Lockers at Junior Technical School.

The Principal said that he agreed that locker accommodation at the Junior School was a difficult problem. The playing space for students was very restricted and to encroach on this space would make the position worse. He would discuss the matter with Mr Kutter and see if a better solution could be found.

The painting of the exterior of the school was in the hands of C.P.S. painters under direction of the Public Works Department but at present they were working at the Annex on certain aspects of their training before proceeding to employment.
