

a Professor, making a total of £260.12.1 were passed for payment

Ventilation of Laboratories, Class room, and Offices.

The Vice-President stated that he had visited the Laboratories, and Pharmacy room, during Class hours, and finding the atmosphere vitiated by reason of imperfect ventilation, had communicated with the Hon. Architect Mr. Caselli, with a view to adopting remedial measures: Also, that the front Offices on the north side of the main building would be rendered much more habitable by the addition of outside blinds to the windows, and a small ventilator in the ceiling of each room. - Several suggestions were offered and after some discussion the matter was left in the hands of the Architect with power

Weighing Room for Laboratories

It was pointed out that the necessity for a room of this description had been anticipated by the Architect when the Chemical Laboratory was erected; an end wall for the room having been built into the side wall of the Laboratory. - A back wall, roof, and flooring, being all that is required for this addition, which would prove beneficial to the Students and preserve the Balances from the corrosive action of the Acid vapours, its completion was authorized.

Scientific Publications

A List of Magazines and Periodicals drawn up by Professor Smith was submitted for the approval of the Council that The School should subscribe for them, the Annual cost being estimated at about £30. - This was agreed to, and instructions given to apply to the Secretaries of the Royal, and other kindred Societies of the neighbouring Colonies

for copies of their 'Transactions' and other publications.

Scale of Charges for Assays and Analyses

The following Scale drawn up by the Supt. of Laboratories was submitted for approval

Assay of Gold-Quartz, Blauktetings, Pyrites, Tailings, &c., for Gold and Silver	10.6
