The Visiting Committee

brs. Barrow, Bush and Hyatt reported having visited the various classes in the School. They were much impressed with the keenness displayed by the students in the various classes.

More Equipment is necessary in the Fitting and Motor Mechanics departments and an effort should be made to secure 2 new lathes for the Engineering shop and a more up-to-date motor for the Motor Mechanics classes.

It is suggested that the Railway Department be approached and asked if they have any lathes not in use which they would be prepared to present to the School for use of the students in the Engineering Department. Also that the Royal Automobile Club be asked if they could assist the School in procuring a more up-to-date motor for the Motor Mechanics class.

Authority was given for admission without payment of fees of the following students referred to in the Principals report.
