THE RIPONSHIRE ADVOCATE, SATURDAY, JULY 2, 1910.

### A STRANGE BONFIRE.

When the news of the Battle of Waterloo arrived at Warrington-then, as now, a thriving place-the chief magistrate of the town declared that he should add to the projected illuminations by burning his own house down, and he actually did so.

It seems that the house was an old one, mostly wood, and that his worship had previously contemplated dismantling it and building a new one. But his example was contagious, and the owner of a considerable block of what would in these days be called "slum" property, happening to be a political rival of the other incendiary, burnt the ancient tenements as a counter-attraction.

Unfortunately, a big house not contemplated in the scheme took fire also, but the crowd and the authorities, thinking that it was all part of the show, did nothing to put this fire out, and even restrained the owner as a mad drunkard when he danced about exhorting them to put the fire out.

### OLD MAIDS NO LONGER.

Fashions change in people as well as in things.

Let us take, for instance, the "old with her in her pleasures as surely maid." A generation ago she was as he steps forward with eager helpthought of as an angular and prim fulness to share her burdens of sorperson who looked rather sourly on the world, and consoled herself for the lack of masculine attentions with a parrot and a cat. Truth to tell, she often answered to the picture drawn of her.

The typical "old maid" of to-day is a brisk, healthy, independent woman following some profession or calling, and subject to no ridicule because of her state of single blessedness. She is no longer even an "old maid," but has become a "bachelor girl."

FOR THE DAUGHTERS.

Every mother should, where it is possible, permit her daughters to furnish their rooms according to their own taste.

In this way a girl can find a pleasant mode of expressing her own individuality. Even where it is not con- devotion of a lover. venient to allow the daughter to do the furnishing, the mother can encourage her to have the photographs and ornaments of which she is fond

There is no preparation manufactured that will oothe and heal chilblains as Chamberlain's Pain Balm will do. When this liniment is applied it soon allays the itch, and prevents the chilblain breaking. It causes them to heal in a very short vhile. For sale by J. R. Wotherspoon & Co., Merchants, Beaufort.

displayed about her room. Some of the pleasantest rooms in many homes are those in which the daughters of the house have been allowed to show their individual tastes. The care and arrangement of such apartments have proved a source of continual pleasure to the girls, developing their home-keeping instincts, and incidentally helping to form their characters as wives and matrons.

### LAUGH AND LIVE.

Having vainly tried many and various remedies to restore a business man who had fallen into a morbid condition owing to years of overwork, a famous doctor at last persuaded his patient to take a course of funny stories, one at each meal, with an extra two at dinner.

The patient, a solemn and gloomy man, at first rebelled, but finally falling in with the idea, adopted the course recommended, and was in the end restored to health, the effect of laughter being entirely to change his open; and if the love of a good man mental and bodily condition.

Laughter, in fact, is one of the cheapest and most effective of medicines, breaking up stagnation of mind and body, and sending a healthy vibration through the system. There is very little the matter with the man who can enjoy a hearty laugh.

### The Light of Genius.

For more than a week a schoolteacher had been giving lessons on the dog, and so when the inspector came down and chose that very subject there | with an abstracted air. seemed every prospect of the class distinguishing itself.

Things were progressing quite satisfactorily, and the teacher was congratulating himself on the trouble he had taken, when, alas! a question was asked which made him tremble for the reputation of his scholars.

"Why does a dog hang his tongue out of his mouth?" asked the inspector.

"Yes, my boy?" he said to a brightlooking lad who held up his hand, while the light of genius was in his eye.

"To balance his tail!" shouled the bright boy.

Then.

"I hear the audience last night was rather cold." said Hi Tragedy. "They were at first," replied Lowe Comedy: "but when they remembered that they had paid good money to see the show they got hot."

Neighbor: I have no secrets from my wife. I tell her everything. Next Door: Yes, I know you do. Neighbor: How do you know it? Next Door: Oh, your wife tells what you tell her to my wife, and she tells me!

