

Very sound advice, and will heed.

The main work was never written with you in mind, though - only the last four thousand years. Wires must have crossed somewhere. On my calculation, I must have missed one-and-a-half lectures. Never mind. The little one was a particle in a wing.

Good wishes and thank you.

Second cycle,
Renascence or lunar rainbow,
I love it.

My fingers steal back,
Testing the quality,
Feeling the texture
Of the cerements of the base.

- R. Adam
