Attention : the MANAGER

Subject : Amendments to Lead-in supplies.

Dear Sir,

We have recently received a large number of amendments to the 9 C 3 List of Parts. The changes covered by these amendments will affect the orders for parts and materials already placed on S.N.E.C.M.A., and the work of incorporating these amendments is being progressed as a matter of urgency.

Receipt of the amended L.o.P. now permits completion of the detailed order lists for parts and materials for engines 32 - 41, and this work will be finalised before the return of the Production Officers early in January 1962.

We are attaching copies of a letter addressed to the Chief Procurement Officer London and also circulated to S.N.E.C.M.A. and the Supply Attaché, explaining the method by which alterations will be made to the detailed order lists covered by London Order M 500.

The Official Secretary

OFFICE OF THE HIGH COMMISSIONER FOR AUSTRALIA
AUSTRALIA HOUSE,
Strand,

LONDON W.C.2
England

Attention : The Chief Procurement Officer

Subject : ATAR 9 C engine. Amendments to Lead-in supplies.

Dear Sir,

London Order M 500 covers the provision of lead-in supplies for the ATAR engine programme, and these consist of separate items covering complete engines, green-built engines, sets of finished parts, hard core parts and accessories, and raw and partly processed materials.

Owing to the introduction of changes and modifications to these engines, it is necessary, as occasion demands, to amend the details of the orders mainly with respect to parts and materials. In order to facilitate the introduction of these amendments, we are proposing to introduce a standardised sheet which will allow the appendices to Order M 500 (viz Lists 2 A, 3, 3 A and 6) to be officially changed, and these sheets will be circulated to all holders of the original order lists.

A copy of the standardised sheet is attached for your information. Each amendment sheet will carry a serial number allotted by this office and all details of the alterations will be listed.

It will be the responsibility of the recipient to attach the amendment sheets to the order lists and ensure that his copies are kept up to date.

With the impending receipt of a new issue of the ATAR engine List of Parts from SNECMA, it is expected that these amendment lists will become effective shortly

G.H.F/SG

Yours faithfully,

G.H. FOSTER
