During the last 18 years, Murrays' Harrows have been quickly coming into favor with the Farmers throughout the Commonwealth. More especially amongst the "big area" men—men who have made a science of the farming industry.

As a further illustration of the worth of these Harrows, the appended extract from the Melbourne "Argus" of the 27th March, 1922, needs no comment:—

Horsham Wheat Yields

:-:

Fifty Bushels to the Acre

There were 17 entries for the crop and fallow competition conducted by the Horsham Agricultural Society this year. Prize ~~£60~~ each were also offered for the best bag of wheat received from the harvest, the object being to improve the commercial sample of the district. This competition attracted a large entry. The awards by the chief field officer of the Agricultural department were as follow:—

SECTION 1

Prize for the Highest Aggregate Award for 100 acres of fallow, 1920, and for the crop grown on the fallow, 1921:

SECTION 2

Fallow ploughed, 1921; crop on the fallow judged 1922; prize for the highest aggregate over the two years.

Name	Yield	Trueness to type	Disease	Total for crop, 1921	Total for fallow, 1920	Grand total
Millar Bros....	31	19	15	93	97	190
G. W. Hobbs	35	18	15	94	91	185
Wirth Bros....	32	16	10	85	94	179
C. Reinheimer	31	19	10	86	91	177
Smith Bros. (Waverley)	31	19	15	91	87	178
Smith Bros. (Glenburnie)	33	17	11	88	88	176
H. Klauss ...	29	19	14	84	87	171

Name	Moisture	Mulch	Weeds	Cultivation	TL
Maximum pts.	25	25	25	25	100
Murray Bros.	25	25	23	25	98
Wirth Bros. (1)	24	24	24	25	97
Millar Bros. ...	24	23	23	25	95
Smith Bros. ...	25	22	25	22	94
C. Reinheimer	23	22	25	24	94
G. W. Hobbs...	22	22	25	24	93
E. H. Rudolph	24	23	25	20	92
Wirth Bros. (2)	22	23	21	23	89
Lehman Bros.	22	22	23	20	87

In his report to the Society, Mr Mullett says that some very high yields were recorded. In one authenticated case an average of 50 bushels to the acre was obtained by Messrs Hobbs and Knuckey over 160 acres.

The whole of the above Farmers are strong
"Murray Men."
