

Society a lot of money, and unfortunately they had none to spare. Mr. Canning thought the money would be very well spent, and the society might give prizes of 15s, 10s, and 5s. The President said it would do no good this year, as the eggs had all gone. Mr. Dunnett knew that many boys would be gathering eggs, and Mr. Austin promised to offer prizes of 1l and 10s for the largest number of sparrow eggs, to be given in 1895. The class was then adopted. The prize-list, as revised, was then adopted on the motion of Mr. McDonald, seconded by Mr. Kelly. Mr. Dunnett asked for second prizes to be given in the longwold sections for sheep, as the farmers could not compete against Ballarat. The President, who pointed out that the Stockyard Hill sheep were good enough to compete anywhere, said the prize-list having been adopted it was too late to make any alterations. A number of gentlemen were appointed as judges and stewards, and the secretary was instructed to obtain their consent to act. The meeting terminated with a vote of thanks to the chair.

RIFLE SHOOTING.

The following are the scores made by members of the Beaufort Rifle Club in the 17th competition for "The Austin Trophies":

Table with 2 columns: Name and Score. Includes J. McKeich (35), F. Kendall (28), A. Allison (32), T. A. Richard (30), E. Jaensch (16), F. Troy (26), A. Wilson (14), C. Tromp (30), J. Kilbeg (8).

GAZETTE NOTICES.

The renewal for the following licenses for land in State forests had been approved: Section 87-A, Wilkinson, 3a, Raglan West, (sawmill), Section 123-A, Dunn, 41 a, Raglan; T. C. Tucker, 2800 a, Mount Cole; E. McLeod's license for 1000 a, Mount Cole State Forest, has been abandoned. Tenders are invited for the right to graze on 1000 a, Mount Cole State Forest, formerly held by E. McLeod. Twelve months ago on Wednesday Mr. Patterson proclaimed the policy of the Government at Castlemeane. Curiously enough, the Premier was speaking again on Wednesday at the neighboring constituency of Maldon, at the banquet given to Mr. McIntyre. Referring to the coincidence, he said he had no desire to vary the policy he laid down on the former occasion. His speech was of a general character, though particular stress was laid upon the land question, which he said the Government regarded as one of the utmost importance in bringing about a revival of prosperity. He referred to the efforts the Government was making to encourage industries, and said these would be of a liberal character. "We have never applied ourselves to the proper multiplication of the products of this country until now," the Premier remarked with emphasis. He said a word or two in favor of federation, the necessity of which was particularly apparent in times of financial trouble. Alluding incidentally to the presence of the new Russian consul, he offered him a hearty welcome on behalf of the people of the colony, and wished to claim any concurrence on the part of the Government with many misconceived and idle notions, he said, had been entertained regarding the appointment of Signor Pontata. It was explicitly stated in Parliament when the municipal endowment was increased from £360,000 to £450,000 that this augmentation of State aid was to take the place of special grants. But it is one thing to lay down conditions and quite another to enforce them. Successive Governments soon found out to their cost that the claims for special grants continued to be pressed with unabated vigor, and being backed up by strong political pressure, Ministers found it most difficult and in some cases impossible to resist the importunities of their supporters. The Commissioner of Public Works on Wednesday took advantage of the opportunity afforded by an appeal for a special grant to assist in constructing a bridge over the Sheepshead Creek in the Moira riding, to state that it was exceedingly improbable that in existing circumstances the Government would be able to continue special grants. If, however, the Minister decided to do so, the request of the deputation would receive the favorable consideration. A young man named Munro, employed as a blacksmith at Mirboo North, when about to go to bed was attacked by a tiger snake, which fastened on his hand so that he had to put his foot on its tail and literally drag the reptile off. He was at once taken to a medical man, and apparently the remedial measures taken proved effective. The magistrates of Warragul appear to be the first to discover what a brutal offence the crime of wife-beating is, and further, to mete out the punishment due to it. A man named John Byrne was sentenced to three months' imprisonment, with a week's "solitary," for savagely assaulting his unfortunate wife. The former action of the Speight v. Syme libel case is expected to enter upon a new stage on Monday next, when his Honor Mr. Justice Hodges takes his seat upon the bench.

WORN-OUT WHEAT FIELDS.

In order to restore the worn-out wheat growing lands of the older settled districts of the colony, and prevent the spread of "take-all" and other diseases which are the result of continuous cropping, attention must be directed to such nitrogenous crop rotations as the green manuring, recently alluded to in the press. Another valuable rotation with wheat is linseed. While the growth of flax for fibre is only suitable to select localities and requires considerable attention both in growth and preparation for market, the simpler form of flax culture for linseed is generally applicable in any part of the colony, and should not be neglected, especially in connection with wheat growing. Grown in alternation with wheat, the effects are strikingly beneficial. One reason for this is doubtless the fact that a crop of linseed takes up a different set of soil constituents for its nourishment, so that which cereals require; but the principal reason is so far as to say that the effects upon a following crop of wheat would suggest that linseed exercises a positively fertilizing influence. This effect is well known to the wheat growers of South Australia, who for many years have resorted most successfully to the expedient of growing a crop of linseed as a rotation with wheat. "We can always depend upon a good crop of wheat after linseed," a South Australian farmer remarked to the Leader agricultural reporter during a visit to the wheat growing areas of that colony, and the remark induced a Victorian wheat grower to try an experiment on a portion of his wheat land which had become "grain sick." This farmer had observed that on the northern districts of Victoria a species of dwarf flax grows wild among the grass on the unbroken lands, and his experiment has proved that the crop is one that is peculiarly suitable to the districts north of the Dividing Range, so far as the production of linseed is concerned, although probably the length of stem required for a crop of fibre needs for its production either irrigation or heavier rainfall of the localities near the coast. If sown early in autumn, at the rate of about a bushel of seed to the acre, it is ready for harvesting in October, before the hay or grain harvest sets in, and it stands the heat better than either oats or wheat. An ordinary yield is from 15 to 20 bushels per acre, and it can be harvested and thrashed in the same manner as wheat. Probably it could be harvested with the stripper, although so far we have no advice as to any actual experiments of this kind. Taking into account the value of linseed as a food that is in great demand in connection with the rapidly expanding dairy industry, together with its adaptability and advantages in dry districts as a rotation with wheat, its growth can be recommended to a share of attention on the part of wheat growers whose land is indicating signs of exhaustion and disease as results of continuous cropping. Health authorities in Germany find that the refuse left after extracting the oil from peanuts contains four times the nutritive matter of wheat and rye flours. Have used mixtures of peanuts and of peanut refuse with rye flour for making a very nutritious bread. The Berlin correspondent of the "Daily Telegraph" states that the Russian Government has guaranteed the security of the British India frontier, and that the dispute between England and Russia with respect to Russia's claims on the Pamir table lands is settled. Seeing the extremely liberal character of the matrimonial advertisements which are published in the newspapers, setting how clergy men may be obtained to tie people in wedlock at any time of the day or night and in any surroundings, it seems a little hypercritical to object, even to a publican performing the duties of a registrar in this connection. However, a complaint has been made to the Chief Secretary's department that an hotelkeeper has been appointed a registrar of marriages at Bendigo, and if the charge can be substantiated, he is to be called upon to staidly, he is to be called upon to surrender his privileges. The Chief Secretary has referred the matter to Mr. Hyatt, the Registrar-General for investigation. The public reception of Prince Bismarck, who visited Berlin on Friday, 26th ult., in response to a request by the Emperor William, was one of the most enthusiastic characters. On the Prince's arrival in the city immense crowds assembled to welcome him, who manifested their feelings in the most unmistakable manner. The distinguished visitor was greeted with frantic cheers, and flowers were showered upon him from every quarter. The Emperor William received his guest with unusual distinction, warmly embracing and kissing the veteran statesman. Both the Emperor and the ex-chancellor were visibly affected by the meeting. Afterwards Prince Bismarck had lunch with the Emperor and Empress, no one else being present. On Friday evening Prince Bismarck was entertained at a banquet by the Emperor William. In consequence of the feeble state of his health he left Berlin at night for his residence, Friedrichsruhe. The Emperor escorted the Prince to the railway station, repeatedly kissing him in the presence of the multitude. At the station immense crowds were again assembled, and the Prince was greeted with the same wild enthusiasm as on his arrival in the morning. Prior to his departure Prince Bismarck paid a visit to the Empress Frederick. The reconciliation between the Emperor William and the ex-chancellor greatly delighted the public of Berlin, and the Emperor William on returning from the station had quite an ovation from the populace. It is, however, fully recognized that there is no chance of Prince Bismarck's return to power.

