

210. RULE OF AUST VS.

This is not unique AUST problem.
All would looking for better solutions.
But where we are fairly unique is
that we always look to others to
help us find solution. COPY
RULE: 15 yrs.

15 yrs ago von HERTZEN
promoted Tapiola

In 1962 (1/2 way) RESTON

So NOW we have ELLISTON...
(Note how Appletree Hill, 1965)

But also BIG: PHILLIP; 2,400 pop.
Ian McKay (still only fraction
size of others - & of THAMESMEAD)

Still only superior suburb.

Is there some other solution
- between city & suburb?

How much longer can we stand
strain of sprawl (family life)?

Somehow we've GOT to find own
answer. CAN'T COPY US (freeway)

CAN'T IMITATE JAPAN (ocean city)

CAN'T BORROW from Scandinavia (TASTE) ^{? diff.}

CAN'T COPY anyone, but can
learn from experiments:

HABITAT 67

SUNSET MOUNTAIN PARK, L.A.

'MOBILE HOMES', USA

where to? I don't know
Please - OPEN MIND - and

WW2 ended: Optimism, in
which Archt's shared.

The thing called MOD ARCH
had been approaching, 15 yrs
or so: W B G - H. D. A, M & G
We knew it must come. & we
knew what it would look like
NOT FIXED IMAGE but FLATROOF
White walls, Nat. Timber, Open plans.
Prefabbed — at least in working
parts. (GROPIUS: 1906)

We took for granted AUST → VILVA
(Why not?) GOOD — space
But we cast envious glances at
Europe & USA too: LeC. Slabs.

So there in Crystal Ball: 2 kinds
— tall shining skyscrapers for sophistic
— small sparkling prefabs for nice
young couples (gum trees & pergolas)

BUT only ^{one} part of predict'n: GUM trees
Modern houses as rare as ever

Shining sophisticated flats of LeC: H.C.
& 1000s of new breed: Yellowies

In Prahran 100's to every hse (14
permits)

So where now?

This is not simple just problem
All would look for this solution
But when we are first, we are
It is not always look to others to

In 1962 (K way) ROSTER
So next we have ELERTON

But also BID: PHILIP S. ADOLF
Jan Mackay (still of fact)
