Attention : the MANAGER.

Subject : Supply of drawing office documentation.

Dear Sir,

CAB/

The points raised in your letter M 162 relating to the supply of drawings in half-plate negative form, and to the provision of modification technical data have been discussed with SNECMA, and they have provided information on the form in which drawings and L.o.P sheets will be supplied.

Copies of SNECMA note intérieure KL/6227 1st March 62 are attached, for your information. It may be noted that SNECMA are unable to provide half-plate negatives as requested, and that drawings will be supplied as reproducibles or prints depending on the differences between the original and modified drawing sheets

Yours faithfully,

G.H. Foster

OBJET : Supply of Drawing Office Documentation.

In answer to your memo ref. GHR/AQ dated 2nd, February 1962, we beg to find here after the official response of our Drawing Office.

1 - We confirm that it is not possible to supply half-plate negatives, the necessary equipment to produce them is not existing at SNECMA. We never agreed on this form of supply, we proposed in place micro-films, perforated, 95 mm. width, that were not found suitable by CAC.

2 - We have taken notice of CAC agreement with our proposals concerning the up-to-date bringing of the basic set of part drawings and test schedules in the following way :

- I gelatine, reproducible, translated and converted, for every new drawing and for drawing the change of which necessitates complete redraft. Same principle for new sheets and sketches of test schedules.
- I non reproducible print with translation and conversion of altered areas of drawings when the modification sheet does not permit safety modification of the original.

In every cases :

- I non reproducible print of the translated modification sheet
- I non reproducible print of the translated modification repertory.

3 - Concerning L.O.P. sheets.

- I reproducible of translated new sheets of sheet profoundly altered.
- or
- I non reproducible print of the translated modification sheet of L.O.P. sheets ; this modification sheet listing for each repertory the changes occuring to the LOP sheets involved.

4 - Our drawing office recalls that the modification sets will include : the mod. repertory, drawings, mod. sheets and LOP sheets. These modifications sets should be incorporated according a compulsory sequence which will be specified by the Drawing Office.

5 - Concerning modification technical back ground informations, our Technical Division does not consider that supply of data would be sufficient in this respect, and it has been proposed that periodical meetings be held with

the CAC officers in charge when found convenient by them. Your comments on this proposal would be appreciated.

Yours faithfully,
Service des Licences

M. FABRE
