

A NOVELTY IN ENGINEERING.

During Friday, Saturday, and Sunday (June 21), the Great Western Railway Company converted its south-west lines from the broad to the narrow gauge.

For some days previous to commencement of the work, the broad gauge stock was gradually worked off the line, and on Thursday evening each stationmaster had to give a certificate that his station and district were clear of broad gauge rolling stock.

The modus operandi was as follows:—Only one rail on each line was moved; but for some weeks past the men have been engaged in clearing out the ballast to facilitate the shifting of the wood and ironwork, and also in partially sawing of the "transoms."

CURIOUS FRENCH MARRIAGE CASE.

A suit has just been brought before the Court of Appeal for nullity of marriage by a lady moving in the best of society, who, up to this moment, was believed to be a widow. It appears that after the death of her first husband, who bequeathed her a handsome fortune, she met a man who had nothing to recommend him save a handsome moustache and gentlemanly demeanor.

One of the most extraordinary printing tenders we ever remember to have met with has been under discussion by the Liskeard (Cornwall) Board of Guardians. Two local printers—Mr. Deecker and Mr. John Philip—had sent in tenders, but on the latter ascertaining that Mr. Deecker had also tendered, Mr. Philip obtained his tender altered.

DISCOVERY OF A RICH QUARTZ REEF NEAR CARISBROOK.

Some excitement prevailed in Maryborough and Sandhurst on Friday last, when it became known that what at present seems to be a rich quartz reef had been discovered about three miles from Maryborough, close to the Newmarket road and north of it, and about two and a half miles from Carisbrook.

NEW CALEDONIA.

A correspondent of the Tasmanian Tribune, writing from Noumea on 24th August last, states that "in the beginning of July Admiral Ribout arrived here upon a special mission from the French Government, to inquire into the escape of Rochefort, Pascal, Grousset, Jourde and the rest who got clear some months since in the P. C. E. On his arrival the place was turned upside down, and a searching inquiry made into the affair.

Miscellaneous Extracts.

The Hawke's Bay Herald reports what it is pleased to call "an interesting" case of supposed witchcraft, as occurring at one of the native settlements in the Poverty Bay district. The victim is a young Maori girl, who being attacked with some ordinary disorder, took it into her head that she had been manured by a tohunga, or wizard, who lives a few miles distant, simply because a girl with whom she had quarrelled had gone to reside in the settlement where this tohunga was living, and the sick girl therefore set it down as a foregone conclusion that her enemy had induced the tohunga to bewitch her.

An illustration of Irish simplicity is afforded by the reply of a young candidate for the office of a teacher. The examiner was endeavoring to elicit the candidate's idea on the market value of labor with reference to demand and supply; but, being baffled, he put the question in this simple form: "If there are in your village two shoemakers, with just sufficient employment to enable them to live tolerably, and no more, what would follow if a third shoemaker set up in the same village?"

The capacity for economy is greater with women than with men. Wherever women are trusted to manage affairs involving the expenditure of money for useful purposes, they are to be found to be more economical than men. Ask any mechanic, who takes his weekly wages directly to his wife, and makes her the treasurer, and he will tell you that the wife is a better manager than he would be.

Illicit match factories are said to be numerous in France, owing to the high internal revenue tax on these articles. Some depredatars have stolen the time-gaug at Grafton. It was a cannon weighing several hundredweight.

A lawyer's account is not the least curious item of legal lore sometimes. One of the learned fraternity, lately resident in Nagambie, had been engaged on behalf of the Shire Council to prosecute defaulting ratepayers on the condition that he paid for all summonses in the first place, and recovered the same from the ratepayers in question. At the last meeting of the Council, an account was rendered by this gentleman, which stated that £5 18s. had been recovered in cash; which sum, minus 12s. 6d., had been expended on summonses to parties from whom he had got nothing.

The Maryborough Advertiser says:—The gambling spirit to which we have so often referred is not confined to Maryborough, but extends to some of the adjacent villages and smaller towns. A short time since a Government official stationed at a hamlet within a few miles of Maryborough for a few weeks, and who has since left the service, nipped up all the knowing ones in a few days, and took from one of the gamblers—a clergyman—no less than £16 odd in 3d., 6d., 1s., and 2s. 6d. pieces—the whole of more than one Sunday collection in short. The reverend gentleman and gambler was playing in a public-house at the time—an hotel kept by a well known hostess who has a peculiar and not a very pleasant way of pronouncing the words "forty-five." It is a strange but true circumstance that the predecessor of this same clergyman was very fond of the same game, for the same filthy evening, at the same house, the last Sunday evening he spent at the village in question, he spent playing cards in this hostility.

A rumor from Russia, to the effect that the mammoth is not an extinct animal, has set naturalists on the alert; and should it prove true that the living mammoths are now to be seen in the deep gorges of the Lena, in far Eastern Siberia, we may anticipate that expeditions will be sent out to capture a few of the huge animals for the zoological gardens of Europe. According to the rumor, the discovery was made by one of the convicts who had been transported to that distant region. That the mammoth once abounded in Siberia is well known, whose tusks supply much of the ivory used in the arts, which are there embedded in the frozen ground.

