MEMO: COUNCILLORS, EXECUTIVE OFFICES AND SENIOR OFFICERS  
FROM: STRATEGIC PLANNER  
RE: ATTACHED INFORMATION ON LAND USES BY NUMBER OF LOTS, STREET AND RIDING

Please find attached information that you may find useful. In the work done on the revised Residential Multi-Unit Development Policy, it was necessary to collate data by street of the number of units. I expanded this exercise to include other land uses.

At the end of each Riding is given a summary of the number of the various major land uses and index to abbreviations used appears on the last page.

The data was collated manually from the Master Property File Print-Out of 29th October, 1984.

An appreciation can be gained from such data as :- number of vacant lots (development potential - although note size of lots not included - so must be used with caution), ratio of dwellings to units and Riding and other street comparisons.

It is intended, if time permits, to continue to up-date the list every few months to enable monitoring of land use and development trends.

L.Francesconi  
Strategic Planner
