Capital Carpet Industries Pty. Limited (CCI) is the Corporate Parent Company of Australia's largest carpet manufacturing group comprising -

Minster Carpets Pty. Limited
Pacific Carpets International Pty. Limited
Polygold Industries Pty. Limited

Individually, Minster and Pacific are amongst the largest carpet manufacturers in Australia, their combined capacity commanding the highest market share, with an even greater dominance in the fast growing synthetic carpet market.

With its constant commitment to maintaining the leadership in technical processes and vertical integration, the Group is well positioned to maintain quality and future growth in a highly competitive industry.

Minster Carpets Pty. Limited manufacturing operations are located on a 11.3 hectare site in Dandenong with Pacific Carpets being situated on 8.3 hectares in Tottenham.

Polygold Industries was established during 1989 to provide the Group and external customers with high quality well styled polypropylene continuous filament and staple fibre carpet yarns. This modern plant is located at Hallam and provides the latest in yarn technology for the Group's product ranges in both the domestic and commercial fields.

This new capacity is important in the lower priced carpet ranges, in particular for the growth of the commercial market.

MINSTER

COMMERCIAL SALES DIVISION

Through co-operative effort, Minster Carpets Pty Limited will strive to maximise the return on investment by developing and marketing quality, well styled carpets for the Australasian market place.

And in doing so, aspire to and maintain a reputation as the market's premier commercial carpet manufacturer.

Minster will achieve a high standard of service to customers, suppliers and employees and in addition, place great importance on product, raw material, technology and personnel development.

Minster Carpets is an Equal Opportunity Employer.

Minster Carpets has facilities for dyeing, spinning and heat setting of both wool and synthetic carpet yarn and in addition within the CCI Group there is Superba continuous heat setting equipment for continuous filament nylon yarn.

Modern equipment is available for tufting and colouring of a wide range of standard and non standard carpet styles. The product variety includes a range of cut, loop, modulated loop and cut/loop styles. A full cross section of fibre types and colouration techniques is available which places a Minster commercial product into every price point and end use category.