An interesting little establishment has just broken up at Trebizond, under circumstances which have created, if not a "scandal" at least a sensation in that place. It appears that for some time past Trebizond has been kept in a state of uneasiness owing to the proceedings of this household, which consisted of a father six sons, and one daughter. Delightful as was the charm which reigned over their domestic circle, it did not extend beyond the hearth; for, unfortunately, the family weakness was murder. In a brief space of time the eight persons composing the family managed to get through, according to the Trebizond correspondent of the "Levant Herald," no fewer than 235 murders. Out of this number the gentlemen of the family were each responsible for thirty murders while the young lady only committed twenty-five, though, but for the premature interference of the authorities, it is considered probable that she would have completed an equal number. The predecessors of the present Governor most ungenerally caused her to be arrested, together with her amiable parent and four remaining brothers, but the poor old gentleman was hanged about three months ago, and two of his sons met with a similar melancholy accident at a subsequent period. The other two and the young lady are still languishing in captivity, and much anxiety is felt on their behalf; for, unless the local judges take a lenient view of their youth, they have but a poor chance of resuming their position in society. Altogether it is a sad story, and it is not surprising that these young people and their misfortunes have of late been the talk of Trebizond.

The Garden.—October.

KITCHEN GARDEN.—If season is moist, carrots, leeks, onions, and parsnips may still be sown. Sow largely of kidney beans, early turnips, capsicums, tomato, cucumber, vegetable marrow, pumpkins, melons, and parsley; also tall-growing varieties of peas—they will grow very high at this season of the year. Plant out largely cabbage, cauliflower, brocoli, and celery; also, sow again for succession. Weeds will grow apace—choose a fine sunny day for hoeing them down, and rake off when withered, to prevent their starting into growth again.

Flower Garden.—Balsams, cockscombs, globe, amaranthus, zinnias, and other tender annuals, should now be sown, if not already done; if sown in pots, and transplanted into flower beds, place in sunny weather an empty flower-pot over the patches of young plants; remove the pots every evening, or the plants will grow up weak and spindling. Climbing plants will be growing fast, and will require constant trimming and training. See that larger beds are kept filled by turning out flower-plants in pots. FARM.—This is the last month that potatoes can be planted, except in low-lying lands. Sow largely of maize and sorghum; if mangled sowing should also be completed. Earth up early crops of potatoes with a double-breasted plough; do not delay this operation too long, or you will injure the fibres.

HOLLOWAY'S PILLS

No family or person should be without these Pills their long tried efficacy in correcting disorders of the liver and stomach, stimulating the bowels and purifying the blood, has secured for them an imperishable fame throughout the world.

How to Enjoy Life.

It is only known when the blood is pure, its circulation perfect, and the nerves in good order. The only safe and certain method of expelling all impurities is to take Holloway's Pills, which have the power of cleansing the blood from all noxious matters, expelling all humors which taint or impoison it, and thereby purify and invigorate and give general tone to the system.

Debilitated Constitution — Bad Coughs.

In general debility, mental depression, as nervous irritability, there is no medicine which operates so like a charm as these famous Pills. They soothe the stomach, elevate the spirits, and in fact render the patient sensible of a total and most delightful revolution in his whole system.

Indigestion and its Cure.

Indigestion with torpidity of the liver is the bane of thousands, who pass each day with accumulated sufferings, all of which may be avoided by taking these pills according to the accompanying directions.

Holloway's Pills are the best remedy known in the world for the following diseases:—

- Ague, Bilious Complaints, Bloatedness in the Stomach, Debility, Dropsy, Female Irregularities, Fevers of all kinds, Gout, Headache, Indigestion, Liver Complaints, Lumbago, Rheumatism, Retention of Urine, Scrofula, or King's Evil, Sore Throat, Stone and Gravel, Secondary symptoms, Tics-Dolorous, Urticaria, Venereal Affections, Worms of all kinds, Weakness from whatever cause, &c., &c.

HOLLOWAY'S OINTMENT

Bad Legs, Bad Breasts, Wounds, and Ulcerations of all kinds. There is no medicinal preparation which may be so thoroughly relied upon as the excellent and the above ointment as Holloway's Ointment. Nothing can be more salutary than its action on the body, both locally and constitutionally.

Bronchitis, Diphtheria, Colds, Coughs, Sore Throats and Shortness of Breath

Relaxed and congested throats, elongated uvula ulcerated or turgid, swollen tonsils, croup, whooping cough, asthma, and other affections of the respiratory system, also palpitation, stitches and shortness of breath, may, with certainty, be cured by rubbing this healing Ointment over the throat and back for at least half an hour twice a day, assisted by appropriate doses of Holloway's Pills.

Gout and Rheumatism.

This invaluable ointment has greater power over gout and rheumatism than any other preparation. None need remain in pain if its removal be set about it in good earnest, by using this valuable remedy according to the printed instructions affixed to each pot. When the ointment is applied to the joints, it penetrates to the source of the evil, and drives it from the system.

Piles, Fistulas, and Excoriations.

The cure which this Ointment effects in healing piles and fistulas of long standing, after they have resisted all other applications, have been so countless and notorious throughout the world that any cure to give an adequately detailed statement of their number or character would be vain. It is sufficient to know that the Ointment has never proved inefficient.

In Disorders of the Kidneys, Stone and Gravel.

