LETTERS TO THE EDITOR.

T.V. RECEPTION IN BUXTON AREA.

I hope that the following news and information can help those residents in Buxton and surrounding areas.

Over the last 7 years, VHF has been used by everybody to get either main line Melbourne channels or relay from Shepparton : i.e. 2-7-9-10.

I personally spent considerable money & man hours, trying to obtain acceptable vision from various areils & boosters linked to an up to date T.V., without too much success. Either good vision depending on weather conditions & loss of sound, or snow on picture with "of track" vision from poor to average. Either situation was not acceptable knowing that some properties only a few metres up the road were enjoying good viewing. A decision had to be made. I would like to add that I am a fairly practible bloke but in no way did I think that I was capable of understanding, let alone receiving T.V. signals.

Anyway, a trip down to a wiz called Ken at Hills Telefix in Dandenong did the trick. I told him where we lived, & what we were receiving. He new exactly my problem & I told him that I needed information & was not going home without it. O.K. The bottom line : He supplied an areil called "The Hunter" linked to an in-line amplifler called an MH-U1. with a power supply called a PS-U1 all capable of receiving "UHF" not 'VHF'. total cost around \$250.00.

I then took it all home, spent around a day on the roof & guess what! we now receive the "UHF" signal from Marysville with channels 2-7-9-10 & SBS. A little snow from the fact that we are a fair way from the booster ariel but a huge difference from before. We used to get no Channel 2, Channel 7 was OK, Channel nine was OK, but with drifting sound, no Channel 10 & don't even think about SBS.

I can't say what you will receive from your block, but considering our block was a dead spot its certainly getting a healthy signal now.

The following details may be helpful, Hills Industries, Cambria Road, Dandenond Tel. No. 798 2200. Don't forget: Re-tune your T.V. for UHF!

Don't forget: Seeing is believing. good luck. Phil Newton- Buxton.

AS PEOPLE IN BUXTON AREA ARE AWARE OUR RATEPAYERS ASS. HAVE SET UP A COMMITTEE AFTER OUR LAST GENERAL MEETING & DISCUSSION GIVEN BY GERALD O'BRIEN FROM ALEXANDRA ELECTRONICS HAVE SET UP A COMMITTEE TO LOOK INTO T.V. RECEPTION AS BIG CHANGES ARE IN STORE EARLY 1994 WHEN VHF GOES OFF LINE HERE. THIS MEANS ANYONE GETTING ONLY 5A OR 11 FROM RELAY WILL BE WITHOUT TV. FROM 1994 ONLY UHF SIGNALS WILL BE AVAILABLE & THIS IS WHY WE NEED TO GET A AERIAL TOWER IN BUXTON AREA TO PICK UP FROM ALEXANDRA SIGNALS. IT IS VERY PLEASING SOME PEOPLE (LIKE LETTER ABOVE) HAVE GOT A SIGNAL VIA MARYSVILLE TOWER BUT PLEASE BE ASSURED THIS ONLY APPLIES TO HOMES ABLE TO PICK UP A DIRECT SIGNAL PARTICULARLY THIS SEEMS TO BE AVAILABLE IN STEPHENSONS RD & AAROONA DVE, BUT NOT MAREEBA AVE & TOWNSHIP. ALEXANDRA ELECTRONICS CAN SUPPLY "THE HUNTER" AT SAME PRICES AS ABOVE & PROBABLY SHARROCK TV AS WELL SO GO LOCAL & HAVE SERVICES THAT CAN TEST IF YOU CAN GET SIGNAL OR NOT FIRST. THERE ARE EVEN BETTER ARIELS FOR AN EXTRA \$30- & THESE UHF ARIEES WILL BE NECESSARY WHEN WE GET OUR BOOSTER ARIEL HOPEFULLY. FURTHER DETAILS ON THIS EARLY OCTOBER. QUERIES TO COMMITTEE: ANDREW 747301 OR PETER 747448 AH. (PRESIDENT RATEPAYERS ASS. INC.)

RED NOSE DAY

August 27th 1993

Besilly for a day & help save a life.

ABOUT RED NOSE DAY WHAT IS SIDS???????

SIDS also known as COT DEATH is defined as the sudden, unexpected death of an infant who has seemed well, or almost well and whose death remains unexplained after the performance of an adequate postmortem examination, including an autopsy.

SIDS is the most common cause of death in babies aged between one month and one year. Approximately 350 babies died of SIDS in Australia during 1992.

SIDS is not a new problem. As medical science has improved so too has the treatment and prevention of other fatal childhood diseases. However despite substantial medical research, the causes of SIDS are still not known.

REDUCING THE RISKS OF COT DEATH.

At present there is no way to prevent SIDS. However, reasearch from Australia, the UK, New Zealand and the Netherlands suggests that some factors may reduce the risks of SIDS.

SLEEP BABY ON HIS OR HER SIDE OR BACK.

SIDS almost always happens while the baby is asleep. It is now suggested that babies who sleep on their tummies are at greater risk from SIDS than babies who sleep on their sides or backs. Whilst it is believed that 'tummy sleeping' alone cannot cause SIDS, it may cotribute to other as yet unknown factors.

DO NOT LET BABY GET TOO HOT

It is important that a baby does not get too

for
National SIDS Council of Australia Research
Community Education and Support Services

hot or to cold while sleeping. Sleeping on the tummy, too much clothing, heavy bedding or a too warm room may lead to an overheated infant.

KEEP BABY IN A SMOKE FREE ENVIRONMENT.

Smoking during pregnancy increases a baby's risk of SIDS. It is important that babies are kept in a smokefree environment during pregnancy and for at least the first year after birth.

BREASTFEED BABY IF POSSIBLE.

Breast milk is the best food for babies and it helps them resist infection.

IT IS IMPORTANT TO REMEMBER THAT THESE ARE RISK FACTORS AND NOT CAUSES.

MARYSVILLE TRIANGLE COMMUNITY BUS

NEW COMMITTEE

The new 1993-94 Bus Committee has been elected at the 2nd Annual General Meeting and are keen to address the issues affecting the smooth running of the community bus.

SHOPPING TRIP - FORTNIGHTLY TO CHILNSIDE PARK (Thursdays)

As the bus was purchased to service all the community and user groups in the Triangle we would like to call for expressions of interest from Triangle residents for a regular pickup at the Buxton store. Numbers are limited because of the shopping bags etc. so you must book.

Please contact Ray Van Zuyden on 018 576 183 while Eddie is away.

REGISTERED DRIVERS

To satisfy the requirements of the R T A and insurers, it will be necessary for all previously registered, qualified drivers to fill out the new registration form available from the Marysville Post Office.

NEW DRIVERS

We welcome suitably qualified drivers to register as well and to encourage the use of the bus, the committee will be taking the bus to Seymour on a date to be arranged, for interested drivers to take the test. To be eligible, drivers must be over the age of 25 years and have a full licence (i.e. not Probationary licence.)

BUS BOOKINGS

Marysville Post Office 059 633 366 during office hours.
A register will be kept at the Post Office and only those qualified drivers on the register will be eligible to drive the bus in future.
Drivers must be nominated at the time of booking.
