Visiting Committee's Report.

Mr B. John reported that a visit of inspection had been made by the President and himself during the month.

The first department visited was the Machine Shop where everything appeared to be in good order. The shadow boards which Mr Goldsmith was installing were a great improvement. They were informed that the Defence Training Department had decided to motorize some of the old lathes. In their opinion the lathes were so old that they did not warrant the expenditure involved. From there they visited the Blacksmithing and Woodworking

shops and the Metallurgical and Heat Treatment Department. They found that the floor in the Chemistry Department was in very bad order and the whole department badly needed brightening up. The Principal said that the painters had started on the job and he felt sure it would look much better when it was finished.

The report was received on the motion of Mrs Farr and Wilson.