Wotherspoon & Co., Merchants, Beaufort. SKIPTON. VALEDICIORY. Under closer settlement many more people are coming to this district than are leaving it, and valedictory socials are few and far between. When a respected resident and his family does leave the township, however, Skipton people make the most of the opportunity. Such was the case on Friday, 1st inst, when upwards of 200 people as-

sembled in the Mechanics' Hall to bid farewell to Mr and Mrs C. Grist, who are leaving for the Colac district to engage in dairy farming. Mr Robert Cairns, the chairman, said that Mr Grist's connection with the district extended over 48 years, he having been born at Skipton. Although not a pub-WHICH GAVE ME BACK HEALTH. lic man, he was a good citizen, and 'IT WAS THAT MEDICINE ALONE.' ride in all carriages and the van : that Mrs Grist was always to the fore in cases of trouble or sickness. Mr Thos. IT IS THE BEST OF MEDICINES Cleveland made the presentation of a silver tea and coffee service to Mrs Grist, and others to speak in enlogy of the departing guessa were Messrs A. Angus, M. Notman, A. Wilkie, W.

Wise, and M. Osborne. Mr Grist modestly responded. A concert programme was given by the Misses Sperrin, Todd, B. and L. McDonald. Earles, Master Rod Wilkie, and Mr Pye, and a dance was subsequently held, for which Messrs P. and T. Grist study of worth definity inclimitant pour appetite bad memory is hearing storing powers are wonderful. Mr. Those Physic, the clever comedian if the Cingerprovided the music and Mr H. "Poverty is no disgrace," said the romantic young man. "And it is no recommendation either," said the prac tical young woman.

for paper, would, it is calculated, sup ply the world with paper pulp for more than 800 years.

Theatre Manager: I can't use you: play, sir. It's too long for the stage. Amateur Playwright: But, I sayen the stage, you know?"

In Lapland when the door of a warn room is opened during the winter it is immediately followed by a miniature of some carbonaceous food. Indeed, snowstorm in the room, the condensed | carbon is needed to produce the force moisture falling in flakes.

Can you solve this puzzle? A man went into a shop and asked for a se vereign's worth of silver in shilling: and sixpences. On counting it he figure that he had one more sixpence that he had shillings. How many of each had he?

Mr. Novoice (to Mr. Sponger): M wife has been obliged to give up play ing the piano. Mr. S.: Indeed' Whatever is tha

for? Mr. N.: Every time she began t rlay I insisted upon singing.

Here are two epitaphs. A tomb stone in Jersey courchyard bears this inscription:-"Died of thin shoes, Jan sary, 1839." Graves upon the tom stone of a jockey who has just been buried in a New Zealand cemetery are the simple words, "He has passed the Dost."

Lions, tigers, panthers and wolves are of all animals perhaps the least use to mankind. They provide a certain amount of sport, but, if they were no hunted for pleasure, they would have to be so of necessity in order to keep cown their numbers Their skins are of littlear no use, whilst no civilised race-and few uncivilised-care to ea their fles

A Colossal Dock.

By the end of 1907 the port of Han: bury will presess the greatest floating doch in the world. It is now unde onstruct of the shipyard of Messry Blatap and Voss at Hamburg, and F to have an a commodation capacity of 2. "Prens Its length will be 520 feet so that the 'a rest warship and ocean tiners will be able to use it. The docl will be overtually towed to Brunshai sen, on the Lower Elle, where it ca: be utilised by the German fleet in case of war. The capacity of the larges floating dock at present in existenc toes not exceed 17,500 tons.

### A Battle's Memorial.

Over one of the porches of the Catheviral at Bergen, Norway, there i the seen a cannon-ball embedded i he wall At the beginning of the ighteenth century the English and th buch were at war with one anothe on the high seas. The former success? 20 in calific an advantage over the atter, and resnaged to drive then

be so fed that they can produce them. late." Lime in some form should be provided for the production of the shell. Most grains and meals contain some lime, but experience has proved the Viscon of the practice of poultry Canada has forests which. at the keepers in feeding sea-shells, old morpresent rate of consumption of timber iar, etc., to the fowls. Those fed with suells and supplied with plenty of lime-mortar lay better-shelled eggs, and more of them, than those which have been denied these articles of diet. The white of the egg is albumen,

and to produce a large number of eggs the hen must assimilate a large amount aw-look here-aw! Can't you length of albumen. Foods, therefore, which contain albumen-lean meats, table scraps, a little linseed meal, oats, and the like-should be fed. The yolk contains some oil, and indicates the need

> necessary to sustain and support the hen in manufacturing her product. Hens fed for eggs should be furnished with grain and all the elements necessary for the support of life and the production of eggs, and will lay much better than those fed at haphasard, and with no systematic attempt to furnish well-balanced rations for eggproduction.