THE BUTTER INDUSTRY.

The following, which we take from the Talbot Leader, will prove of great interest to our readers, and will undoubtedly be carefully read. About 18 months ago, when the idea of establishing a butter factory at Talbot was mooted, many were the conjectures as to what would be the result of the efforts then being put forth. In connection with that movement, as well as with nearly every other movement set on foot for the advancement of our town and district, there were croakers in galore who predicted failure, if started. Others again croaked out "They'll never get it started." They won't be able to get the shares off, or if they do they won't be able to get milk enough to make it pay; whilst some went so far as to insinuate that this district was not suited for dairying purposes, and that consequently the butter would be of inferior quality, forgetting that the hand-made farm butter of Talbot always commanded the highest price in the open market at Maryborough. And so effectively did the croakers croak that at one time it seemed as if they would croak the movement to death, so much cold water did they throw upon it. However, we are pleased to be able to chronicle the fact that they did not succeed, and that the Talbot District Butter and Cheese Factory Company has entered the list of dividend paying companies in our districts. At the second half-yearly meeting of shareholders held at the Borough Hall, on Wednesday afternoon last, the directors had a very satisfactory report and a balance sheet to present to the shareholders, which among other things, contained the gratifying intelligence that on and after the 1st February next, a dividend of 5 per cent. on the paid up capital would be payable to shareholders. This is highly creditable to the management, and is, we believe, unprecedented in the history of colonial butter factories, to cover all working, preliminary, and incidental expenses, and be able to declare a dividend out of the first year's operations. The benefit to our town of the factory is very great—£160 every fortnight is paid to the milk suppliers, and so the money is continually put into circulation, and every one is directly or indirectly the better for it. By this means Talbot is made more and more what it ought to be, the commercial centre of the district, and in proportion as the factory's operations extend so will the benefits. The first half year's operations were attended with a loss of £25, but the second brought a profit of £163, and £200 in calls to come in. Such a satisfactory state of affairs speaks volumes for the management, and is a good augury for the future success of the company. The manager's report showed that the milk purchased for the first half-year amounted to 29,847 gallons, and for the second (from 28th October to 25th November) more milk was purchased than for the previous six months—30,906 gallons, and a total for the second half year of 112,569 gallons. From this water was manufactured and sold in the colony 12,634 lb.; exported through Barham and Son, 33,264 lb.; excess in cases (export), 594 cases, 1 lb. per case, 297 lb.; butter and cream on hand 31st December, 1562 lb.; total 47,747 lb. (less amount unsold 13th April 1894, 850 lb.); total manufactured from milk received, 47,497 lb. Average quantity of milk per pound of butter made, 2.37 gallons. The directors pointed out that there were still a number of improvements to be made at the factory, which, when complete, would make it still more successful and that money would be required for that; also that it was contemplated starting next season creameries in several of the outlying districts, and with a view to providing the necessary money, the idea was mooted of placing some of the unallotted shares. Out of the 3000 shares in the company, only 1200 having been allotted, and the balance are available for those desirous of purchasing them, and the proceeds can be utilised in extending the company's operations. It may not be out of place to mention here that it is mainly due to the exertions of several gentlemen that the project did not die in its initial stage. When there was great discussion as to whether it should be a creamery or a factory or affiliated with a Melbourne company, or a locally managed concern, Mr. John Beveridge, of Glegow, came to the rescue; then when the shares seemed to flag, and the farmers seemed indifferent, Messrs J. H. Jessup, B. W. Salmon and others took up the work and succeeded in placing a sufficient number of shares to warrant a start being made, and with careful management by the directors things have progressed until now the Butter Factory is established on a firm basis, and we predict for it a long and prosperous career.

As a special favor to the breeders of stock, it is announced by the Railway Commissioners that broad gauges, stations, &c., travelling for stud purposes between July and January will be carried one way at ordinary rates, but on return will be conveyed free if notice of return is given when the outward journey is made. No charge is to be made for foals at mares' feet. Grooms with ponies attending these animals will be carried at ordinary fare one way and free the other. Journeys may be broken either way. Holloway's Ointment and Pills. A frequent case of gonorrhoea and the inflammation of the blood, attended with bad digestion and general debility. A few doses of the Pills taken in time are an effective preventive against gonorrhoea and rheumatism. Anyone who has an attack of either should use Holloway's Pills and Ointment also, the operation of which combined with the power of the Pills, most infallibly effect a cure. These Pills act directly on the blood, which they purify and improve. A few doses of the Pills taken in time are an effective preventive against gonorrhoea and rheumatism. Anyone who has an attack of either should use Holloway's Pills and Ointment also, the operation of which combined with the power of the Pills, most infallibly effect a cure. These Pills act directly on the blood, which they purify and improve. A few doses of the Pills taken in time are an effective preventive against gonorrhoea and rheumatism. Anyone who has an attack of either should use Holloway's Pills and Ointment also, the operation of which combined with the power of the Pills, most infallibly effect a cure. Borrowers are requested to place themselves in direct communication, when any information required will be furnished. All communications treated strictly confidential.

## GEELONG WOOL SALES

SEASON 1893-1894.

## GEORGE HAGUE & CO.

WILL hold Weekly Wool Sales as usual every Friday during the coming season. They would call special attention to their  
**EXTENSIVE WAREHOUSES**, built expressly for the storage of Wool, splendidly lighted, and unequalled in the Colony for the proper display of Wool. Railway and shipping right at the doors.  
**FARMERS' CLIPS** receive special personal attention, and no lot, however small, is sold under fullest market value.  
A LARGER LOCAL CONSUMPTION of Wool than any other market in the Australian Colonies.

**CHARGES**—The lowest ruling in the Colony.  
ACCOUNT SALES and Proceeds rendered invariably three days after sale.  
ACT STRICTLY as Selling Brokers only. TWENTY-NINE YEARS practical English, Continental, and Colonial experience of the Wool trade.  
CASH ADVANCES, if required, directly on receipt of produce into store.