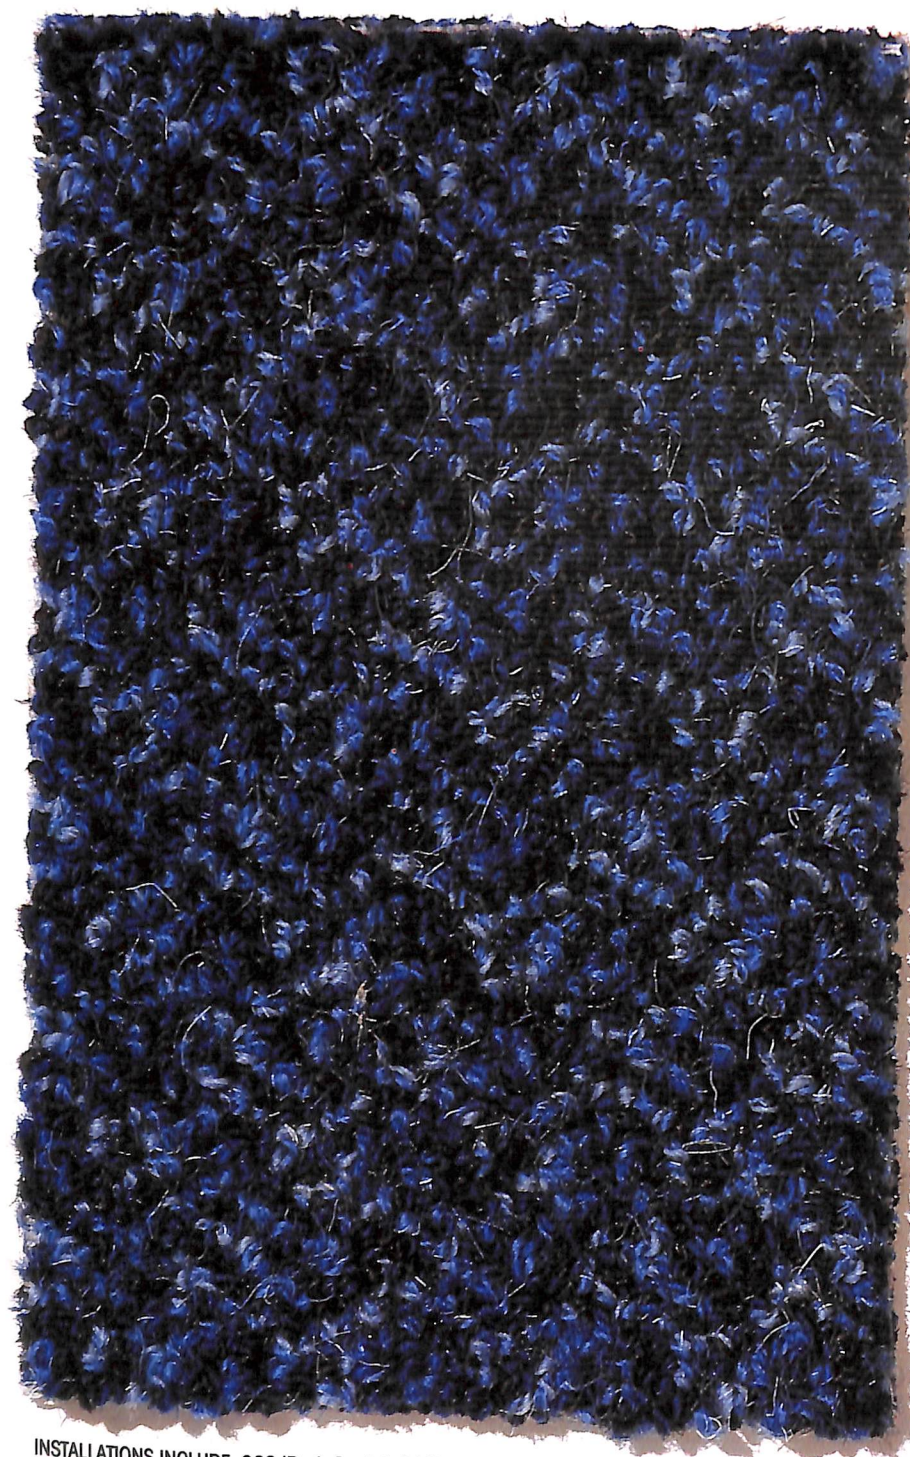

All stages of production are monitored from fibre dyeing through to carpet finishing, after which the carpet is tested and graded in accordance with Australian and Industry Standards.

Minster Carpets addresses the commercial carpet sector of the Australian Carpet Industry in two ways -

1. We offer a comprehensive range of well styled and coloured products which are marketed nationally and are serviced on a regular basis from stock. This is the standard product category.

2. For variations to any of our standard products plus an ability to respond to any specification for a particular end use, we have the non standard category. Non standard products are supplied to a minimum quantity of manufacture. This minimum does vary dependent upon the particular specification being manufactured.

Minster Carpets maintain sales offices in each State of Australia and Auckland, New Zealand. Operating from these offices are specialist commercial representatives who are experienced in all aspects of commercial carpeting. They can be regarded as your carpet consultant. Supporting our state activities are Head Office functions including Technical, Marketing, Quality Control and Product Development.

METROPOLIS

Metropolis is a stylish pure wool carpet and having an A.C.C.S. rating for heavy duty commercial use, it can be readily tailored to the highly specialised work environment demands of today's Architects and Interior Designers.

This premium quality carpet uses a fine gauge level loop pile construction featuring an intricate basket weave motif.

Metropolis is ideally suited to a wide range of installations and is both practical and attractive in prestige hotels, offices or in high traffic areas such as hospitals and schools.

