

16-11-52 his action in taking up these matters with the Public Works Department.

Reports The Principal's Report was read, received and adopted.
Received: Mrs Beauland & John
adopted: Mrs Savage & Jones.

Visiting Committee's Report.

Mrs Ballou and Savage reported that they had inspected the Art School Arsay and Chemistry Departments and the ~~two~~ Students' Room that day. They noticed that additional linoleum had been laid in the Art School and found that it was much appreciated.

In the Arsay Department they were shown a new metallurgical microscope which had recently arrived.

In the Chemistry Department they found that the benches and floors were still in the same condition although they were pleased to learn that at long last action in these matters was to be taken by the Public Works Department. Mr G. Correll had drawn their attention to the location of the exhaust fan and had expressed the opinion that it would be more satisfactory if it were installed on the ground floor.

They found the Students' Room to be in good order and received no complaints or requests from the staff during their visit. The report was received and adopted.
(Mrs Mohr & Jones)

16-11-52 Upholstery Instruction

Business
out of
reports

It was decided that the feelings of local businessmen engaged in upholstery be ascertained and reported on at the next meeting.

Apprentice Week.

It was felt that articles manufactured by those who had received training as apprentices could be obtained from local manufacturers for exhibition with articles from the school during Apprentice Week.

The Principal undertook to follow up the suggestion.

It was also felt desirable that apprentices should be informed of the history of their particular crafts with the object of stimulating pride in their work.

Congratulations to Parents Organisations

It was resolved that letters of congratulation and appreciation of services be forwarded to the Parents' and Friends' Association and to the Junior Technical School Mothers' Club.

(Mrs Ballou & Lynch)