Auction Sales of Sheepskins, Hides, and Tallow held weekly throughout the year.  
WAT-BILL FORMS supplied free.  
GEORGE HAGUE & CO., Wool Brokers.  
Geelong, 1st July, 1893.

Late letters for places beyond Australia are charged 3d. extra postage at Melbourne G.P.O. to 2.45 and up to 4.25 at Spencer-street Station.

Send along your subscriptions to THE RIPONSHIRE ADVOCATE, 2/6 per quarter in the rate. You will get good value for your money and don't you forget it!
BLOOD.—The Editor of the Family Doctor says:—We have seen hosts of letters in which the writers acknowledge the benefit they have received from Clarke's wonderful Blood Mixture, which as a curative agent cannot be too highly estimated since it cleanses and clears the blood from all impurities. If the blood is diseased the body is diseased. Clarke's Blood Mixture is a medicine of the greatest possible value, and it is certainly the finest blood purifier that science and skill have brought to light. We can with the utmost confidence recommend it to our subscribers and the public generally.
—The Family Doctor 16th July 1892.
For Scrofula, Scurvy, Eczema, Skin and Blood Diseases and Sore of all kinds it is a never-failing and permanent cure. It is the only specific for Gout and Rheumatic Pains, for it removes the cause from the blood and the bones. Of Chloric Acid, every bottle at 2s. 6d. and 1s. per bottle. Thousands of testimonials from all parts

PRACTICAL JOTTINGS.

BY THOMAS LANG & CO.,

Nurserymen and Seedsmen, 435 Bourke Street, Melbourne, who supply all garden and farm requisites.
CALENDAR OF OPERATIONS FOR FEBRUARY.
Hot and dry, there is little to be done in gardening, unless water is available, in the way of putting in new crops. Nature, assisted by intelligent industry, has given us a welcome and bountiful harvest, while lucious fruits of exquisite flavour are rendered even more palatable and refreshing by the hot, dry, smoky atmosphere. Apples, Brambles, Figs, Grapes, Lemons, Mulberries, Nectarines, Peaches, Pears, and Plums, all lend their aid as food and drink for the nourishment and pleasures of man, and more than repay the time, trouble, and expense of establishing them in our gardens.

Beans, French.—Sow 2 inches deep, rows 2 feet 6 inches and plants 3 feet apart. Soak the seed for 12 hours in water before sowing. Cover the seed with one inch of soil and 1 inch of the round droppings of a horse. See that the ground is well soaked before seed is put in. 1 lb. sows row 80 feet.
Beet, Silver.—Sow seed 1/2 inch deep in rows 2 feet 6 inches apart, sow thickly for sprouting, for large plants thin out to 6 inches. 1 oz sows row 60 feet.
Transplant seedlings when about 6 inches high of lettuce, broccoli, brassica sprouts, cauliflowers and savoy. Lettuce grow well manured and well watered before transplanting. Give plants plenty of room, 2 feet every way.
Sow successive sowings of cabbage and cauliflower, sowing seed broadcast 1-8th of an inch deep and covering with a mulch of 1 inch thickness of the round droppings of a horse. 1 oz sows a bed 4 feet by 20 feet. Keep plants growing by watering and water twice a week with fat water. Boil 1 lb coal tar in 2 gallons rain water, and when boiling dilute with 100 gallons water.
Carrots.—Sow seed 1-8th of an inch deep in rows 1 foot and plants 4 inches apart. 1 oz sows row 150 feet. Sow a few seeds of radish with carrot to mark the rows where the carrots will come later. Ground should have manure thoroughly mixed or the roots will fork.
Cress.—Sow seed 1-8th of an inch deep broadcast. 1 oz sows bed 4 feet square. Water the ground well.
Endive.—Sow 1-8th of an inch deep allowing 1 foot between the rows and plants.

Hardy flower seeds may now freely sown where strong healthy plants are wanted. Care must be taken to keep the ground regularly moist by shading the ground with a piece of calico oressian. In hot weather watering is sometimes required twice a day. See that the ground is kept moist but not sopping.
How to sow flower seeds.—The soil must be suitable for flower seeds is a light friable loam, containing a moderate amount of decayed vegetable matter, or well-rotted horse or cow manure, about one-third, ground enough to render it porous. This sort of soil, although the best, is not absolutely necessary; they will thrive well in any good garden soil.
The most usual mistake made by amateurs is sowing the seed too deep. As a rule, the larger the seed the greater the depth.
Seeds this size O should be sown 1/2 of an inch.
Seeds this size O 1/2 inch.
And seeds smaller should just be dusted with a little fine soil. The very smallest seeds, like Calceolaria, should be sown in pots; level the surface and sow the seeds on that surface, then place over the seed a piece of clean blotting paper, which should be kept moist. When the seeds grow, very fine soil may be dusted round the stem, care being taken not to cover the plant. Transplant when one or two inches high.
Seeds should be kept always moist, but never allow the soil to get sopping.
It is better to sow small seeds in boxes, sheltered from the weather, and transplant when large enough to handle. If small seeds are sown in the open ground, they should be sheltered from heavy rain, which buries the seed too deeply in the ground. They should also be carefully watered, as seeds often germinate and then, not being supplied with moisture, die off before the roots get a sufficient hold of the ground, to enable the plants to get a good start.
The following are useful, hardy, and beautiful flowers, suitable for the present sowing:—Aconitum, Anemone, Antirrhinum, Auricula, Calliopsis, Campanula, Centaurea, Chrysanthemum (annual), Collinsia, Convolvulus, Dianthus, Fuchsia, Gladiolus, Gaillardia, Gilia, Godetia, Gomphrena, Candytuft, Ipomopsis, Sweet Pea, Larkspur, Linaria, Linum, Lobelia, Lupinus, Nicotiana, Pansy, Phlox, Poppy, Mignonette, Rhodanthus, Stocks, Wallflowers, etc.

K-hl Rabi.—Transplant seedlings, allowing 18 inches between rows, and 12 inches between plants. Sow seed 1 inch deep broadcast. 1 oz sows bed 4 feet by 20 feet. A really good vegetable.
Lettuce.—Sow seed 1/2 inch deep, a few seeds every foot. Let ground be well manured and kept watered.
Onion.—Sow a few for salad, broadcast 1/2 of an inch deep.
Onion Trees.—Sow the bulbs produced on the upper tier 1 inch deep, in rows 1 foot and plants 6 inches apart. The advantage of these onions is their early maturity. Litter on a second tier of onions is produced, about the size of peas; sow these about 1/2 inch deep thickly in rows, and they quickly produce onions fit for salads, quicker and better than the ordinary onions from seed.
Peas.—Sow where water is available, 1 inch deep, in rows 4 feet, plants 6 inch apart. 1 lb sows row 80 feet. Put in a seed every 2 inches apart.
Spinage.—Sow a few in rich ground 1/2 inch deep, rows 1 foot and plants 6 inch apart.

Vegetable marrow.—Sow a few seeds in very rich ground in hills 9 feet apart. Water freely. These plants will produce a nice crop of young marrow which should be cut up as soon as they are large enough. Do not wait for marrow to ripen, cut when the seeds below tender.
Bulbs that have died down may be lifted and stored.
Chrysanthemums should be freely watered.
Fertile fruits can and should be preserved in every case, either in the form of jams or the more modern form of canning, either without sugar or just sufficient to sweeten the fruit when used.
Jams should be made of fruit freed from stalks and when possible from the stones. To get jam or jelly a good colour, boil the fruit gently for an hour, then add the

USEFUL HINTS.