Not only is it tough and hard wearing, the colour range is versatile enough for use in both small and large areas.

Specification

PURE NEW WOOL

INTREPID

Intrepid is a premium quality carpet offering a high degree of comfort, uniform texture and appearance. It has been used in a wide variety of installations, such as -

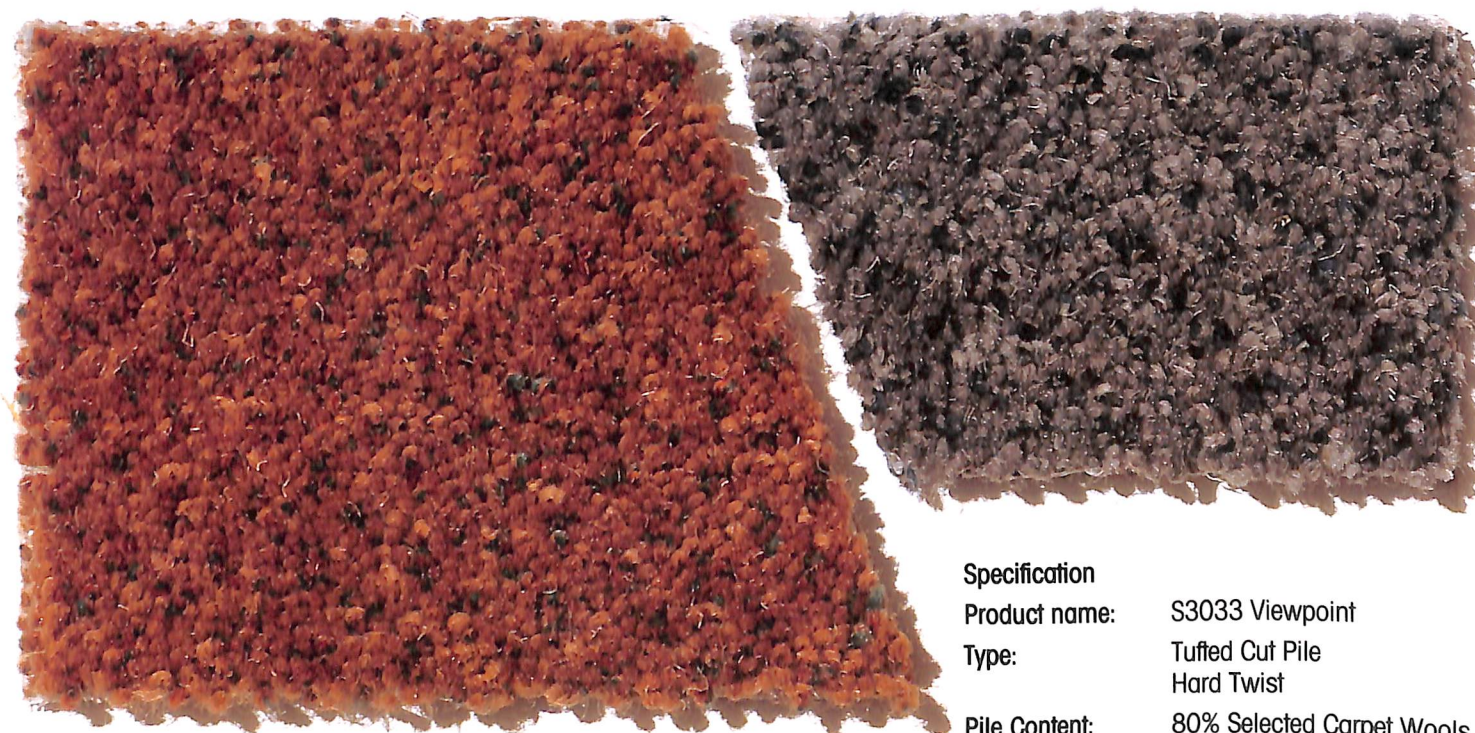

- 500 Collins Street, Melbourne
- State Insurance Office, Melbourne
- Jacqueline Eve Stores, Victoria
- Arlec Sonar Offices, Melbourne
- Meridian Lodge, Adelaide
- 155 Queen Street, Melbourne

