

17-3-54 a strict code of ethics which would prevent the school ~~or its~~ and its staff from seeking to regain work done for municipalities up to two years ago but since relinquished by Mr Corzell on account of more important local work. The felt that all we could do at present would be to put Mr Barrell on the same basis as Mr Cornell and await developments.

It was then resolved that Mr G. Barrell be entitled to 90% of the fees in respect of all analytical work done by him in the school's laboratories for outside individuals or bodies and that all such analyses be registered in the school office.  
(Mrs Small & Hillman)

Orders for obsolete lathes.

It was resolved that acceptance of the following orders as recommended to the Education Department be confirmed:

"Filemill" lathe.  
Wolferden Machinery Coy Ltd. £141-0-0  
Hobby lathe.  
Sucka Valve Works, Newark. £17-10-0.  
(Mrs Scanland & Galloway)

Reports. The Principal's Report was read, received and adopted.

17-3-54 Received: Mrs Wyles & Sutton  
Adopted: Mrs Linaker & Small.

Visiting Committee's Report.

Mrs Wyles and Sutton reported as follows:

Motor Mechanics.

They found that Mr Hamilton, Instructor, was very pleased with the extension to this building. During their visit he was busy installing desk benches.

They noticed that the floor in the new section was very rough but this had the advantage that it prevented slipping. Mr Hamilton was seeking additional equipment for class work and the motor trade in Ballarat was endeavouring to collect useful items for him.

Woodcladding.

No classes were in operation in this department but everything looked very clean and tidy.

Electrical Engineering.

No classes were in operation during their visit. Mr Hillman, Instructor, mentioned certain items of equipment that he was keen to obtain and which they understood were on order.

Dressmaking.

This department was run very efficiently with big classes and a big waiting list. If more accommodation were available additional classes could be taken. The matter of heating would need to be gone into before the cold weather set in.

The report was received and adopted. (Mrs Galloway & Sutton)