TO WASH CLOTHES IN PARAFFIN SOAP.—Cut down 1 lb. paraffin soap and put it into a boiler of water to melt. Rub the clothes well with the soda water, in which they have been previously soaked, put them into the boiling water, and let them boil for half an hour, then put them into a tub with plenty of cold water; wash them thoroughly, then rinse in blue water and dry.
TO CLEAN EMBROIDERY.—Gold and silver fancy-work of this description may be most easily cleaned with spirits of wine, either cold or diluted with an equal weight of water. The common error of using alkaline or acidulous liquors is very injurious, and frequently destroys the beauty of the articles, instead of cleaning them.
TO RESTORE SCORCHED LINEN.—Ingredients: Two ounces, 3oz. white soap, 2oz. of fuller's earth, half a pint of vinegar. Melt: Extract the juice of the onions by pounding and pressing them; cut up the soap and fuller's earth, and boil all together. When cool, cover the scorched linen with this mixture, and let it dry. Wash the linen, and the scorching will disappear, if not so bad as to damage the texture.

TO CLEAN DECAYED LENSES AND GLASSES.—The best way is to wash them out with a little beer and warm water, and then with two or three fresh sponges, if necessary. To facilitate the action of the fluids against the sides of the glass, a few small cinders or pieces of raw potato may be used. A spoonful of the strong oil of vitriol put into a dry bottle will, if allowed to run round its inner surface, rapidly remove any kind of dirt. It should then be drained, and afterwards rinsed with clean water. Where they have become furred by holding hard water, a little hydro-chloric acid (spirit of salts) diluted with three times its weight of water will remove it.
TO WASH CLOTHES WITH PARAFFIN OIL.—To every eight ounces of water put 1/2 lb. of soap, scrub fine, one and a half teaspoonful of paraffin oil, into a boiler, put the clothes, let them come to the boil, keep the lid close on boiler, and steam for half an hour, take out each article separately, and wring them out. When all are finished, hang them out to dry. If possible, bleach your clothes on grass after boiling; but where this cannot be done, it is very possible with care to keep your linen white and clear. Laces and muslin should not be rubbed, but squeezed with the hands in melted soap and warm water. Be careful, in boiling them, to tie them up in a handkerchief to prevent their being torn.
PLANO KEYS.—These can be whitened by washing in a solution composed of 1oz. of nitric acid to 10oz. of soft water. Apply with a brush till the acid does not flow on the wood part upon which the ivory is veneered, for the joint will be spoiled. Cleanse carefully with clean water and a piece of flannel. Or, sulphurous acid with an equal quantity of water may be used as above. If the acid does not remove the dirt, rub the keys carefully with pure lemon juice. While still damp, put on a coating of whiting or prepared chalk, mixed with a little lemon juice. When dry, brush off with a dry brush, and wash with clean water. When all are finished, rub between the keys. If, however, the keys are thoroughly worn and discoloured, they must be dismounted, scraped, bleached, and repolished, which is a long and tedious affair, and requires to be done by a skilled workman.

TO CLEAN BRUSSEL CARPETS.—Brussels carpets may be cleaned in the following manner:—First, stretch the carpet tightly on the floor, nail it at the sides, and sweep it clean. Procure an ox gall from a butcher, and mix it with cold water only. Have another pail with a pint of cold water. Have also two woolen cloths and several dry towels. Commence by dipping a woolen cloth in the gall-water, and then rub the carpet with it. This will produce a froth on the carpet, which you will take the other woolen cloth dipped in clean water, and which you will rub the carpet till no more froth rises from it, rinsing the cloth occasionally in the clean water. The water in this pail should be changed when it becomes dirty. You then rub the carpet as dry as possible with the towels.
TO WASH FLANNELS.—In washing flannels (notice particularly), to keep them a good colour, and to prevent their shrinking. Get from the grocer 1 lb. or 2 lb. (according to the amount of washing) of soap parings, which you will cut up in small pieces, and put three quart of water; boil to a jelly, and with this wash your flannels. Be sure you have plenty of warm water, not too hot; a handful of your soap jelly, and mix with it cold water, and then take the flannels, one at a time, shake all dirt out of them first; then sluice the articles up and down well; rub as little as possible, for rubbing knots the little loops of wool together, which you will have to wash with a machine, if you have one; if not, scrub them well. Dry in the open air, if the weather permits, as quickly as possible. In washing scarlet or blue flannel, put one tablespoonful of spirits of ammonia in the rinsing water.
Lime-washing is a much more effectual mode of purification than whitening, but is not so often used, as few persons know how to make lime-wash. If lime is used it is destroyed by the lime, and the wash also becomes very sticky. This happens if the lime is not well slaked, and used without any fixing material. Lime-wash should be made by placing some freshly burned quicklime in a pail, and pouring on it enough of water to cover it; if the lime is fresh, great heat will be given out (in preparation of linseed oil, sold by all oilmen) should then be added, one pint to each gallon. For cheapness, any refuse fat, such as tallow, may be used instead of the boiled oil. The water should be stirred with a stick, and the brush should not be left in the lime-wash, or the bristles will be destroyed. Should coloured wash be required, 1 lb. of green vitriol added to every two gallons of wash gives a pleasing blue. Quicklime slaked with skimmed milk and afterwards thinned with water, makes an excellent wash for out-door walls, as it is not acted on by the weather.

WORKING DRESSES.—It is best to wear washing dresses to work in as much as possible, and when once acquainted they are having them washed is troublesome and expensive, but dirt and grease do not ruin them, and they look fresher and better than stuff dresses, especially in summer. Never clean a washing dress with dummies or trills; wash gives a pleasing blue. Quicklime slaked with skimmed milk and afterwards thinned with water, makes an excellent wash for out-door walls, as it is not acted on by the weather.
KEEP YOUR WORKING DRESS CLEAN and tidy by wearing over it a large thick apron with a bib, and turning up your sleeves.
"You say the coat is three shillings?" "Tree shillin', mine fren?" "And you want it all wool?" "All wool except the buttons and de putton-holes." "All wool? how can you afford to sell an all-wool coat for three shillings?" "Mine fren, I don't vander you was surprised; yee de wool in de coat is more as de wool in de shirt." "Then you lose money on it?" "Mine fren, I don't vander I tell you von lees segret, und doaned you get it away. De fleece on de packs of dose sheeps von grow dot wool was misstis, und haf so beids at great reductions."

WANTED KNOWN.

I AM NOW A BUYER OF GOOD FRESH BUTTER, IN ANY QUANTITY, Printed or in Lump.
M. FLYNN, Grocer, Draper, General Storekeeper, BEAUFORT AND WATERLOO.

J. W. BROWNE, GENERAL AGENT, ACCOUNTANT, ETC., LAWRENCE STREET, BEAUFORT.

Correspondence conducted with strictest privacy. Charges moderate. Agent for the United Australian Fire Insurance Co.

SINGING. MISS MARIE QUERRE, C.F.M., intends holding a GLASS for Ladies and Gentlemen in BEAUFORT. Both notations used. Terms, 10s. 6d. per qr. New pupils leave names at Camp Hotel.

