Reports The Principal's Report was read, received and adopted.
Received: Mrs Pearson & Kibson.
Adopted: Mrs Pearson & Dinaker.

Visiting Committee's Report

Mr Kibson reported that he had inspected the Art School, Chemistry and Assay Departments and the Students' Room.

In the Art School he found that display boards were in need of renewal and the heavy wooden lockers were unsuitable. He recommended that 20 new lockers be provided in the cloak room.

The transformation in the Chemistry Department was most striking although a number of the cupboard locks was faulty.

The Students' Room was bright and clean but he felt it was inadequate for a ^{large} number of students in wet weather.

The report was received and adopted (Mrs Small & Webb)

Business Instructors in Dressmaking
It was resolved that Mrs A. Court be recommended to the Education Department for appointment as full-time temporary instructor in Dressmaking (Mrs Dinaker & Webb)

21-4-54 Congratulations

It was resolved that the Parents' and Friends' Association and the Junior Technical School Mothers' Club be congratulated on the highly successful Fair conducted by them on 20th March. (Mrs Wines & Webb)

Gymnasium

The Principal said that it was proposed to erect a steel and iron structure measuring 40' x 70' on the block previously occupied by the Society of Friends building. Sufficient money was now in hand with the Departmental subsidy of £200 to proceed with the erection of the building. The provision of amenities would be something to work for in after the building was erected.

It was suggested that the amount of the Department's grant could be discussed with Mr R. Shannon during his forthcoming visit to the Girls' Junior Technical School. It was resolved that the Education Department's authority be requested for the erection of such a building on this block before taking further steps. (Mrs Pearson & Webb)

Artistic Week

The Principal said that arrangements had been made for working exhibits in Plumbing, Motor Mechanics and Carpentry with Messrs Mr Dougall & Chisholm, Cambridges and the Ballaarat Gas Company