Specification

Product name:	S3022 Intrepid
Type:	Tufted Cut Pile Hard Twist
Pile Content:	80% Selected Carpet Wools 20% Anti Static Nylon
Gauge:	3.175 mm (1/8")
Yarn Construction:	Three Ply
Pile Weight:	1626 gms/m ²
A.C.C.S. Grading:	Commercial Heavy Duty Including Stairs

GAZEBO MOTEL, QUEENSLAND

Specification

Product name:	S3033 Viewpoint
Type:	Tufted Cut Pile Hard Twist
Pile Content:	80% Selected Carpet Wools 20% Anti Static Nylon
Gauge:	3.175 mm (1/8")
Yarn Construction:	Three Ply
Pile Weight:	1694 gms/m ²
A.C.C.S. Grading:	Commercial Heavy Duty Including Stairs

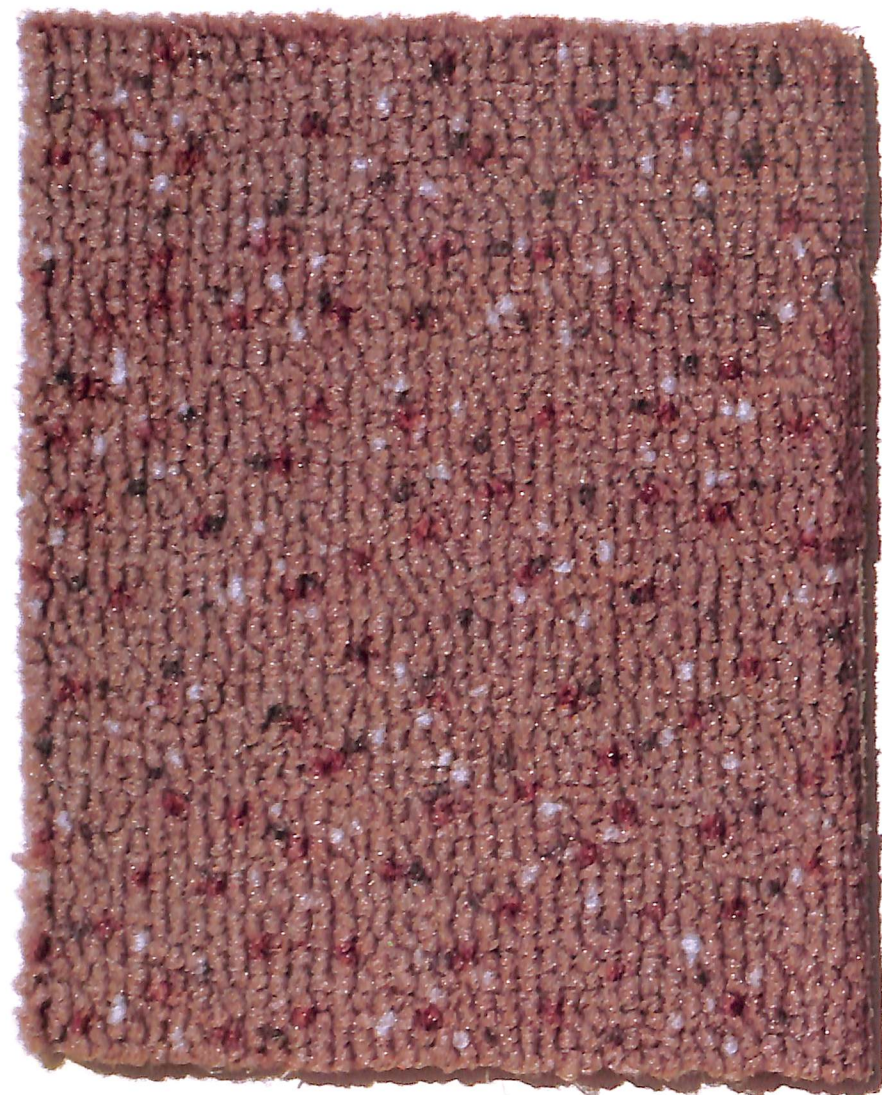

VIEWPOINT

Viewpoint combines the hard wearing qualities of Minster Intrepid with a subtle design which will enhance any floor. Aimed particularly at the prestige floorcovering market, Viewpoint can be used with confidence by interior designers, architects and carpet contractors alike.

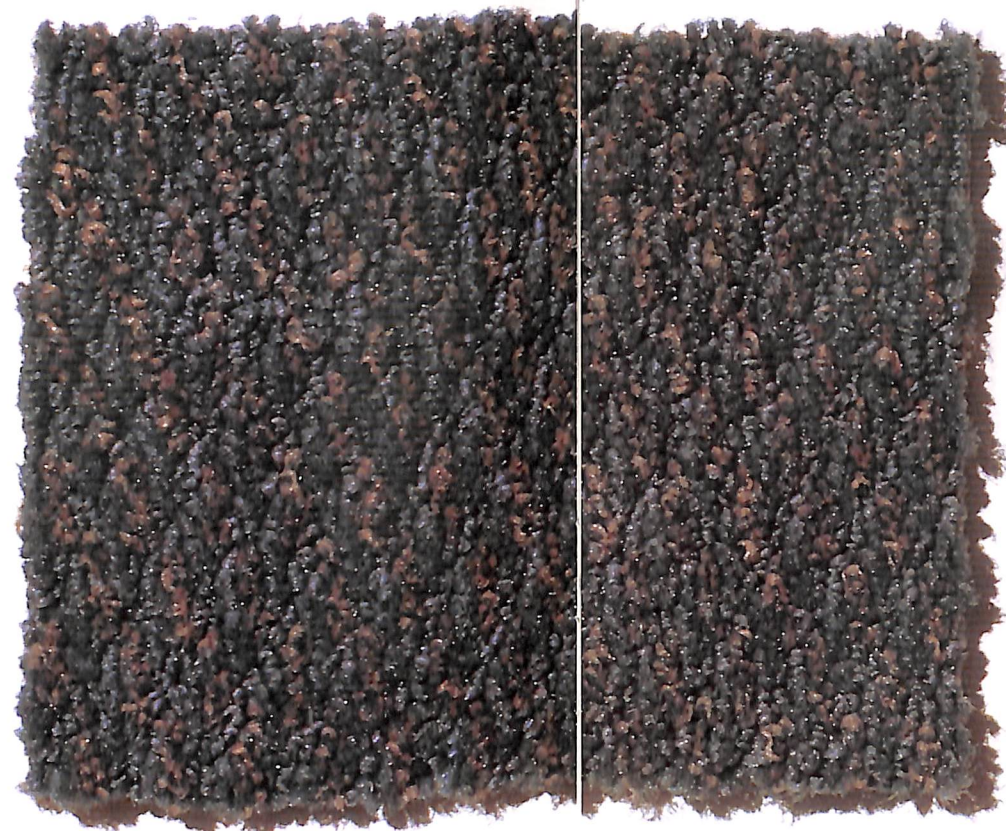

LIGHTNING RIDGE

A dense low pile height level loop product designed to give maximum performance in the heavy traffic areas enhanced by a well chosen range of colours in a distinctive design.