The Ointment is a sovereign remedy if it be well rubbed twice a day into the small of the back, over the region of the kidneys, into which it will gradually penetrate, and in almost every case give immediate relief. When the Ointment has been once used it has established its own worth, and has again been eagerly sought for as the easiest and safest remedy in all disorders of the kidneys. Both the Ointment and Pills are sold in the following complaints:—Bad Legs, Bad Breasts, Blisters, Burns, Bunions, Chilblains, Chapped Hands, Corns (Soft), Contracted and Sore Nipples, Sore Throat, Sore Eyes, Sore Feet, Sore Noses, Sore Throats, Sore Gums, Sore Lips, Sore Mouth, Sore Tongue, Sore Throat, Sore Gums, Sore Lips, Sore Mouth, Sore Tongue.

DR. L. L. SMITH

DR. L. L. SMITH devoted himself to the study of medicine in the colony to the practice of this branch of his profession, which he has followed for many years, and has been the pupil of and practised with the celebrated Dr. R. C. O'Connell, the only medical practitioner who ever exclusively adopted this as the sole branch of his profession.

DR. L. L. SMITH has been the public agent for the quackeries advertised. If the taker of any of these advertised nostrums escapes with his life, or his system be not thoroughly and irreparably undermined by them, he may look upon himself as the most fortunate mortal.

DR. L. L. SMITH'S

These men and women who have been the victims of unprincipled charlatans frequently seek that recovery which is often beyond Dr. SMITH'S control. When will the public understand that it is to their interest to consult a duly qualified medical man, who has made this his sole study, rather than apply to a number of ignorant impostors, who merely harp and prey upon their pocket and health?

DR. L. L. SMITH'S

DR. L. L. SMITH'S CONSULTATION FEE BY LETTER £1. Medicines forwarded and packed so as to avoid observation, to all parts of Australia, &c. Books published by the Doctor can be had on application to him.

Commercial.

BALLARAT WHOLESALE PRODUCE MARKET.
MESSRS. GRAY AND OSBORN'S REPORT.—
Since our last report we have had a fair supply of produce to the market, and last week's quotations have been well maintained.

ARARAT PRODUCE MARKET.
The markets are in some degree altering owing to the advance of season. Because of the slackness of the flour market wheat is not coming in at the usual rate, and prices may be said to be hardening slightly.

BALLARAT LIVE STOCK MARKET.
MESSRS. HERRICK AND LEONARD REPORT.—
Fat Sheep—355 woolled merino wethers for Mr. James Malone, Smeaton, at 14s; 611 shorn merino wethers for Mr. Alex. Cameron, Springfield, at 8s 6d.

GEELONG LIVE STOCK MARKET.
MESSRS. MELLISH, VINES, AND CO. REPORT.—
Fat Cattle—A moderate supply from the neighborhood, quality generally speaking was good.

GEELONG STATION PRODUCE MARKET.
MESSRS. JECKERLAND AND BERNETT REPORT.—
Sheepskins—There was a full attendance of buyers, but bidings were languid, except for superior lots of skins.

From Men of the Time we take the following account of Guizot the historian and statesman who died recently.
Francois Pierre Guillaume Guizot was born 4th of October, 1787, and was the son of an advocate of Nimes, who perished on the scaffold during the revolution.

THOMAS LEWIS, Postmaster.

Beaufort, 9th October, 1874.

THE Riponshire Advocate.

Published every Saturday Morning.

SATURDAY, OCTOBER 10, 1874.

As we conjectured in our last week's issue, the performance in aid of the Ballarat Benevolent Asylum on Thursday night last was a great success. The Beaufort Societies Hall, the building in which the entertainment took place was filled in every part, not excepting the passage where seats were placed for the convenience of the public.

The annual meeting of the Beaufort Agricultural Society which should have been held on the 8th instant, lapsed, only five members being present. If members do not take more interest in the society, its early dissolution must be the consequence.

We have been informed that the committee of the Mechanics' Institute at their meeting, held last evening, decided not to hold a fancy fair on Boxing Day. This will allow an opportunity for a similar body to hold a festival on that day.

The Beaufort railway line from Ballarat to a little beyond Burrambeet, although completed by Mr. Niel McNeil, the contractor, in April last, has not yet been measured, consequently the contractor cannot get paid, and he is put to great inconvenience.

On Sunday last, Mr. Malone formerly Crown Lands Bailiff for this district, expired at Hiorsham, which township he was lately removed to. The complaint which the deceased gentleman was suffering from and which terminated fatally was inflammation of the kidneys.

The following caution as to handling dynamite caps is given by the Ballarat Times.—"A miner named Thomas Smith has just left the hospital, having been confined there through injuries received by an explosion of dynamite.

Last Saturday, Frank Hewitt, the English pedestrian, ran a horse 100 yards, at the Melbourne Friendly Societies ground, and won by about three yards.

The interesting person known as 'Sullivan, the New Zealand murderer,' has sailed for England, whose hospitable shores will no doubt welcome him, and whose admirable detective police will receive him, it is to be hoped, with a cordiality tempered by intelligent reserve.

There is some talk in Malmbury (remarks the Kyneton Observer) about the speedy establishment of a woollen factory, to be worked by water-power obtained from the aqueduct.

The Courier says.—"A shareholder in one of the co-operative companies in Scarsdale, who has only been married about two months, having obtained a wife by means of a matrimonial advertisement, found on returning home from the night shift on Monday morning last that his wife had departed, widowed giving him a warning of her intention of doing so, and had taken with her his last fortnight's dividend.

