HISTORIC FACTSHEET

CUMBERLAND FALLS

Name:	Cumberland Falls
Location:	Cambarville
Type:	Medium sized Cascade
Drop:	80 metres
Walk:	1 km from the carpark.

Cumberland Waterfall is located on the Cumberland Creek a short walk from where the historic township of Cambarville once stood. It is 870 metres above sea level.

The Cumberland Falls is located at Cambarville near Marysville on the Cumberland Creek (a tributary of Armstrong Creek). The Falls was once very popular due to its location close to the timber mill township of Cambarville, though when milling ceased in 1971, the number of visitors to the area declined steeply.

Today a Reserve and Day Visitor Area is located at the site of the Historic Cambarville Township. Other local attractions that can be walked to from Cambarville include: Cora Lynn Falls, The Big Tree, The Culvert and the Sovereign View Lookout. The area also highlights one of our District's best example of a mature Mountain Ash Forest.

CUMBERLAND FALLS

A SECLUDED WATERFALL NEAR MARYSVILLE

A beautiful walk to a local Waterfall.

This waterfall experience is lessened by the lack of a close unobscured view, though it is still worth a visit as the walk to the Falls is beautiful and it is close to the more spectacular Cora Lyn Falls.