Specification

Product name: S3026 Lightning Ridge
Type: Patterned Level Loop Pile
Pile Content: 100% Antron Precedent[®]
Gauge: 2.540 mm (1/10")
Yarn Construction: Three Ply
Continuous Filament
Air Intermingled
Pile Weight: 1084 gms/m²
A.C.C.S. Grading: Commercial Extra Heavy
Duty Including Stairs

STILETTO

Advanced fibre technology has allowed Minster to produce an outstanding commercial product. The well tried and proven construction of this product lends itself to exceptional appearance retention and wear capabilities.

Specification

Product name: S3040 Stiletto
Type: Cut Loop Pile Textured
Pile Content: 100% Antron Precedent[®]
Gauge: 2.540 mm (1/10")
Yarn Construction: Continuous Filament
Pile Weight: 1152 gms/m²

NAUTILUS

A compact cut pile product well constructed to cope with today's demanding requirements for floor coverings. The advanced design in several colourways provides the consumer with an opportunity to complement any commercial installation.

AHERNS DEPARTMENT STORE, PERTH

ANTRON PRECEDENT[®]

THE

Only qualified licensed mills can make carpet of ANTRON PRECEDENT:

Before carpet can wear the ANTRON PRECEDENT name, it must be tested, approved and certified by Du Pont to meet the most rigorous construction standards in the industry.

When carpet measures up to these standards, it is labelled proudly with the Du Pont mark of quality:

The Q is your assurance that carpet has been manufactured by a qualified, licensed mill and meets Du Pont

Quality Standards for twist, pile height, density and *DuraTech* application. So every carpet of ANTRON PRECEDENT retains its texture as no other carpet can, by resisting crushing, matting and soiling.

Carpets of ANTRON PRECEDENT combine unique fibre engineering with a major advancement in carpet protector technology *DuraTech*.

DuraTech is based on new, patented chemistry developed exclusively for the ANTRON PRECEDENT system. Unlike existing fluorocarbon treatments, this radically different chemistry has an affinity for type 6.6 nylon that helps it adhere like no other carpet protector available today.

Long after other protective carpet

treatments wear off, *DuraTech* keeps on fighting soil and stains, even in the most demanding commercial environments.

By combining unique fibre engineering with *DuraTech*, carpet of ANTRON PRECEDENT becomes a design tool that allows you to maintain the original aesthetics of your environment further into the future, because the carpet you specify will keep its good look longer by resisting soil and stains.

Specification

Product name: S3031 Nautilus
Type: Tufted Cut Pile Patterned
Pile Content: 100% Antron Precedent[®]
Gauge: 2.540 mm (1/10")
Yarn Construction: Two Ply
Continuous Filament
Superba Heat Set
Pile Weight: 1288 gms/m²
A.C.C.S. Grading: Commercial Extra Heavy
Duty Including Stairs

WILD COLONIAL

Wild Colonial has been designed to fulfill the requirements of those consumers wishing to use a 100% wool product with a specific installed budget cost in mind. Marketed in a limited range of four colours, each is specifically tailored to the demands of today's interior decorators. The product is low and dense in construction to maximise the long term wear and appearance retention capabilities.

Specification

- Salvation Army, Melbourne

Specification

Product name: Titan 32, 36 and 40
 Type: Modulated Loop Pile
 Pile Content: 100% Acrylic
 Gauge: 3.175 mm (1/8")
 Yarn Construction: Three Ply
 Pile Weight: Titan 32 - 1084 gms/m²
 Titan 36 - 1220 gms/m²
 Titan 40 - 1355 gms/m²
 A.C.C.S. Grading: Commercial Medium Duty
 Including Stairs