Messrs. H. and N. Wilson, of the Wimmera, passed through Ararat, on Tuesday, en route to the Paroo river, Queensland, where they have purchased a large station.

An Irish journal states that on Sunday, 2nd August, a number of gentlemen representing the parishioners of Ratafarnham waited on the Most Rev. Dr. O'Connor, Bishop of Ballarat, at the parochial house, to present his lordship with an address and testimonial, which were elegant in their nature.

The following caution and advice appear in the Economist.—"Persons travelling in the bush are cautioned against going too near old logs without careful examination of them, as the snakes, when the sun shines warm, are beginning to come out after their winter sleep.

The Courier says.—"A shareholder in one of the co-operative companies in Scarsdale, who has only been married about two months, having obtained a wife by means of a matrimonial advertisement, found on returning home from the night shift on Monday morning last that his wife had departed, widowed giving him a warning of her intention of doing so, and had taken with her his last fortnight's dividend.

We read in the Nouvelle Vaudaise that at the Aarau abattoir in the Canton Argovie, Switzerland, a new method of killing beasts is being tried under the supervision of the local society for the Prevention of Cruelty to Animals.

The Golden Fleece Company's return up till yesterday was 30oz. 13dwts. Several sluicing parties have erected sluice boxes about a mile from the township, which will receive an abundant supply of water from the Beaufort Water Supply's race.

Wellington Company.—The shaft is down 120 feet. The pumps are now fixed in the shaft, and everything is ready for opening out. The machinery is in good working order.

The Albion Company have broke through into the wash, and expect that they will have a machine ready for a trial testing this week.

Correspondence.

To the Editor of the Riponshire Advocate.

Sir,—There are certain responsibilities the due performance of which no societies can dare with impunity to shirk or ignore.

Leicestershire miners have struck against the reduction of 6d. per day, after a protracted resistance and several conferences.

The Queen remains in Scotland till November. On his return from Ireland, the Danish King visited Edinburgh, where he experienced an enthusiastic welcome.

General Cushing, the American Minister at Madrid, is pressing the American claims in connexion with the Virginia affair.

The Duke and Duchess of Edinburgh, after being languished at Brussels, reached Folkestone on the 20th August, on their return from a continental tour.

The Emperor of Austria has arrived in England, incognito, to join the Empress in the Isle of Wight.

The Count de Jarnac has been appointed French Ambassador in London. Mr. Gladstone, in a letter to the Guardian, denies the statement industriously propagated that the Queen had endeavored to influence his conduct with regard to the Public Worship Regulation Bill.

The break up of the Ashantee monarchy is quickly following on the English victory, and the Kings of Dinabini and Beggua having declined to renew their homage to King Coffee, he has appealed to the British Administration at the Cape Coast Castle for assistance.

Lieutenant Cameron, in a letter to the Foreign Office, has declared that the slave trade still flourishes in a belt of jungle villages, about a week's march from the east coast.

An exciting controversy in the popular press has been provoked by the refusal of a clergyman, supported by the Bishop of Lincoln, to permit the word "Reverend" to be inscribed on the tombstone of a daughter of a Wesleyan minister.

The faithful increase of crimes of a brutal character, and especially kicking to death, is provoking an indignant outcry against the absurd leniency of punishments inflicted, and even magistrates declare that the savage ferocity gaining ground must be met by repressive legislation.

On the 22nd of August the great hosiery factory of Messrs. Morley at Swinton, near Nottingham, was burnt down, and £10,000 worth of property destroyed.

At the Lamection Police Court, on the 8th instant (we learn from the Cornwall Chronicle), A. E. Bird, the pedestrian, was committed for trial on a charge of perjury.

The International boat race on the Dee, between Aberdeen and Edinburgh, the former won by a length.

commandant was shot and 495 soldiers, and 22 old guns taken. The captor also recovered possession of 40,000 piasters paid to the betrayers of the fortress.

The Duke appointed to investigate the circumstances of Marshal Prim's assassination has indicted fifty additional persons for complicity in the crime.

Some German working men have written to Prince Bismarck, stating that reprisals shall be visited on Catholic bishops for any future attempts to kill him.

The Emperor of Austria has arrived in England, incognito, to join the Empress in the Isle of Wight.

The new Governor of Queensland, Mr. Cairns, was popular here as Postmaster General.

All expedition of 1000 troops against the Dullas, an Assam hill tribe, comes off shortly.

The Yarkand illusion is regarded as a great success, as establishing an outpost of observation against the Russians.

Lady doctors are proving a great success in India. Native ladies flock to them.

The steamer Mary Grant foundered near Sandheads.

An earthquake occurred on the morning of the 19th, but no damage done.

The Chinese and Japanese quarrel about Formosa still hangs fire, and is reported to be compromised by the payment of the Japanese expenses and the withdrawal of their troops.

An association is being formed in London to prosecute ritualistic clergymen under the new act.

An exciting controversy in the popular press has been provoked by the refusal of a clergyman, supported by the Bishop of Lincoln, to permit the word "Reverend" to be inscribed on the tombstone of a daughter of a Wesleyan minister.

Correspondence.

I. O. G. T.

To the Editor of the Riponshire Advocate.

Sir,—Before entering upon the main subject of the present letter, I think it desirable to make a few general observations thereto. In the month of June last, I addressed a letter to you on the subject of the Riponshire Council ignoring the services of the local press.