> > As it Worked.

Judkins and his wife were in the pit; but they were not happy, for in igain. front of them sat a lady who wore on her head a praiseworthy amateur ar of mine?" flower-garden, which she declined to remove. But Mrs. Judkins knows something of her sex. She made audible comments from lively to severe upon the general construction of that hat. "I tried it on myself last week." she finished scornfully; "but I wouldn't jay or two. A week elapsed; no take it—it seemed too chesp to be

good!' "How do you know it's the same hat?" queried Judkins innocently. He waiting for the ink to dry.' was quite entering into the spirit of the thing.

"Why? Because the price ticket is I make sure that I can complete it up still on it!" was the triumphant an- to time," BWer.

The supercilious smile which had curled about the lips of the wearer of the hat vanished, a hand shot up viciously, withdrew the murderous cins, and, sad to say! one of the tric missed the whole of the first act searching for the ticket which was not tbere!

### "Weil Packed."

A lady and her little daughter were walking through a fashionable street, when they came to a portion strewn with straw to deaden the noise of vehicles passing a certain house. "What's that for, ma?" said the hild

"The lady who lives in that house dear, has had a little baby sent to mid: her," replied her mother. The child thought for a moment then, looking at the straw, said: "Say, ma, wasn't she awfully well

packed?"

never did he see a butterfly on or near one of the fragrant blossoms. att In Central America, the savages, armed with delicate blow-guns, lay in wait for the butterflies, and when the insects came within range they discharge pith balls, or minute ar- rows, at them with such deadly ac- onic curacy that the insects aimed at in- wariably fall to the ground, stunned. call Another famous collector, Profes- of sor Hahnel, successfully used cap- the tured butterflies as decoys for others seco of their species, killing them with wice the cyanide bottle, and then fasten- and thus come within reach of the it h	a apprentice recently arrived was ven a candle and sent up to the tic to bring down what was re- tired. Some short time afterwards e proprietor asked this lad if he d brought down the candle again, which he replied, "Oh, indeed, I rgot. I stuck it in that barrel of dion seed behind the door." The mer's hair rose on end, the so- lled barrel of onion seed being one gunpowder. Hastily ascending to e attic, he saw he was not a ond too soon. Part of the candle ck was just about to fall off, the ndle being one of the ancient tal- w "dips." Treading on tip-toe he ached the barrel, and carefully in- clacing his fingers around the can- e gave it a sudden jerk, throwing harmlesely on to the floor and as averting a terrible catastrophe. en all danger was past the mer- ant took a violent fit of trembling d a considerable time elapsed be-	parallax, but no case has yet been found in which this quantity is as great as a foot rule seen at a dis- tance of fifty miles, and only for comparatively few stars is it cer- tainly appreciable. There are some stars so remote that their light, though travelling with a velocity of 186,000 miles per second, cannot reach us in less than 10,000 years. To traverse the milky way, of which our own solar system forms a part, light requires 25,000 years; and to reach us from some of the distant nebulae, which appear like faint clouds, and hardly visible through the largest telescopes, it must travel for nearly ~5,000,000 years. To ordinary vision all the stars appear at rest in our heavens; nor can the astronomer himself recognise any signs of motion. except by ne-	"Do you believe in the 'Back to the Land' movement?" he asked. The man with the lugubrious coun- tenance smiled wanly. "I prefer not to venture an opin- ion," he answered. "You see, gen- tlemen, I'm an undertaker." AS A START. They were at dinner, and the dain- ties were on the table. "Will you take tart or pudding?" asked papa of Tommy. "Tart," said Tommy, promptly. His father scowled as he recalled the many lessons on manners he had given the boy. "Tart what?" he queried, sharply. But Tommy's eyes were glued on the pastry. "Tart what?" again asked papa, more sharply. "Tart first," answered Tommy, his eyes glistening with delicious expec-	various chemicals have been suggest- ed which would set light to hydro- gen on coming in contact with it. Finally, Major Baden-Powell thinks there can be no doubt that the ma- chines which are now actually in ex- istance, both dirigible balloons and aeroplanes, can be made great use of in war; and it seems fairly certain that in another few years' time their efficiency will be greatly increased. If properly used, not by ones and twos, but by hundreds, they will greatly affect our warfare.—"Popular Science Siftings." Scrub cows don't buy autos by proxy or otherwise. When suddenly frightened, lisards will often drop their tails and scur- ry away. The discarded member bouncing up and down attracts the attention of the enemy, and emables	The Scrapper: "That's rather tall, isn't it? 'Spect me to swallow that eh?" "Fact, I assure you. He was try- ing to gnaw the date off of his tic- ket. You see it happened to be an old one." Then they went at it. "Well, my little man," queried the minister who was making a call, "do you always do as your mamma tells you?" "You bet I do," answered the pre- cocious five-year-old, "and so does papa." It is a peculiar fact that with most men the growth of hair is greater on one side of the face than the other. It is said that hair always grows more quickly on that side on	job which could be done in a few minutes to waste half a day for the farmer. If small breakages and dis- orders were put right promptly the life of many implements and ma- chines would be considerably pro- longed. On wet days, instead of be- ing idle, with the necessary appli- ances at hand, a farmer could mend chains, make S hooks, and eyebolt and many other useful things for general farm use. Of course, Such an equipment as described would not be sufficient for a farmer to attempt to manufacture implements, and he would be unwise to attempt such tasks as required a tradesman's skill and experience. To give the best care to farm plant and get the most out of it it was necessary for the farmer to do his own black- smithing." 1728.	

