Reports. The Principal's Report was read,
received and adopted.
Received: Crs Pearson & Dinaker,
Adopted: Crs Bealand & John.

Visiting Committee's Report

Crs Smail and Pearson reported
that they had inspected the Electrical,
Motor Mechanics, Woodcladding and
Dressmaking Departments on Friday
8th August. The roof, spouting and
downpipes on the old Court House are
in a very bad state with the result
that dampness is showing in many
places on the interior walls.
In the Motor Mechanics building they
found that working space was very
limited, but it was expected that
this difficulty would be overcome
when the extensions recently approved
are carried out.

The Woodcladding Department was
conducted very efficiently by Mr V. H. Down
and everything was in excellent order.

There was an adequate range of
wool types for instructional purposes.
In the Dressmaking Department they found
that the heating arrangements were
not very satisfactory with open fires.

This was particularly so in the fitting
room where the only form of heating
was an electric radiator.

The report was received and adopted.

19-8-53 Motion for forthcoming Conference
It was resolved that the following
motion be forwarded for listing in
the Agenda for the Technical Schools
Conference to be held in October.
- "That in view of the lengthy period
required by the Public Works Department
to prepare plans and carry out works
authorised by the Education Department
the Minister be requested to examine
the desirability of establishing a Building
and Planning Branch under the
control of the Education Department to
plan and be responsible for undertaking
all new works authorised by that
Department."
(Crs Dinaker & Smail)

Apprentice Week 1954

It was resolved that the arranging of
working trade exhibits in shop windows
during Apprenticeship Week 1954 be
approved and that the matter be
left in the hands of the President and
the Principal. (Crs Pearson & John)

Agrostology Classes

Approval was given for the charging of
a fee of £6 for a course of 30 lectures
in Agrostology which commenced on
3rd March and terminates on 20th October
1953.