ALBION HOTEL, GENERAL STORE, NEWS AGENCY, WATERLOO. Good Accommodation. Moderate Charges. T. D. MARTIN, Proprietor.

W. EDWARD NICKOLS, Auctioneer, Valuer, Arbitrator, General Commission Agent. AUCTION ROOMS: BARKLY STREET, ARARAT, and NEILL STREET, BEAUFORT.

Correspondent and Valuer for the Bar-larat Banking Company, Limited. Trust and other Mortgages to Lend at Current Rates.

THE WORLD'S FRIEND. A Cure for Piles and Fistulas. Diseases of sensitive parts may be relieved and cured by the proper and diligent use of this cooling and healing Ointment, whose action should invariably be assisted by judicious doses of the Pills.—The anxious patient will soon experience wonderful ease from this treatment.

COUGHS, COLDS AND ASTHMA. The Ointment should assiduously be rubbed at least twice a day on the chest and between the shoulders, when the symptoms will quickly abate. No medicines are more efficient in chest complaints, none can be used with equal safety and certainty.

GOUT AND RHEUMATISM. These are undoubtedly BLOOD DISEASES, and the poison manifests its presence in the well known symptoms. The only certain means of cure consists in overcorrecting the depravity in the blood, which is rapidly purified by the use of the Pills. The Ointment, when rubbed upon the skin, penetrates through the pores, acts in unison with the Pills, and soon effects a cure.

DROPSY, SWOLLEN LEGS OR ANKLES. These remedies act directly upon the absorbent system with a power that no drugs, however energetic, can possess. They equalize the circulation, they filter out everything that is morbid or injurious, and they regulate every function.

BAD LEGS, BAD BREASTS AND OLD ULCERS. This invaluable Ointment is an infallible cure for any wound, sore, or ulcer, of however long standing. For pimples, blotches, scald heads, and scorbatic humours, it is equally efficacious.

Both the Ointment and Pills should be used in the following cases:— Bad Legs, Bad Breasts, Old Ulcers, Cancers, Erysipelas, Burns, Scalds, Gonorrhoea, Gleet, Glandular Swellings, Scrofula, Sore Throats, Sore Heads, Tumours, Chapped Hands, Piles, Hemorrhoids, Contracted and Rheumatic Joints, Stiff Joints, Scalds.

The Ointment and Pills are Manufactured only at 18 New Oxford St. (late 53 Oxford St.) London And are sold by all Vendors of Medicines throughout the Civilized World; with Directions for use in almost every language. Sole Purchasers should look to the Labels on the Pots and Boxes. If the address is not 188, Oxford Street, London, they are spurious.

CLARKE'S BLOOD MIXTURE. Is sold in Bottles 2s 6d each and in Cases containing six times the quantity. It is sufficient to effect a permanent cure in the great majority of long standing cases. By all CHEMISTS and PATENT MEDICINE VENDORS throughout the world. Proprietors: THE LONDON AND MIDLANDS COUNTRIES DRUG COMPANY, Limited, England. Trade Mark: CLARKE'S BLOOD MIXTURE.

CAUTION.—Purchasers of Clarke's Blood Mixture should see that they get the genuine article. Worthless imitations and substitutes are sometimes palmed off by unprincipled vendors. The words "LONDON AND MIDLANDS COUNTRIES DRUG COMPANY, Limited, England," are engraved on the Government stamp and Clarke's "No. 1" Blood Mixture. Beware of the bottle WITHOUT WHICH NONE ARE GENUINE.

JOHN HUMPHREYS, COMMISSION & INSURANCE AGENT, ACCOUNTANT ETC., Neill Street, Beaufort. RENTS and Debts Collected. Agent for the South British Fire and Marine Insurance Company. Agency Business of all kinds attended to.

CAMP HOTEL (NEAR RAILWAY STATION) BEAUFORT. Wines, Spirits, &c., the Best Quality only kept. Comfortable Accommodation for Visitors. —Meals and Beds, 1s each.— Daily coach to Waterloo leaves Camp Hotel at 9.30 a.m., 12.30 p.m., and 5.30 p.m. C. W. VOWLES, PROPRIETOR.

FUNERAL ECONOMY. Established 1860. WILLIAM BAKER, UNDERTAKER, Lawrence Street, next Post Office, and Neill Street, opposite St. Paul's. Hearse and other requisites supplied in town or country at stated charges. Post, Telegraph, and Telephone Messages promptly attended to.

FOR THE BLOOD IS THE LIFE. CLARKE'S WORLD FAMED BLOOD MIXTURE. For cleansing and clearing the blood from all impurities. It cannot be too highly recommended. For Scrofula, Scurvy, Eczema, and Blood Diseases and Sore of all kinds it is a never-failing and permanent cure.

It Cures Old Sores, Cures Sores on the Neck, Cures Sore Legs, Cures Blackheads or Pimples on the Face, Cures Scurvy, Cures Ulcers, Cures Blood and Skin Diseases, Cures Glandular Swellings, Clears the Blood from all Impure Matter From whatever cause arising. It is a real specific for Gout and Rheumatic Pains.

As this mixture is pleasant to the taste and warranted free from any deleterious or dangerous ingredients, it is a delicate constitution of either sex may Proprietor solicits sufferers to give it a trial to test its value.

Translation of letter from Mr. F. J. The letter of Jonathan to Mr. Dunsford. My Friend I write to you to-day to tell you about my illness. I love you very much to-day because of the medicine you gave me. Three months ago I was very ill. I could not plant yams I could not go fishing I could not eat or sleep; but now I am quite well again. It is truly a wonderful medicine. I beg you Mr. Dunsford give me one more bottle as the month of bells is near.

Preparation Day (S. Bas. dur. Vauau Levu). Explanation of above Letter. In Fiji at certain times of the year both the European residents and natives themselves break out in boils which are not immediately seen to not infrequently develop into terrible running sores. At these times I can conscientiously assert that I know of no better medicine than Clarke's Blood Mixture for their cure. For some months he had been almost completely set him up. In ordinary cases even a less quantity will effect a cure—I am, dear Sir, your faithful ally.

T. EDGEMOND DUNSFORD, 46 Leicester-square London W.C. 21 June 1892.

THOUSANDS OF TESTIMONIALS. CLARKE'S BLOOD MIXTURE. Is sold in Bottles 2s 6d each and in Cases containing six times the quantity. It is sufficient to effect a permanent cure in the great majority of long standing cases. By all CHEMISTS and PATENT MEDICINE VENDORS throughout the world. Proprietors: THE LONDON AND MIDLANDS COUNTRIES DRUG COMPANY, Limited, England. Trade Mark: CLARKE'S BLOOD MIXTURE.

CAUTION.—Purchasers of Clarke's Blood Mixture should see that they get the genuine article. Worthless imitations and substitutes are sometimes palmed off by unprincipled vendors. The words "LONDON AND MIDLANDS COUNTRIES DRUG COMPANY, Limited, England," are engraved on the Government stamp and Clarke's "No. 1" Blood Mixture. Beware of the bottle WITHOUT WHICH NONE ARE GENUINE.

