

STRATHFIELDSAYE. 3551

9th July, 1982.

Mr. D.F. Smith,
Director General,
Department of Agriculture,
P.O. box 4041, G.P.O.,
MELBOURNE. 3001

Dear Sir,

At our recent Conference I was instructed to write to your Department requesting that further tests and experiments be carried out regarding the quality internally of eggs with haugh unit testing and shell quality.

It is important for the industry that the Department carry out these tests to help producers maintain a high quality product. We hear many complaints from the housewife, that eggs they purchase have watery whites, and cracked shells, the normal anti Board comments which is something that we must work at to overcome.

We believe that we must maintain a high standard of quality and we would be very grateful if you could carry out these tests and forward us the results of same as soon as possible.

Yours sincerely,

K. Fitzgibbon,
SECRETARY