What is, then, the meaning of the Good Templars imitating the pernicious example set them by a certain section of our Shire Council, in ignoring the local press?

To the Editor of the Riponshire Advocate. Sir,—In the matter entrusted to your notice, you will be kind enough to publish it in your most valuable paper.

General News.

conclusion I will ask the office bearers of the Hope of Beaufort Lodge of Good Templars, how they reconcile the performance of their educational mission, with antagonistic action towards the contingent of THE FOURTH ESTATE established on Beaufort.

Beaufort, October 23rd, 1874. SENTINEL.

THE STOCKYARD HILL POST OFFICE

To the Editor of the Riponshire Advocate.

Sir,—I see in your last issue a letter from the Stockyard Hill correspondent of the Ararat Advertiser, which states, that

A little murmur of discontent is expressed sometimes about the private school and the post office, but there has been no open contest; the opponents on each side keeping at a respectable distance.

Well, Sir, according to this letter, a portion of the Stockyard Hill community are guilty of a very reprehensible conduct towards Mr. Skews, the much respected schoolmaster at Stockyard Hill, and, Sir, I presume that if the above quoted portion of the letter is allowed to pass unchallenged, it would give it a semblance of truth, and be detrimental to all parties concerned except those who are really to blame.

Well, Sir, according to this letter, a portion of the Stockyard Hill community are guilty of a very reprehensible conduct towards Mr. Skews, the much respected schoolmaster at Stockyard Hill, and, Sir, I presume that if the above quoted portion of the letter is allowed to pass unchallenged, it would give it a semblance of truth, and be detrimental to all parties concerned except those who are really to blame.

Well, Sir, according to this letter, a portion of the Stockyard Hill community are guilty of a very reprehensible conduct towards Mr. Skews, the much respected schoolmaster at Stockyard Hill, and, Sir, I presume that if the above quoted portion of the letter is allowed to pass unchallenged, it would give it a semblance of truth, and be detrimental to all parties concerned except those who are really to blame.

Well, Sir, according to this letter, a portion of the Stockyard Hill community are guilty of a very reprehensible conduct towards Mr. Skews, the much respected schoolmaster at Stockyard Hill, and, Sir, I presume that if the above quoted portion of the letter is allowed to pass unchallenged, it would give it a semblance of truth, and be detrimental to all parties concerned except those who are really to blame.

Beaufort, October 21st, 1874. WATCHMAN.

It appears (remarks the Telegraph) that in all probability a portion of the Martini-Heury rifles, which have been so long expected from home for the use of the Victorian Volunteer Force, will arrive before long.

The railway line between Maryborough and Talbot is being very satisfactorily progressed with (says the Talbot Leader), the rails being laid as far as the Talbot side of the bridge over Eam Creek, and within a distance of some three miles from Talbot.

The grasshoppers are likely to prove very destructive this season. The Pastoral Times of the 17th inst. writes:—"The grasshoppers are coming in millions; the air is thick with them on the plains. Many of the runs have not recovered from the damage done by the pests during last season—in fact, the carrying capacity of many of the runs has been seriously interfered with, owing to the ravages committed by these creatures."

The Castlemaine Representative remarks that "the Sabatiniarion society received a very satisfactory exposition from the Venerable Archdeacon Crawford at Christ Church on Sunday, who, whilst inculcating the absolute necessity of every member of the church attending its religious ordinances on the day set apart for the purpose, expressed his strong dissent from the views of those who would regard the remainder of the day miserably by abstaining from the rational and intellectual enjoyment afforded by the public parks, libraries, picture galleries and museums which have been provided for the people, and he pointed out very forcibly that it was almost impossible for men who were hard worked during the week to avail themselves of the great advantage to be obtained from such sources of intellectual enjoyment if they were denied these on Sundays."

Of the Mornington murder case the Age says:—"Dr. Madden, who, by the way, for the first time was called upon to defend a man for his life, made a very effective address to the jury, contending that the chain of circumstantial evidence against Shaumon was made up of rotten links. During his address the foreman of the jury fainted, and had to be taken out of court with a constable and Dr. Wilson in attendance on him. He did not recover, and the court was adjourned for half an hour, at the end of which time he was pronounced to be in a fit state to attend to his duties."

The Chinese Lottery Company at Golden Point, having compromised their recent losses have decided to commence operations again with a capital limited to £300. To day the various agents were selling tickets, and the lottery will be re-opened to night. During the past 12 months, the nightly receipts by the "bank" varied from £30 to £100 and ticket holders won very little up till last Sunday night, when there happened to be about 23 tickets all marked the same, winning about £25 each.

The Sydney Empire of the 16th inst. states that the general annexation of Fiji took place at Levuka (Navosa) on the 2nd October. The British flag was hoisted in the presence of Cakobau, and Sir Hercules Robinson, who accepted the cession of the islands on behalf of Great Britain, and agreed unconditionally for England to undertake the government of the group. A Fiji Government Gazette extra ordinary announcing the annexation was published the same day.