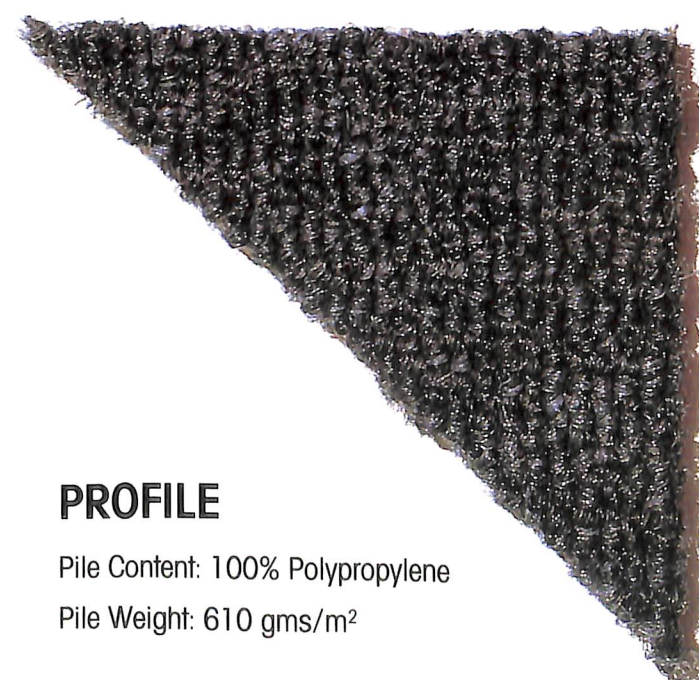

POLYGOLD INDUSTRIES, HALLAM

Minsters' group of Polypropylene products are manufactured using pile yarn supplied by the Polygold Industries subsidiary of C.C.I. Therefore, the control of yarn quality for these products is "inhouse" giving Minsters' Polypropylene ranges a high degree of reliability and performance.

Mosaic Sand, Brigadier, Profile and Profile One offer the consumer a range of alternatives of Polypropylene product comprising colour and style, pile weight and therefore price point.

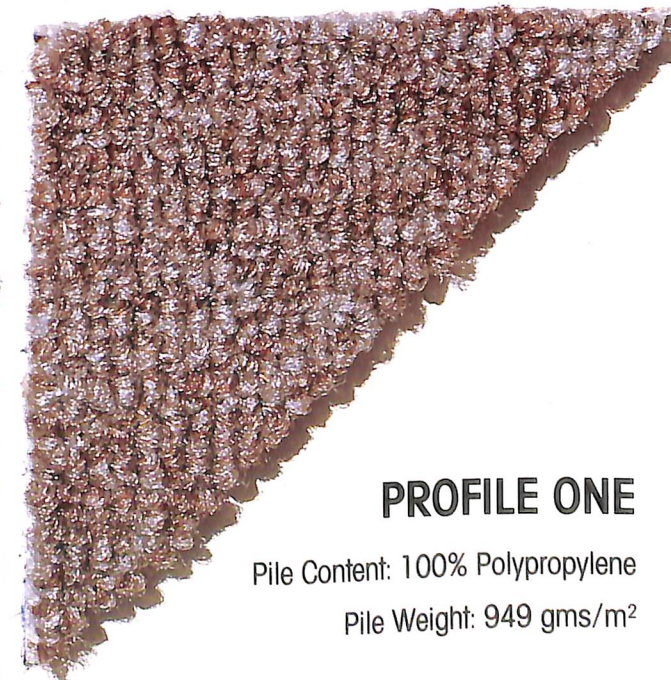

MOSAIC SAND

Pile Content: 100% Polypropylene
 Pile Weight: 745 gms/m²

BRIGADIER

Pile Content: 100% Polypropylene
 Pile Weight: 670 gms/m²

PROFILE

Pile Content: 100% Polypropylene
 Pile Weight: 610 gms/m²

PROFILE ONE

Pile Content: 100% Polypropylene
 Pile Weight: 949 gms/m²

Quality Assurance

Minster Carpets Pty Limited has adopted a policy of supplying only those products which have the requisite quality to merit customer satisfaction throughout the effective life of the carpet.

The quality and reliability of the company's products are the concern of every person in the organisation and not the sole responsibility of the Quality Control Department.

Quality starts with specification, design and development and continues right through all the subsequent phases of manufacture, distribution and sales; thus every section has quality related responsibilities.