JOB PRINTING. OF EVERY DESCRIPTION. BALL TICKETS & PROGRAMMES, ADDRESS & BUSINESS CARDS, MINING SCRIP, REPORTS, &c., PAMPHLETS, CIRCULARS, BILLHEADS, POSTERS, DELIVERY BOOKS, DRAPER'S HANDBILLS, CATALOGUES, MOURNING CARDS, SOIREE & DINNER TICKETS, &c., &c.

PRINTED IN FIRST CLASS STYLE AT MELBOURNE PRICES. Office:—Lawrence Street, Beaufort.

Plain & Ornamental Printing. Of Every description executed at "RIPONSHIRE ADVOCATE" OFFICE.

BOOKBINDING. ON REASONABLE TERMS. MINING SCRIP, CALL, RECEIPT DELIVERY BOOKS, &c., Prepared on the shortest notice.

Printed and Published by the Proprietor, ARTHUR PARKER, of Beaufort, at the Office of the Riponshire Advocate, Newspaper Lawrence Street, Beaufort Victoria.

To our Readers and Patrons. THE PROSPERITY OF A DISTRICT DEPENDS chiefly upon the support and encouragement that is given by the population to local enterprise and industry. Every venture is to a more or less extent speculative, but each, whilst aiming at the success of the Promoter, must offer certain returns to those whose support is necessary to achieve certain advantageous results on both sides.

Therefore, support Local Industry and Local Enterprise. The law of exchange was never satisfactory in its working; thus it was that the custom of buying and selling, using a standard currency, was introduced. One form of that currency, known as "paper money," and of paper money there is more than one kind. All kinds are useful, but not every kind retains its original value. The "paper" money most valuable is a newspaper proprietor is that which is paid him by "Subscribers and Advertisers."

And he will do his utmost to entitle good share of it. "The Riponshire Advocate" is the Advertising Medium for all Contracts, let, and notifications of the Shire of Ripon, and is the ONLY NEWSPAPER That is Printed and Published within the boundaries of the Shire, And as the advocate of the interests and welfare of this district it has a considerably greater amount of usefulness than any other journal or journals within a given radius of the Shire.

The Circulation of the Riponshire Advocate is Steadily Increasing, And the Proprietors, recognizing the increased support in this direction, will use their utmost endeavors to merit and sustain the patronage accorded them by giving the Latest and most interesting and instructive information.

"The Advocate," PUBLISHED EVERY SATURDAY MORNING, CIRCULATES in the following districts:—Beaufort, Stockyard Hill, Lake (Glenelg), Sailor's Gully, Main Hill, Raftan, Chazton, Waterloo, Barrumbet, Binnarong, Middle Creek, Skipton, Travalla, Barrumbet, Learmonth, Streatham, Skipton, and Camarvon.

With every issue of the Paper is given A FOURTEEN-COLUMN SUPPLEMENT, Containing an Interesting Serial Tale, Amusing Anecdotes, Pastoral News, Agricultural Intelligence, Recipes, Gardening Items, Etc., Etc., Etc.

Business Men, Read! It was Benjamin Franklin who wrote—"What stream is to machinery, advertising is to business." And another writer has said that—"He who in his 'bit' would rise, Must either 'bust' or advertise." And advertisers cannot do better than make the Riponshire Advocate the medium for their announcements.

CRICKET.

BEAUFORT AVENUE V. LEXTON.

The return match between the above clubs was played in the Park on Wednesday afternoon. The game was a very one-sided one, Lexton being a very strong batting side. The Avenue defeated the wickets first made a good start, and completely collapsed the bowling, and it was not until the re-bowling, and the score of 217 had been reached that the last wicket fell. W. C. Tromp played a dashing innings for 61. His score included thirteen threes, six twos, and ten ones; Hill made 36; E. Lilley, 31; G. Carver, 24; R. Thomas, 16; Johnston, 10; and Barnes, 10 (not out), each playing good cricket. The bowling honours were divided between Gray, 3 for 28, Mann, 3 for 36, Giles, 1 for 18, Kane, 1 for 36, and Palmby, 1 for 66. Lexton started ominously, and they were all disposed of for the small total of 23; Kane being top scorer with 8. The bowling was done by W. C. Tromp (who bowled with deadly effect, securing 8 wickets for 10 runs), and A. Tromp (2 for 9). On the conclusion of the game the visitors were entertained at an excellent repast at the Camp Hotel, prepared in Host Jowles best style, and to which full justice was done. After supper cheers were given for both teams. Songs, etc. were rendered, and the company dispersed. The following are the scores:—

Table with columns for batsmen and bowlers, showing runs scored and wickets taken. Includes names like A. Tromp, W. C. Tromp, Hill, Lilley, etc.

LEXTON. Simpson, A. Tromp, b. W. Tromp 1; Kane, C. A. Tromp, b. W. Tromp 8; Giles, A. Tromp 0; Palmby, b. W. Tromp 2; T. Mann, b. W. Tromp 0; Gray, b. W. Tromp 0; J. Mann, C. A. Tromp, b. W. Tromp 0; Murphy, C. Johnston, b. A. Tromp 2; Salvana, b. W. Tromp 0; Abrey, not out 0; Warren, b. W. Tromp 0; Sundries 4. Total 23. Bowling analysis—W. Tromp, 51 balls, 4 nouts, 10 runs, 8 wickets; A. Tromp, 48 balls, 3 nouts, 9 runs, 2 wickets.

"GOOD ADVICE AND A WOODEN LEG"

If I had given my friend Jim Snalley the best piece of advice one young fellow could give another, it would be to get a wooden leg. This may sound rather strange and unkind to you, but it's all right when you take it by the handle. You see it was this way. Jim was a lad some 25 years old, lippish and drowsy, fond of society, had plenty of money, but with the consumption in him. Got on from his mother, who died of it. Well, Jim began to cough, and run down hill fast. The doctors could do him no good. One day he was talking to me about it and actually broke down and cried. "Jim," says I, "There's just one chance for you, and I want you to jump for it right away. That's to get out West in America and live on the slopes of the Rocky Mountains, in the pine woods, in a hut or tent, and stay there till you are dead or well. Don't write to me for a year, then come back and let me hear from you."

Bidding a sad farewell to the young girl he was engaged to be married to, Jim went. Two years afterwards I met him in town, he was as hearty as a hick, but walked with a limp. He had lost his right leg, below the knee, in a fight with a grizzly bear, and now hobbled around on a wooden one. "And it's all your fault," he said. "If I hadn't been your friend I'd never gone there. Now I wish you'd marry me. Says she don't want a husband with a wooden leg. I'd let 'em die first. But that's where I was busy and wrong. It is a man's duty to keep on doing good, whether he gets any grateful or not. Here is Mr. Frank Stanton Langman. His wife gave him a piece of good advice, and he was sensible to act on it. In June, 1892, it was that he fell ill. He felt weak, tired, and weary without any outside reason for it. His appetite was poor, there was a bitter taste in his mouth, and a bad pain in the chest and stomach after eating. Sometimes he would break out into a sweat and feel so prostrated he'd have to lie down. It was feared he had some kind of internal tumor. Once he had an attack at a railway station, and people crowded round him, thinking he was dying. During another attack he kissed his child, believing his time had come. A doctor examined him for heart disease, but could find nothing. He advised Langman to take only milk and brandy, milk and water, and such slops. Still he had those frightful periodic attacks. After a while some one told him of a doctor who couldn't find out what the matter with you; you had better see a West End physician. Mr. Langman did so, and the West End doctor said 'Your patient's liver was too much bilious, and ordered medicine and a milk diet. Two more doctors were consulted with no better result, and the unhappy man remained in that miserable form for seven years. In February, 1899, he read in a newspaper of a case like his own having been cured by Mother Seigel's Curative Syrup, and he bought the best medical advice in London, was of no use, what could be expected from an advertisement medicine? "Nothing of course," said Mr. Langman. His wife thought differently. "You try Seigel's Syrup," she said. "Everybody speaks well of it." He did try it, and in three months he was well, and had been well ever since. In a letter dated December 17th 1891, he says: "Mother Seigel's Curative Syrup saved my life, and signs his name to what he says—'Frank Stanley Langman, 44, Comberford Road, Brockley.' His malady was not heart disease or tumors, but indigestion and dyspepsia, the cause of almost all pains and palps, which what you will. Mr. Langman was saved by good advice and good medicine, for which he is grateful. So I I notice that everybody feels like Jim Snalley, with his grizzly bear and his wooden leg. G. W. C. London, February 1892.