The Labourers Union Chronicle publishes the following statement from Essex, which painfully illustrates the pressure applied to the labourers of that district:—"The screw is being brought to bear upon them in every conceivable manner, both by employers, boards of guardians and relieving officers, James Bell, of Layer Marney, a member of Birch branch, locked-out with a family of seven children (none of them able to earn anything), has recently lost one of that number by death. Being totally unprepared for such a calamity, the poor fellow was obliged to apply for a parish coffin in order to have his child buried. On making his application Bell was asked, 'Are you in the union?' 'Yes,' was the answer. 'Then,' replied the officer, 'you will have no relief. Arch must bury it for you.' Bell was in the act of walking away when the fellow sang out, 'Give up your card; you can have a coffin then.' The poor man stoutly refused to sell his manhood and principle for a parish coffin, and as a reward for his bravery, the branch to which he belongs subscribed the money to defray the expenses of the coffin and funeral; and more, at its interment, 175 union men preceded the corpse, and paid the last tribute of respect to the child of one of their brother members.

Queen Isabella has been summoned by her Parisian butcher and other tradesmen for non-payment of bills. Her Majesty's defence is that she contracted with her cook to supply the royal table at 12 francs a day per head, exclusive of wine. The Court has taken a week to consider whether the ex-Queen of Spain shall be put on oath to answer the evidence given on these domestic particulars.

# SUPPLEMENT TO THE RIPONSHIRE ADVOCATE.

BEAUFORT, SATURDAY, OCTOBER 24, 1874.

## Stray Shots.

Sir James McCulloch is bidding for office. He sees that when Mr. Francis leaves for England, the present Ministry will lose the support which his high personal character, and acknowledged abilities gave to his party, and that it will not be a very difficult matter for him to drive them from the Treasury benches, and install himself there once more. After being the champion of protection, he has at last gone over to the free traders. So astute a politician cannot fail to foresee the change that is coming on, and that the protection game is nearly played out. The beginning of the end is approaching, and Sir James is off with his old love and on with his new; it is the way of the world. Politics is said to be a system of compromises, and I suppose on that principle he is right, but still for an on-looker it appears like an attack on the Treasury benches for office alone. Is it pay or power? Should he succeed, one would think Mr. Service will feel rather mean in having sacrificed his free trade opinions for the emoluments of office for so brief a period.

By the way, the Honorable Mr. Vale has not played his cards badly. It was said he was going home to study for the Bar, and if so he will be able to do so still, and the colony will be paying for the hon. gentleman's studies, while giving him a salary as secretary to the Agent-General. As a gentleman said the other day; politics seem the best game going just now.

Will the Upper House pass the clause in the Local Government Bill taxing all land according to their intrinsic value, and not for the uses they are put to? This is what has been long wanted, and should it become law we may expect to see thousands of acres now used for merely running sheep on, put under cultivation and producing wheat and other cereals. The success of the measure will depend on the way in which the Shire Councils carry it out, and if there is any shilly-shallying on their part, I hope their constituencies will by prompt and vigorous action show them that "the voice of the people" is still the "voice of a god."

For pure and unmitigated narrow-mindedness and bigotry commend me to "Fides" letter in Wednesday's *Argus*. At the very mention of Mr. Robertson's having obtained the right to publish in this colony, "Super-natural Religion," he is so very terrified that he would if he could get the Government to step in and prohibit its publication. What are people of this class afraid of? If the tenets they profess are true, and founded on Divine inspiration what harm can the most searching investigation do them. They will come out of the ordeal of criticism like gold purified. If they are false let them be swept away. The work in question, as far as I can learn from the notices that have appeared in the papers, is an attempt not to overthrow Christianity, but to establish it on a sure foundation, and by stripping it of the dogmas and doctrines which it has been the policy of various churches to envelope it, exhibit it to the world not as at present the type more of terror than love, but as it was taught by the Great Teacher in all its pristine purity and beauty.

How much will the Government lose by not building the goods' shed sooner? Every day teams loaded with wool pass through the township on their way to the seaboard, and before the good shed is finished, revenue to the amount of two good sheds will have been lost. This is a penny wise and pound foolish proceeding.

It would appear that Fiji was not annexed a moment too soon, for if we are to believe the Sydney papers, that crafty and ambitious chief Maafu intended attacking Cuaou, and from his character and antecedents,

there is but little doubt he would have been successful, and reduced all Fiji to his sway; and then I fancy some of the whites would have found it necessary to make tracks.

What will be Russia's next move. She has signally failed in her war congress, and she does not seem altogether on the drinking terms with Germany, in spite of the friendship of the rulers. Should there be a blow up between the two powers, would it not be good for Europe and especially for England? At present they are both a menace and a terror to the world, and a war between them would relieve Europe from the incubus under which she is now laboring, by so crippling them that they would come out powerless for harm for some time after.

How was it that greater publicity was not given to the Good Templars' concert and tea meeting. Few, except the initiated, knew anything about it until it was over. There were a few bills printed in Ballarat distributed among the "chosen few," which were all the efforts made to ensure success, if we were to except the rather unusual proceeding of announcing it from the pulpit, that I am informed was done by one clergyman. I've heard of a new way to pay old debts, but this is I think the first time the church has been converted into an advertising medium. Well, perhaps, it is a step in the right direction, the throwing off of sectarian and other prejudices and the precursor of more liberal views. We may yet have theatrical, racing, boating, athletic games, and other amusements, published from the pulpit, and thus induce many to go to learn the news and what's going to take place that would not go there otherwise.

I must mention another anecdote about Judge Williams. It appears there was a man being tried for some offence in the Western District, and an old Irishwoman, as witness for the defence, was asked if she had ever seen the prisoner before. Looking steadily at the Judge (Williams) she turned to the learned counsel, and said, "No sir, I never laid my eyes on him before, so help me G—d."

