RAINFALL

When this paper first went to print in early August it appeared that 1976 could produce an all time low rainfall recording. However the four months August-November have produced above average rainfalls..661mm at Marysville. Even with this late burst of rain Marysville is still 280mm below average.

Next week... Marysville V Colts at Briggs oval, Alexandra.

If the senior players in the team had shown the same application as Paul Jones did Marysville might have scored its first win for 1976. Paul came in at 5-71 after a second wicket stand took the score to 2-60. At 5.15, after batting for 90 minutes, Paul was last man out after scoring 16 hard earned runs. Each week this young player continues to improve and has the potential to be a top batsman. Two games will be played before the

on the turf.