To help achieve this policy's objectives, quality problems arising in various areas are to be identified and solved with speed, technical efficiency and economy. The methods employed are kept continually under review and improved whenever and wherever necessary.

The foregoing broad principles are basic to this company for the control of product quality and all levels of management actively support the Quality Control Department in the implementation of this policy.

INSTALLATION

Tufted carpet should be installed to the requirements of the Australian Standard "Textile Floor Coverings - Laying Practice" AS2455-1989. The standard sets out the requirements for the laying of textile floorcoverings. It details the work necessary in preparing sub floor surfaces, together with the procedures that should be adopted when textile floor coverings are laid over various types of sub floors, and when installing textile floor coverings over under-floor heating units.

Copies of Australian Standards may be purchased at offices of the Standards Association of Australia which are found in each capital city.

It is recommended that only trained tradespeople install Minster tufted carpets. The installation of carpet calls for considerable skills and knowledge not normally possessed by the handyman. Important considerations include tensioning, seaming, pattern matching and pile direction.

MAINTENANCE

The first consideration of a carpet maintenance programme involves understanding the mechanism of soiling. Most of the soil in a building is brought in on shoe soles, the carpet catches this soil and localises it in certain key "walk off" areas. These are areas where people first walk onto the carpet from an external pavement or internal hard surface floor areas, such as ground floor entrance areas and lift lobbies. The walk-off areas may also extend to the lift lobbies on other floors and include carpet in the lifts themselves. There will be walk-off areas from freight or service elevators on all floors.

Heavy traffic areas require adequate vacuuming and treatment of stains and spots from spillage, to retain best appearance and minimise the tracking effect of foot traffic.

Carpet maintenance is designed to be preventative with the use of soil barrier mats at all points of entry and caps, tips or glides fitted to chair and furniture legs.

Full details of Installation and Maintenance are provided by Minster.

WARRANTY

THE FOLLOWING WARRANTY CAN BE ADAPTED FOR SPECIFIC PROJECTS

Minster Carpets Pty. Limited, manufacturers of "MINSTER" quality commercial carpets, provides a . . . year Warranty from date of installation, against undue loss of condition due specifically to faulty material or workmanship in the manufacture and preparation of the carpet. This warranty specifically excludes any consequence of faulty or inadequate installation and is subject to the following conditions:

1. A balanced maintenance programme is to be instituted which will include the carpet being:
 - a. vacuum cleaned daily with a commercial type brush vacuum cleaner,

- b. hot water extraction cleaned on a cycle of approx once (1) per year by professional and recognised carpet cleaners and that monthly spot cleaning be carried out as necessary.
2. All chair legs and furniture legs are to be fitted with suitable caps, tips, or glides. The use of castors is specifically excluded.
3. Suitably backed mats to be provided to absorb abnormal wear under desks and in front of servery counters.
4. Extremely heavy traffic areas will be excluded from the above warranty as wear in such areas depends on the traffic load and could require replacement more often.

Our undertaking is to supply, subject to

normal dye variation, replacement carpet of a similar type and/or the repairing or making good such areas, and does not include provision for any consequential claims. This Warranty specifically excludes any consequence of faulty or inadequate installation, but in any event Minster Carpets Pty. Limited recommend that installation is carried out in accordance with Australian Standards (AS2455-1989). The benefits conferred by this warranty are in addition to all other benefits and remedies in respect of the carpet which the consumer has under the Trade Practices Act and other State and Territory Laws.

NON STANDARD PRODUCTS

With the manufacturing resources of the Capital Carpet Industries Group to call upon, Minster Carpets Commercial Division has facilities to respond to the most demanding of specifications for custom made products. (In most cases minimum quantities apply).

Our commercial staff can provide a full consultancy service covering product recommendations, design and colour, quality assurance, installation and maintenance procedures and will be pleased to discuss your requirements with you.