AUNT SALLY.

## Blind Pupils' Concert.

According to an announcement in a former issue, the concert in aid of the building fund of the Victoria Blind Asylum, took place last evening, in the Society's Hall. The performance was held under the patronage of the Shire Council and the local clergy. The attendance was very good and the performance was highly appreciated by the audience as encores were often demanded. The entertainment which consisted of songs, glee, and selections on the pianoforte was got through very creditably. The band, who on their arrival played a selection for those who were on the railway platform, also played some selections during the evening, and were well applauded. On the stage one of the pupils was engaged in illustrating the art of basket making, which is taught in the institution. There was exhibited some good specimens of work which have been executed by the pupils, the work consisted, chiefly of mats made from wool, and baskets. The auction held by Mr. Strongs, however, was not quite so successful as it certainly ought to have been; but we observed that a basket of extremely good workmanship that was made on the stage in the course of the evening, brought the sum of 5s. 6d. The lateness of the hour when the entertainment closed, and pressure on our space places it out of our power to give as complete a detailed report as the entertainment deserves, or as we should have wished; but it is necessary to particularly mention the opening piece, the glee "Hail Smiling Morn'" likewise a most spirited rendering of "Standard Bearer," by the band; the quartette performance on two pianos; the pianoforte performance of a young girl probably not more than nine or ten years old; also a comic song "The Irish Policeman," the song and music both composed by the per-

former, and which was encored. A duet "Come o'er the Moonlit Sea," likewise "Beautiful Venice," All these, and many more, were performed in a manner that reflects the highest credit on the performers, and certainly praise for which we have no words is due to the teacher, Mr. Greenwood. How he has accomplished his work is to us a profound mystery. The entertainment closed by singing "The National Anthem." Before the departure of the visitors some specimens of perforated paper such as is used for the blind pupils to read from was distributed through the room. The blind asylum at present contains 92 of different sexes who are educated in reading, writing, music, and also the manufacturing of wool mats, basket work etc. The asylum is now so full of inmates that it has been considered advisable to erect another wing. The workshops, which have just been completed, costing £1300, of which £600 remains a debt on the institution, and it is for the purpose of reducing this debt that the concerts are being given throughout the colony.

## The New Charlton Company.

The half-yearly meeting of shareholders was held on Saturday evening last at the free library, Clunes. Mr. John Salkeld in the chair. 740 shares were represented. The directors' report was as follows:—We have the honor at this, your second half-yearly meeting, to remind you that at the time of our appointment the mine works were confined to prospecting from No 1 rise to jump up for continuation of the ground for which the claim was primarily taken up. Although not immediately successful, we are still satisfied there is a run of deep ground away from the flat and towards the hill side of the shaft. This is evidenced by the character of the dredge got from a dip in the shaft in the direction of the present flow of water, being very different from any obtained in the other portion of these workings, and its similarity to that now being produced. This view is also supported by the statement of miners heretofore acquainted with the ground immediately above our claim, that they traced a run of deep ground trending in this direction. In the event of such ultimately being established it will prove that the company has three distinct leads running through its claim. Believing, however, that delay was becoming serious, tenders were called for driving a main level direct to the known auriferous country, and a contract was entered into at 9s. per foot, this rate, however, was not maintained, as the ground altered in character. In accordance with your authority, we went to the extent of the limit in making calls, and also exercised the power of making three extraordinary calls of 4s. per share. And we have to congratulate you in the fact that heavy as these demands were, viz—£7 per month per original share, excepting upon two and a-half shares, every call has been promptly met. A first-class puddling machine has been erected after the plans of Mr. H. G. Bennett, a shareholder, (who gratuitously gave the company his services), that is proving thoroughly efficient. We have found it rather unexpectedly necessary to have certain repairs done to the cylinder of the engine, this has been effectually attended to, and is satisfactorily reported upon by the present mining manager. During the past six months your former mining manager resigned, and Mr. Charles Austin was appointed in his stead, who has duly carried out instructions up to the present time. We refer you more particularly to his mining report. We regret that owing to the costly work of having to put in a main drive 461 feet, that expenses of working the mine, in comparison with the results, are somewhat heavy. We, however, believe that the excellent character of the washdirt now being taken out, will ultimately compensate for the outlay. There is a considerable quantity of ground now opened up and when blocking out is commenced this we are assured will give splendid yields. A continuation of the main drive is now let on contract at 7s. 6d. per foot, this will further open up a large area of paying dirt. The upper portion of the tributary has yet to be followed and is expected to yield additionally profitable ground. Upon financial matters we refer you to the accompanied balance sheet which has been duly certified to by the auditors. The receipts for calls have been £1380 15s.; gold, £110 15s. 6d. The total mine charges amount to £1168 6s. 1d.; general management, £121 18s.; plant

account, £115 17s. 8d.; sundries, £76 15s. 6d. The present liabilities of the company are, as set forth, £1502 17s. 6d. which though large we have confident expectations of very soon discharging, and becoming a dividend paying company.

The statement of receipts and expenditure for the past six months was also read. Mr. Pinner made a verbal report in support of the certification by himself and co-auditor as to the satisfactory state of the company's accounts as kept by the legal manager, Mr. Hiecock. A slight discussion ensued and upon certain explanatory details having been given, the report and balance sheet were received and adopted.

