To The Manager

LOWER COST OF OWNERSHIP

Dunson Pty Ltd is a 100% Australian owned and managed company, specialising in supplying and supporting computer technology to manufacturers since 1992.

Dunson addresses the needs of its clients with quality Information Technology advice. Careful, considered advice that is dedicated to ensuring the very best for its clients.

Whether it is a hardware or software judgement, or simply technical support, Dunson's qualified staff believe in doing it right the first time.

Only a team that is dedicated to fast responses; that has a broad product range and expertise; and that is experienced in service, installations and maintenance can offer their customers quality personalised service and advice. Dunson has such a team.

With the thousands of software and hardware choices facing customers Dunson's staff make it their business to keep abreast of what is happening in the industry. They can offer cost-effective solutions to your business. Dunson can supply your company with the hardware and software that suits your specific needs and budget, from small businesses through to multi-national corporations.

1-3 months 3-6 months 6-9 months more than 9 months

Do you want to receive future updates?

YES NO

Do you wish to be sent our Free C.D.?

YES NO

Reduce Network Costs
Provide fast
remote multiple connections
Increase security

Discover the exciting features and benefits of thin-client/server products, including WinFrame® and MetaFrame.™

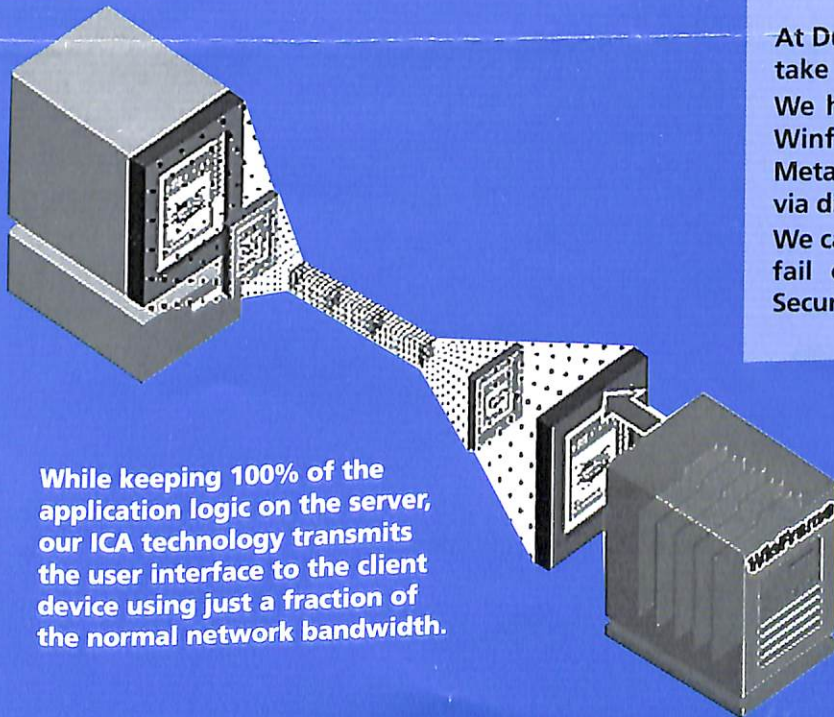

Finally everyone on your Network can work with greater speed, whether they are on the local network, dial up connection, over a WAN or connected through the Internet.

Thin-client/server computing is fast becoming the most reliable way to reduce the complexity and total cost of network computing. And Citrix offers the best in thin client computing.

Citrix offers Winframe and Metaframe Microsoft's licensing of Citrix MultiWin technology has been incorporated into Windows Terminal Server for Windows NT 4.0 and beyond.

MetaFrame is a thin-client/server computing solution that provides IT professionals a cost-effective way to deploy, manage and support applications for the enterprise from a single point.

It provides universal application access from virtually any type of client device. It ensures bandwidth-independent performance with any type of network protocol or connection and it offers unique features for enhanced application management and security.

While keeping 100% of the application logic on the server, our ICA technology transmits the user interface to the client device using just a fraction of the normal network bandwidth.

At Dunson we can help you with solutions that take advantage of this superb technology. We have extensive experience installing Citrix Winframe, Windows Terminal Server and Metaframe. This extends to remote connectivity via dial up connections and the Internet.

We can assist you with Cluster Server and other fail over redundancy combined with Total Security/Firewall Solutions.

New From Network Associates

NET TOOLS SMALL BUSINESS SUITE

Virus Protection	Security Protection	Network Analysis	Year 2000 Solution
Total Virus Defense	PGP Encryption Defense	Sniffer Basic	2000 Toolbox

Net Tools includes four integrated software suites that can be centrally managed from within the NetTools unified management environment. Using the following suites within Net Tools, you save time and money by not having to deal with the complexity and incompatibility of tools created by separate vendors.

McAfee Total Virus Defence

More corporations worldwide trust their anti-virus security to Network Associates than any other brand. In fact, Network Associates was the clear top choice of corporate security experts in Computer Security Institute's 1998 market survey. McAfee Total Virus Defense products offer a multitiered approach to virus protection covering the client, server and Internet gateway.

PGP Total Network Security

PGP Total Network Security combines the latest security products with desktop encryption software and management tools. With more than four million users, Network Associates offers the market-leading encryption solution.

Sniffer Total Network Visibility

Network Associates is the leader in network visibility and the market share leader for commercial network analyzers, providing the solutions that let you pinpoint and solve problems quickly. This comprehensive suite of products and services provide total network analysis, fault and performance management.

McAfee Total Service Desk

McAfee Total Service Desk integrates robust help desk technology with LAN and desktop management software distribution, on-demand asset management, software licensing, automated end-user alerting and remote control-into a single package. It is the worldwide leader in market share on NT.

(Dataquest/Gartner Group, 1997).