GAZETTE NOTICES.

Friday, 9th February, 1894. A return of the money received and payments made by the Curator of the Estates of deceased persons during the half-year ending 31st December, 1893, is published. It is perfectly clean in application. See the article you purchase in "KEATING'S," as imitations are numerous and ineffective. Sold in Tins, 6d. and 2s. 6d. each, by all chemists. DYSPEPSIA AND NOISES IN THE HEAD cured at the patient's home. This illustrated Edition also treats on the cure of Catarrh, Bronchitis, Asthma, Extreme Stomach, Indigestion, Dyspepsia, Rheumatism, by Medicine, Electricity, &c. J. B. E. BRIGHT, Publisher, 20, RUSHMORE PLACE, LONDON, W. England.

HEREBY THANK THE Commercial Union Fire Insurance Co., for their prompt settlement (through the local agent, Mr. Flynn) in connection with the recent fire at my place. R. WILKINSON, Trapsall.

WARDEN'S COURT.

Mr Warden Foster presided at the City Court on Thursday, when an application was made by Mr Joseph Ennett for the forfeiture of three mining leases, held by Mr W. R. Baker, at Snake Valley. Mr Pearson appeared for the applicant, and Mr E. P. Wynne for the lessee. A preliminary objection was taken to the proceedings as regarded one of the leases, which was on private property, and the objection was upheld. It was decided to take the other two leases together. The applicant contended that the labor covenants had not been complied with on the leases known as the Star of the West Consolidated Company and the Star of the West Conso's Company. The first lease comprises 154 acres, and according to the covenants the company should have employed two men for the first six months, and afterwards 39 men. In the second lease—where which contained 198 acres—the conditions were two men for the first six months, and 46 men subsequently. The applicant stated that he was a miner residing in Melbourne. In December last he visited the ground referred to in his application, and spent some hours there. There was no sign of any work being done, and it appeared that there had been no active operations for the past two years. There was no machinery, not even an old windlass on the ground. He was prepared to work both leases if he obtained them. He had heard that the Star of the West Company had struck gold. Geo. Bass, a miner residing at Carnham, said he had been employed by Mr Baker since Monday last to sink a shaft in the Conso's ground. The shaft was one which they had worked at in September 1892, but it required sinking deeper. Since 1892 up till last Monday he had seen no signs of mining operations on the lease. There were three other men beside himself now employed on the claim. David Kelly, a miner, said he had seen no work performed on the lease during the past two years until Monday last. Mr Wynne, on behalf of the lessee, stated that his client had been instrumental in reviving the mining industry at Snake Valley, and now that the Star of the West company had struck good stone, an attempt was made to deprive Mr Baker of his other leases. William Rand Baker said he was the holder of the leases in dispute. The whole district had been abandoned for a number of years when in 1892 he took up four leases. One of them, the Star of the West, had been systematically worked, and £15,000 had been expended on it; while in the Star of the West Extended £5000 had been spent. Considerable work had also been done in the Star of the West Conso, and for some time past they had endeavored to get a battery. As regarded the Star of the West Consolidated nothing had been done, and he would have no objection to hand it over to the applicant, if it was guaranteed that it would be properly worked. The difficulty he had to contend with, and which was really the reason why the labor covenants had not been complied with, was insufficient funds. The warden said he would take time to consider his report to the Minister of Mines.—"Star."

ARE YOU AFFLICTED WITH

DYSPEPSIA, CONSTIPATION, KIDNEY TROUBLES, BACKACHE, ACHING LIMBS, or LIVER COMPLAINT? If so, safe remedies are within your reach at a nominal cost. CLEMENTS TONIC and FLETCHER'S PILLS have never failed to cure the worst cases. General debility, nervousness, weakness, and general complaints of the digestive and nervous systems are promptly cured by these reliable remedies. They are prepared by scientific processes, and are not merely mechanical mixtures made only to "gull the public." The renowned CLEMENTS TONIC and FLETCHER'S PILLS have won in Australia as proof of the fact that they stand preeminent for their special classes of diseases. No remedies ever sold gave such entire satisfaction to their patrons, and evidence is forthcoming from every city, town, and village to prove their virtues. No doubt can now exist as to their value, but purchasers must be careful to get the genuine articles as many unscrupulous traders will attempt to palm off a substitute if possible for the sake of extra profit.

VERMIN DESTRUCTION ACT.

WEDNESDAY, the 28th day of February, 1894, has been appointed for simultaneous action in Laying Poison for the Destruction of Rabbits throughout these Districts. Action will be taken under section 15 of the Vermin Act against all owners and occupiers who fail to comply or use insufficient means for the Destruction of Rabbits after that date.

TENDERS required by Tuesday next for

building in a small boiler and smoke house. Particulars from J. HOLLOWAY, TH. butcher, Beaufort.

TENDERS are invited for a few panels of

FENCING (sawn timber), &c. The lowest or any tender not necessarily accepted. Particulars at this office.

I BEG to inform the Electors that I am a

Candidate for the Raglan Division of the Ararat Mining District at the Election for One Member to be held on the 24th February, 1894. W. REID-NICOLL, Esq.

Unreserved Sale of 159 acres 2 roods

3 parcels of Farming Land at Burnambreen.

ARMSTRONG, HOWE & CO., Geelong,

has received instructions from Mrs. Susan McLean to sell by public auction, without reserve, at the Golden Age Hotel, Beaufort, on Friday, the 16th March, 1894, at 2 o'clock p.m., her FREEHOLD FARM, being allotments 73A and 74, parish of Beaufort, county of Ripon, containing 132 acres 2 roods 3 perches or thereabouts of sound grazing and agricultural land, well fenced and watered, and now in the occupation of Mr Finch. This desirable property is situated on the main Beaufort and Ararat road, and has also a frontage to the Burnambreen and Raglan roads. It is about twenty chains distant from the Burnambreen State School and Post Office, four miles from Middle Creek Creamery, and six miles from the Beaufort Butter Factory. For further particulars as to title, terms, &c., apply to the undersigned. H. B. & CO., 10 Malop Street, Geelong.

A LUCKY GOLD FIND.

MARVELOUS DISCOVERY NEAR DAYLESFORD.

