## Real Ice Skating.

The fascination and thrill of real ice skating only need to be known to be appreciated. What can be more tempting to the lover of the poetry of motion than to glide freely over a broad expanse of real ice? Apart from the delights of practising the intricate figures and designs executed in innumerable variety by experts in the frost-encircled countries of the world, the simple act of skating upon real ice possesses a charm and attraction peculiarly its own. It is a healthful and exhilarating exercise, and is an enchanting contrast to the artificiality of roller skating. The skater shod with steel, whirling along the glassy ice-field, inhales the invigorating atmosphere as bracing as that on a lofty inountain top. Ice skating in Melbourne is attended by the most comfortable and convenient accessories. It will also be free from the dangers of skating on natural ice.

## Fancy Skating.

It is estimated that over 5000 figures are possible on a single pair of skates, many of which are easily learned, whilst others are difficult. To watch a skater gliding along as easily and gracefully as the soaring and sweeping seagull, is a pleasure alike to the performer and onlooker. In order to afford
