

81-H-48

In the Art school they noted the improvement brought about by the showing of casts in a special store room. The new pottery room was a much needed improvement on the previous room and provided excellent conditions for students.

They made the following recommendations

1. Three elm trees in Lydiard Street need the boughs removed on the building side
2. A more satisfactory method of flushing and draining the floor of the modelling room is needed.

The report was received and adopted! (Mrs. Dickson & Savage)

Business Art School Boiler

It was resolved that the Public Works Department be requested to provide a circulating pump with the new boiler for the Art school.

(Mrs. Small & Savage)

Farm Mechanics

It was resolved that the approval of the Education Department be sought for a course in Farm Mechanics to commence in 1949.

(Mrs. Dickson & Savage)