THE HEROINE 🗯 ₩ OF THE MILL A LANCASHIRE MAN'S BEVENCE. All Rights Reserved. PART 13. lads !" CHAPTER XVI. THE FIRE AT THE MILLS .- DICK IN PERIL. Kate had fully explained matters

to her mother, and tried all she could to prevail upon that lady to go home and leave her one night more under the roof of the woman who had looked after her for so many years. But Mrs. Marryat was firm, and Kate having vowed not to leave until the end of the evening had come, it was concluded that the three ladies should stay that night at Mrs. Fulford's.

Eleven o'clock had just chimed when the party rose to retire.

The double-bedded room was the best room in the humble house and its front window looked straight over multitudes of small cottages until view was interrupted by the colossal mills of Maud's father, with the towering chimney reaching up, as it were, to heaven.

Just above the summit of this structure might be seen the moon. now high in the heavens, and so bright that the lesser or more distant lights paled in its presence. "What a beautiful night, children !" said Mrs. Marryat, beginning

to undress. "The moon and our chimney as they appear at present, remind me of the old nursery game of cup and ball," said Maud, gaily. " Just imagine an immense giant taking up the stack and throwing the moon right into space, and then dexterously catching the worn-out crater-consumed planet in its passage back to

### TWELVE MONTHS' IMPRISONMENT FOR CONTEMPT OF COURT.

There are many ways to comfort the indertunate. One of the most original of them is recorded by Sir David Dundas, once a circuit judge of England. In the earlier half of last century, in many of the rural districts, there was but one session of the court during the year, and it consequently became ... Judge's duty to make a clean sweep et the prisoners' cases before a session ended.

Sir David had just finished a session at Scarborough, and the court was about to be closed when the gaoler approached.

"What, your honor," said he, "is to done with the man who created a In the Christian church, said the be done with the man who created a disturbance in court last year? Your bonor will reco'lect that you commit ted him for contempt."

"Cood heavens!" exclaimed Sir Da vid. sho had, of course, only committed the prisoner for the day. "Has the man been confined for a year? Re lease him at once." The gaoler performed his mission and then the judge anxiously inquired what the man bod said.

Well, your honor," drawled the gaoler, "I told him I bed at an man, a man transported for much less-and be was very grateful!

### A GIRL BRIGAND.

There have been women who, dis mised in male affire, have served as soldiers and sailors, but a girl briganis probably unique in the annals  $\boldsymbol{\varphi}$ feminine enterprise. The home of this female bandit wa Roumania, and she made no attem, te disguise her sex. She is described a having been a perfect rider, an excel lent shot, of considerable heauty, and utterly fearless and unscrupulous. she was the leader of a company of brigands whom she accompanied on all their expeditions. Houses were attacked at night, sacked and pillaged, and the inhabitants murdered if they showed fight. Before her career came to an inglorious end, she was credited with Likewise, a man who gambled should be

enters, welcome it, thank God, and marry him if he asks you to.