The mining manager reported as follows:—Since I took charge of your mine, the reef drive has been extended 253 feet in a hard country, making a total distance of 463 feet from shaft, and in that distance I have put up seven bores, as shown on plan, No 1, to No 3, and No 4 bores, were in reefs, No 5 broke through into wash at 20 feet, No 6 at 16 feet, and No 7 at 13 feet from back of main drive, being 461 feet from shaft, the rise or jump is up 20 feet, and opened out into washdirt. East and west—The east drive is opened out 9 feet above back of main level, and driven 41 feet, when the washdirt dipped away very suddenly 5 feet below the level of washdirt drive. The drive going west has been driven 51 feet and met with high reef, the distances at which the crosscuts have reefed are shown on plan. We have washed three machines of dirt, two of which produced 22oz. 14dwt. of gold. The last did not come up to same average, being extensively mixed with reef. A reef drive from the main level has been started to cut the ground, as shown on plan, and estimate the distance at 70 or 80 feet. Your machinery has been put in a state of good repair by Mr. David Milne, of Clunes, and is now in first-class order. Since the repairs have been made I find a considerable difference in the consumption of firewood, I should say fully one fourth less, although the engine has now extra work in driving puddling machine. The mine is well ventilated by water jet. The pumps are in good order and all the machinery working well.

Election of directors for the ensuing six months. The manager stated that Messrs. Nightingale and Fryer retired by effluxion of time. After the nomination of several shareholders, the retiring directors were re-elected. Moved by Mr. Chambers and carried—That on future occasions reasonable facilities be given to shareholders working on the claim to attend the meetings of the company. Mr. Herbertson moved, and Mr. Pierce seconded—That a works committee be appointed, to consist of three of the shareholders working on the claim, to confer with the manager as to the best method of working the ground, and upon any other emergency that may arise; and that power be given to the directors to appoint such committee. Mr. P. Wallace moved, as an amendment—That it is inexpedient to hamper the control of the manager, and that no sub-authority be delegated. A rather warm discussion ensued, during which Mr. Downie, acting under instruction from the mining manager, handed to the chairman that officer's resignation. It was resolved that the voting be taken by a show of hands. The result was—For the amendment 14; for the motion 11; and the motion was declared to be lost. Messrs. Collins and Pinner, the late acting auditors, were re-elected.

A vote of thanks to the past directors was carried unanimously, and the meeting closed.

At a subsequent meeting of the board the resignation of Mr. Charles Austin as mining manager of the company was accepted, and correspondence was ordered to be opened with a former applicant for the office. The directors unanimously agreed that although there were differences of opinion as to the mining manager's plan of working the mine, they were assured that Mr. Austin had always most conscientiously acted to the best of his ability for the interests of the company and given more than could reasonably be expected towards the performance of his duty.—*Clunes Guardian*.

SKIPTON.—Impounded at Skipton.—Black mare, star, stripe, and snip  $\nabla$  off shoulder; white or grey mare, MS near shoulder, JH near thigh. By F. Beggs, jun., Esq., bay mare, star, near fore and off hind leg white square tail, shod, JH off shoulder. If not claimed and expenses paid, to be sold on 21st October.—John Daly, poundkeeper.

Printed and published by HENRY BANKS for the Proprietors of the *Riponshire Advocate*, at the office, Neill street, Beaufort, county of Ripon, colony of Victoria.

GOLDEN LAKE COMPANY, WATERLOO FLAT.

An extraordinary meeting of this company was held at the Eldorado hotel, Smythesdale, on the 24th October; Mr. J. D. Williamson in the chair. There were seventy-four shareholders present.

THE PALMER DIGGINGS.

A letter from the Palmer correspondent of the Cooktown Courier contains the following respecting the state of affairs on this goldfield.—At Pine Creek the blacks made a reconnaissance in force recently, and commenced spearing horses in every direction.

The statement that Nana Sahib is still alive, and that he has been captured at Gwalior, will, says the Age, cause considerable excitement all over the world, and especially among all who remember the part which the prisoner played during the Indian Mutiny.

A novel application of photography is described by an Italian correspondent of the Philadelphia Photographer. He had some fruit trees that needed pruning, and there was no one in the neighborhood who could attend to the work in season.

A story of brigandage in the United States is told by the Philadelphia correspondent of the Times. On the afternoon of the 1st of July, two boys, aged seven and four years respectively, were stolen from their home in the northern portion of that city by two men, who drove off with them in a light waggon.

The following are the opening sentences of an address on "Woman's Rights" by Mrs. Mose Skimmer.—Miss President, fellow woman, and male trash generally, I am here to-day for the purpose of discussing woman's rights, recounting her wrongs, and accusing the men. I believe sexes were created perfectly equal, with the woman a little more equal than the man.

The vast increase in the returns with every extension recently made has placed A.C. as the largest buyer of Drapery and Boots, &c., in the Melbourne markets, and as a matter of course, having a corresponding outlet, enables him from the very extent of his purchases to secure goods at such extraordinary low prices, as none but a large buyer can command—this fact must be patent to all.

The mails for Anant, Shirley, Melbourne, Ballarat, Geelong, Bundage, Traralgon, and Barmbean are despatched twice daily.

While walking at Sassy, Mr. Victor Hugo, preoccupied with a poetic reverie was struck in the forehead with the end of an enormous beam, the shock of which knocked him down.
