**

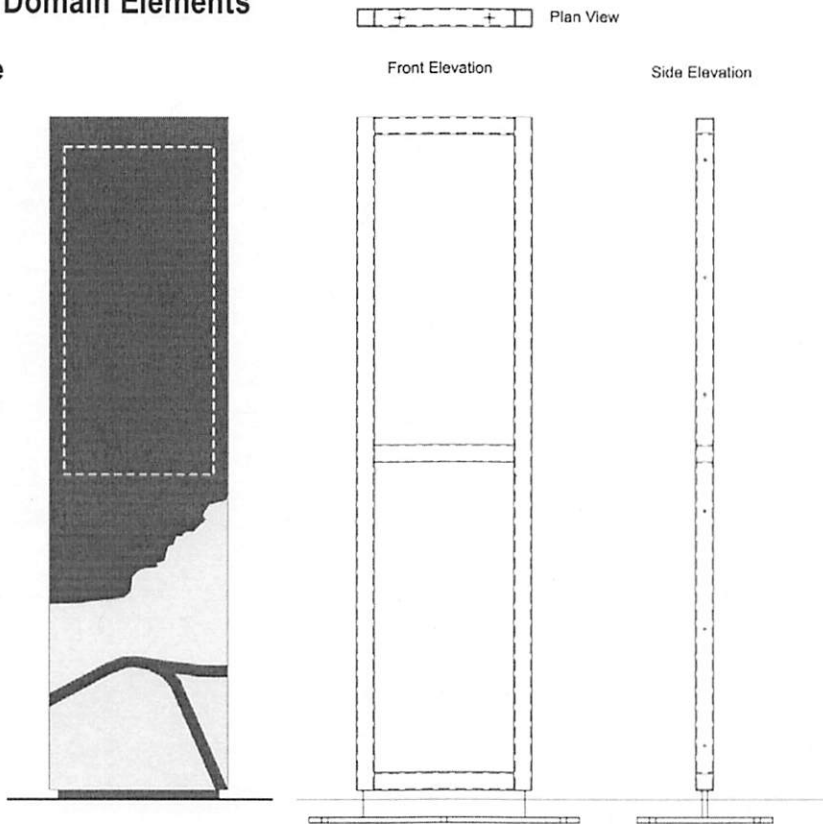

The principles for the design of the street furniture, paving treatments and other elements in the public domain have been derived from background research undertaken for the Ringwood Transit City Public Domain Parameters Report, as outlined below.

## Ringwood Transit City Public Domain & Landscape Guidelines

### Public Domain Elements

#### Signage

#### S1 Directional Pedestrian Signage

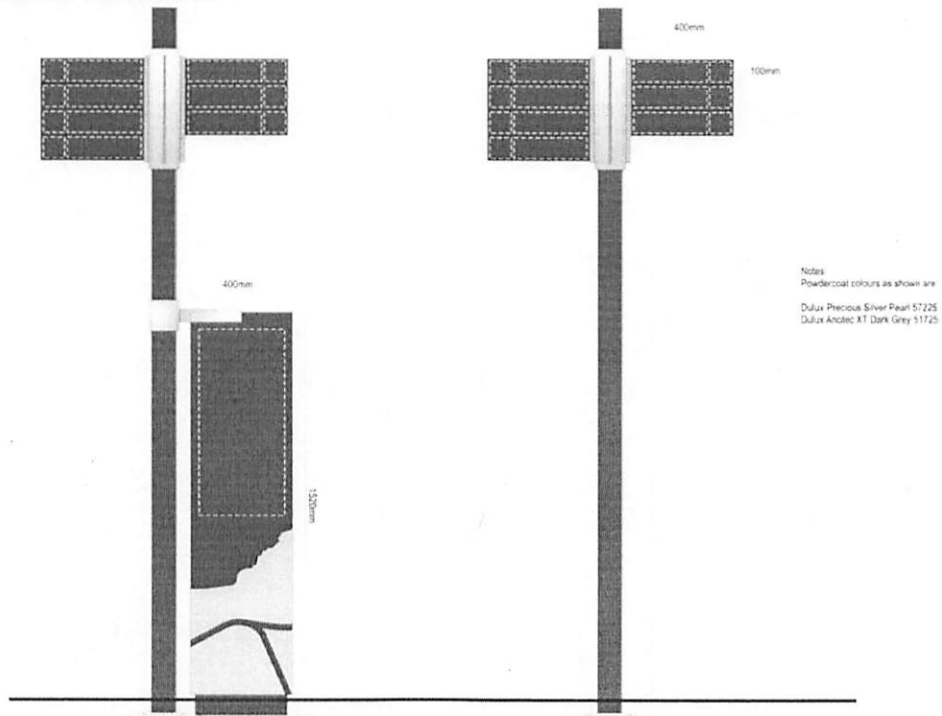

<b>Material</b>	▪ Galvanised steel
<b>Finish</b>	<ul style="list-style-type: none"> <li>▪ Base colour (Dulux Anotec XT Dark Grey 51725) to be applied as a Dulux 2-Pac application.</li> <li>▪ Text and contrasting graphics are to be applied as decals.</li> <li>▪ Clear coat protective application immediately following application of decals.</li> <li>▪ All finishing is to be undertaken by signwriter. Signboard will be supplied unfinished.</li> </ul>
<b>Installation</b>	▪ Base plate to be attached to hard surface with 4 Dyna bolts per plate
<b>Maintenance</b>	<ul style="list-style-type: none"> <li>▪ Clean as required.</li> <li>▪ Sign to be replaced if bent or damaged.</li> </ul>