### .All Over Him.

Maisie was the daughter of a rich merchant, and therefore she could afford to be romantic. To her most young men with black moustaches and an inclination to cheat the barber of his dues in the matter of hair were heroes of a high order. Papa Spillkins' cashier was this sort of young man, and Maisie decided that her heart was his alone. One day she met him in the street, but he passed her by with an abstractel air.

"Papa," she sall, sadly, that evening. "I saw that handsome cashier of yours this afernsion. It is sad to think that he should be chained to the dull routine of an office. He is a poet, I am sure. He has such a heavenly, fara way look in his eve."

"Yes," snapped old Spillkins, angrily. "and that far away look isn't confined to his eye. It's all over him, just at present. He bolted this afternoon with as much of my money as he could lay his hands upon."

### The Wrong Place.

An old lady, with her coachman. drove up in a large drag and stopped opposite a large red brick building in one of the villages in the old country. Her ring was answered by an official in uniform.

o not then back or no forever of the omelishe began, "to take nzles, alter für die gestee the for a gionic in the groen to the socialit line again It's a beautiful day, and it will are fail, from whatever couse, them a would be good, events up as just to surregist but to rise and the are in this building lay after consight forward rada.

The official gashed for breath. Never all his long experience had he heard such a cool request. He simply gazed t it het in asterishment. Car't come, madam," was all could arren es, they can. Let them all come e never let thom out," he added.

oarse whisper. Unities, you do! I met two of the dear old men just now in their long smoek frocks.

"Ah! I see." replied he. "You want the workhouse. It's just round the corner. This is the county gaol!"

### Gave Him a Shock.

A tramp, dirty and ragged, called at a house on the gate of which was live wood a doctor's plate. A large, rather mas-

an't hack twice in the same place. family, but who are most uncivil The boy is living on nothing but raw sometimes cruel, in the treatment of maize, and has already thrown down wife, children, and servants at home tour bushels of cobs." Tnese men grumble at the cooking of Next, if you please.

the dinner, and find fault with the ap pearance of the poor wife who has been working hard to prepare the meal, and who does her best to ap pear amiable through it all. These A hale old man, with a large nummen would aggravate the best of ber of previous convictions against wives. Then there is the husband nim, was brought up on a charge of who keeps all the money in his owr beating his wife without provocation hands. He never gives his wife any But, though admitting the assault, he sum, fixed or otherwise, for house leclared that she deserved all she got. keeping, or even for her own clothing "She interfered with my hobby, sir, or that of the children. He pays the and pasted up a proken window with bills himself and always grudgingly

> however small. THE AERATION OF MILK.

The advantages of the aeration of "A summons! Surely you didn't milk are principally the increase of vish to treasure that?" cried the asprygen, and decrease of carbonic acid of the milk. With 62.9 per cent. of "Yes, sir, I did," replied the old man: carbonic acid present in milk, the and I venture to say that, if you'd growth of desirable breteria is prac een proudly collectin' summonses all tically at a standstill. It will take very our life, and you'd just had the hunlittle to make such milk go "off." An lied h served on you, and your wife

other point of advantage of aeratior is that undesirable odors, natural to nilk and caused by volatile substances in the food, are eliminated during the process of aeration. On this account. however, the dairyman who aerates his milk must not be any the less mreful in paying strict attention to the laws of cleanliness about the milking-shed and in the handling of the milk. Whilst aeration is helpful in eliminating many undesirable gases, it would be absurd to suppose that if -ould get rid of them all.

BY-PRODUCTS OF DAIRYING.

Within recent years there has been ises of the by-products of dairying it aster. the older countries, but in Australia not much has yet been done in this lirection. Ten years ago there were mormous quantities of skim-milk and correct for from the creameries, and of when from chouse factories which were absolutely wasted, or sold at a lext-to-nothing figure for feeding pigsste. At farm dairies these by-products we generally used to advantage ir feeding animals, but at the factories aspecially at the seasons of the great est millt supely, this most desirable rethod of utilisation is incoly im practicatio. In many places in Europe new branches have lately been added o the industry, which make sugar of

anticles.

platform, and a strong force of constables had to be engaged in keeping back all those but the officials, the medical men, nurses, ambuiance men, and the help**ers**.

