DARMODY'S POND Most people must have noticed the work being carried out in the area of "Darmody's Pond". The finished plan incorporates an island in the enlarged pond and a water cascade. As well, a grassed picnic area will be a feature. A lot of money in the form of direct payments and machinery usage and man hours has gone into the project so far and a lot of credit must go to the people who instigated the idea. In further issues we will give more details of actual costs involved and more details of the actual work and its progress. In the mean time see if you can spare some time to have a look at the work done so far.