For the last few days the people of Daylesford have been considerably excited over a rich find of stone made by a couple of miners named Charles White and Jackson in a claim at Welcome Gully, a place about four miles from Daylesford as the crow flies, and between Basalt Hill and German Gully, Welcome Gully and also the next gully (Smith's) has for years yielded large nuggets at various times, and prospectors have worked there with varied fortune for a considerable time, sinking shafts from 3 to 20 feet in depth. With the exception of spasmodic prospecting the country may be looked upon as practically untied. White and Jackson have been working there for about two years and a half, and on Friday last, at a depth of 20 feet, they came across what was literally a golden reef. Pieces containing as much as 12 oz. of gold were broken up, and in less than two hours over 9 lb weight of gold, value over £400, was obtained. The ground up to that time had been held by them under miners' rights (two men's ground), each having a right to 60 feet on the course of the reef. Immediately the discovery was made, they pegged out sufficient ground for a large claim (20 acres), and lodged their application for a lease. They also pegged out claims north and south of the one in which gold was discovered, and other parties have taken up the adjoining country and applied for leases. A company has already been floated by Patterson and party to work White and Jackson's No. 2 lease. On Saturday Jackson and White got more golden stone, and although they are reticent regarding the quantity, it is stated on the best authority that they have already about 20 lb weight of the golden stone taken out, which they estimate will give 16 lb of gold, or about £800 worth. Nothing like it has been seen in Daylesford since the Keep It Dark gold was got many years ago, and that even was not so rich as this find.

VICTORIAN RAILWAYS.

GRAND EXCURSION FROM BALLARAT AND ALL STATIONS THERE TO ARARAT INCLUSIVE TO PORTLAND, WARRANBOOL, AND PORT FAIRY, ON FRIDAY, 2ND MARCH.

I.O.R. TEMPERANCE MEETING. A temperance meeting, under the auspices of the Progress Tent, I.O.R., was held in the Societies' Hall on Wednesday evening.

The Rev. R. Jackson presided. A very efficient united choir, under the leadership of Mr. J. Jackson, and numbering about 20 voices, rendered the glees, "Nature's Rest," exceedingly well, and were loudly applauded.

The Chairman then delivered an address. It would not be a bad idea to get more singing of that kind and possibly sing the publicans and the drink traffic to sleep.

A very sudden death occurred at Waterloo yesterday. A miner named Peter Hanson, 72 years of age, working with Brandt and party, was in the act of winding up a bucket of dirt on the winch...

Mr R. A. D. Sinclair met with a nasty accident on Monday. He was leaving Mr DeSerra's house at Mt. Cole on his usual route for orders, and before getting properly seated on a young horse the animal began to rear, throwing Mr Sinclair heavily to the ground.

THE NATIONAL ANTHEM HAVING BEEN SUNG, THE MEETING TERMINATED.

that population had drunk 1,360,000 gallons of spirits in the year, besides 72,000 gallons of beer.

Taking children away, each individual had 72 gallons of beer in the year. That was something terrible. The speaker then dealt with the benefits of the order, which was 15,000 strong; and whom about 11,000 were adults, and having funds amounting to £127,000; claiming that no other order offered such advantages in the matter of sick pay, etc.

The speaker concluded by making an earnest appeal to the cause for men and humanity and to lift the cloud from others and remove the obstacles in their way.

A collection was then taken up, the choir singing "When evening twilight gathers round."

Bro. A. Stewart then addressed the meeting. Unlike Mr Mackay he could not claim the acquaintance of a single person in the meeting, but they had met as friends in a common interest.

His purpose would be served if as the result of his visit he could induce any, either young or old, to take a stand on the side of temperance.

They were bound to give their children as good an education as they could. Another equipment of life was the habits formed, and these were largely attained by home influence, whether effectual or baneful.

They should have nothing to do with strong drink. In the welfare of life they could not expect to be all of equal station, but they could all be honest and make a good name.

What matter for the king and the beggar laid down together. The education derived at schools was only a small part of life's learning; the education derived from associates afterwards was often more powerful, and its influence more lasting.

One education to be deplored more than another was that of the public house, and no lad could form associates there without injury to his moral fibre.

He was not going to say anything about the people who sold drink. In some parts of the country no other accommodation for travellers could be got. These places were necessary for this purpose, but it was not necessary that they should sell grog.

There was one little door they could all keep closed against strong drink, and that was their mouths. They wanted the force of character to say they would have nothing to do with it.

It was a great advantage to young men to form habits of abstinence. Regarding the opening of markets for the wines, the speaker would not say whether it was better to make raisins or wine, but believed there was more money in raisins, as proved in California.

A hearty vote of thanks was accorded the speakers on the proposition of the Rev. R. Hosken, seconded by Mr Dungey.

The Rev. K. Mackay acknowledged the compliment, and in proposing a vote of thanks to the choir, conductor, and chairman, highly praised the singing, the selections having been rendered with good taste and the voices kept in their places.

Mr Stuart seconded the vote of thanks, which was accorded by acclamation. The chairman returned thanks and expressed his pleasure at being allowed to stay another 12 months in Beaufort; and on his suggestion, Miss Greenwood, who had presided at the piano, was also given a vote of thanks.

Mining News. There is nothing very fresh to report locally this week.

It is reported that a company of miners from M. Ryborough intend erecting a crushing plant and other machinery for the purpose of working the cement ground at the foot of the Old Lead.

A large area of ground has been pegged out opposite what is locally known as Cathie's store, and the promoter of the venture is Mr Robert Cross, well known as the youngest son of the family of that name, old residents of Beaufort.

Miners who should be in a position to express an opinion, say that the venture should turn out a prosperous one. At Ding Dong Messrs A. Liley and Cross dropped across a patch in the claim recently worked by Abbot and Driver.

During the week they have obtained between 5 dwts. and 6 dwts. per day. The Messrs Chessman washed a machine on Saturday for a poor return, whilst Mr. E. Trompf washed seven loads, which yielded 10 dwts. Messrs White and party (in Wotherston's paddock) did not wash off on Saturday last, but will probably do so to-day (Saturday). Yeoman's and party, at the foot of Cross's Gully, are still obtaining payable gold, but two other shafts have been bottomed below them with no wash.

At the Yambols Wright Bros. washed ten loads for 11 dwts. The ground is treacherous to work, and requires timbering, hence it can hardly be called payable, more especially as there is not much wash. Winsall and mate obtained one piece weighing 14 dwts, besides some finer gold, but have done very little this week. Other parties sinking in the locality are doing poorly. J. Liley and party are washing stonings from the old ground in Annie's Lead. If they find anything payable, and they can get a supply of water from the terrace, they intend erecting a panning machine. Abbot and party have abandoned their ground at the foot of the Old Lead. The several parties panning did not do very much last week, the following being the approximate yields:—Baker and party, 18 dwts.; Sandland and mate, 1-2 dwts.; Williams and party, 12 dwts. 19 gr.; Flowers and party, 10 dwts.

The yields of gold obtained last week (writes our Waterloo correspondent) were:—Stevens and party, 12 dwts.; Golden Gate Co., 32 oz. 12 dwts.; Curzon and party, 2 oz. 15 dwts.; Lucky Consols, 7 oz. 12 dwts.; Luckey Co., 6 oz. 7 dwts.; Trompf and party, 4 oz. 6 dwts.; Killebride, and party, 3 oz. 1
