Mr. C. L. Jefferson,  
Secretary,  
Egg Farmers of Victoria,  
P.O. Box 141,  
NOBLE PARK. 3174

Dear Charles,

Our Association is concerned with yolk colour break out and the time it takes (3 weeks) to get results back to Producers. We would like to point out that it takes 2 weeks with change of feed formula to improve yolk colour. We believe that the Board needs to have a good look at the whole yolk colour break out system; we see no reason why producers could not be notified within a few days of a problem occurring. Therefore we think that penalties should be eased until the system has been improved considering weather conditions, strain of birds, etc.

Hoping the Board will have a good look at this as the Producers pockets are being affected considerably under the present system.

Yours faithfully,

K. Fitzgibbon,  
SECRETARY.
