

Dandenong's most widely travelled product

Through Holden, Dandenong has a link with 61 overseas countries, the countries to which Holden is exported. It is fitting that a community

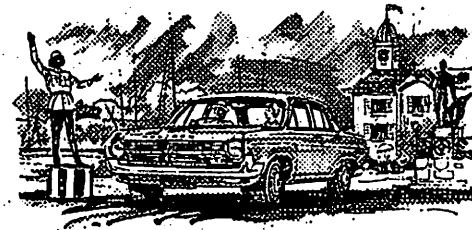

with such a thriving spirit and proud history of expansion should be associated with one of Australia's major export products.

In Dandenong, General Motors-Holden's has an investment of over £18,000,000. Apart from the manufacture of Holden motor cars, Frigidaire household products and NASCO parts, Dandenong is also the home of the IDEC Division

(Industrial and Domestic Equipment Company). Co-operation we have received, and continue to receive, from Local Authorities, has played no small part in the efficient operation of our factories. The

stability and strength of this community is evidenced by the publication of this Centenary Issue of the "Journal". We congratulate the "Journal" and hope it will continue to share with Dandenong the success that has marked its existence up till now.
