After the sevenest public tests, is has been awarded twelve gold medals at international and other exhibitions for its undoubted and marvellous power to quickly relieve and conquer pain. This is, indeed, a record of which any business house may well be proud, and, of necessity, it must impress profoundly all intelligent people, Australians as well as Americans and Europeans. St. Jacobs Oil is the acknowledged international remedy for rheumatism, neuralgia, lumbago, sciatica, soreness or stiffness of the joints or muscles, backache, bruises, gout, toothache, and all other painful aliments. Its remarkacie action has mystified doctors, delighted sufferers, and dispelled the doubts of the most incredulous. In fine, it is the Soarching, Sovereign Cure of Pain. As a prominent journalist most tru? remarks: "It is a moral that St. Jacobs Oil conquers pain, which is indorsed by Peers, Bishogs, Commoners, Judges, Barristers, Attorneys, Clergymen, Physicians, Business Men, Squatters, Selectors, Miners, Civil Servants, University Professors, Teachers, and thousands of other credi de citizens and colonists, whose testimonials have appeared in the public press." The pistols cracked almost simultaneously. One man stood erect, evidently untouched; the other fell upon his back and lay straight and still. Seconds, surgeons, and spectators rushed to his side. He was "all there," mind as well as body. "No, don't disturb me" he said coolly to the doctor, "I'm shot fatally and shall die in five minutes. Call Jack and be quick." it is of wider human interest than the other. A woman had been ill more or less all her life. The details are commonplace enough, and yet they will appeal to millious who care nothing for the jealousies of young men in love. "At times," she says, I suffered from pains at the back of the head, and a sense of weight,

and folt tired and weary, yet it was not from work only. I had a strange feeling, too, of something hanging over me, as of some ovil or danger that I could not explain or define. "th My appetite was variable; sometimes I

Now for the lesson of both these incidents; what is it? This, that it is not people in desperate extremities who suffer most. Pain is in proportion to the resistence to disease Those who surrender, who are in despair, who give up, have present punishment largely remitted. Dying persons are the most comfort-able of all. Hopelessness and dissolution administer their own anodynes. Those who are not laid up, who are ill, and yet work and struggle, need pity and help. This lady was one, and to such Mother Seigel always proves a friend.