The casualty train left Flinders street station at 9.25, and did not arrive at Richmond until about 10 o'clock. In the train were two young doctors from the Melbourne Hospital. Several doctors from the hospital went great development in the economica' lout in motors to the scene of the dis-

Among the medical men who attended to t' e injured were Dis. Charles Ryan, P. Reid, H. O'Hara, M. Macgillicuddy, Agnow, Officer, and McCarthy.

Mounted constables kept the way clear, and whenever a dead body of one of the victims was brought forth the men in the vast crowds reverently raised their hats.

The scene, as a whole, was one never to be forgotten. On the No. 1 platform were the injured and dead, many excited officials, calm medical men, some working in their shirt sleeves, with sad-faced nurses. In the wrecked cars there were men energetically sawing and hacking at the timbers to get at the unfortunates who were pitifully asking to be quickly released from their terrible positions.

Over all was the dense fog, which was mainly responsible for the tragedy. It seemed like the pall of death.

The scenes on the Richmond station were most harrowing. Both platforms seemed to have been suddenly transformed into hespital wards.

AGGRAVATING HUSBANDS.

We hear a great deal about nagging wives but aggravating husbands are much worse, and there are more of them. It is a shame it should be so out how many husbands there are who strangers and those outside their owr

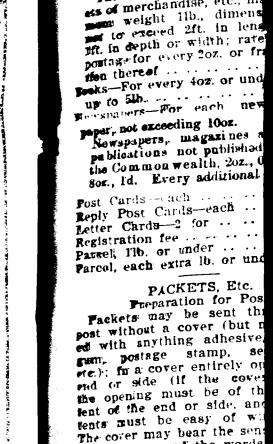

BRONCHITIS D'D CURE. Famous Remedy for Coughs, Bronchitis, Pneumonia, Pleurisy, Asthma & Consumption Those who have taken this medicine are amazed at its splendid healing power. Sufferers from Bronchitis, Cough, Croup. Asthma, Difficulty of Breathing, Hearseness, Pain or Soreness in the Chest, experience delightful and rapid relief; and to those

who are subject to Colds on the chest it is invaluable, as it effects a complete cure. It is most comforting in allaying Irritation in the Throat and giving Strength to the Voice, and it neither allows a Cough nor Asthma to become chronic, nor Consump. tion to develop. Consumption is not known where "Coughs" have, on their first appearance, been properly treated with this medicine. No house should be without it, as, taken at the beginning, a dose or two is generally sufficient, and a complete cure is certain.

heart and turn the key and close the blinds and pull down the curtains, and say that the love of no man shall enter here.

Keep your doors and windows wide open; and if the love of a good man enters, welcome it, thank God, and marry him if he asks you to.

.All Over Him.

Maisie was the daughter of a rich merchant, and therefore she could afford to be romantic. To her most voung men with black moustaches and an inclination to cheat the barber of his dues in the matter of hair were heroes of a high order. Papa Spillkins' cashier was this sort of young man, and Maisie decided that her heart was his alone. One day she met him in the street, but he passed her by with an abstracted air.

"Papa," she said, sadly, that evening, "I saw that handsome cashier of yours this afernoon. It is sad to think that he should be chained to the dull routine of an office. He is a poet, I am sure. He has such a heavenly, faraway look in his eye."

"Yes," snapped old Spillkins, angrily, "and that far-away look isn't confined to his eye. It's all over him, just at present. He bolted this afternoon with as much of my money as he could lay his hands upon."

### The Wrong Place.

An old lady, with her coachman, drove up in a large drag and stopped opposite a large red brick building in one of the villages in the old country. Her ring was answered by an official in uniform.

'i am come," she began, "to take the inmates for a picnic in the green Forts. It's a beautiful day, and it will them a world of good, cooped up as wy are in this building day after

The official gasped for breath. Never in all his long experience had he heard such a cool request. He simply gazed at her in astonishment.

"They can't come, madam," was all : could utter.

Yes, they can. Let them all come wery one of them."

"We never let them out," he added, In a hoarse whisper.

"Oh: yes, you do! I met two of the dear old men just now in their long smock frocks."

"Ah! I see," replied he. "You want the workhouse. It's just round the corner. This is the county gaol!"

Gave Him a Shock

A tramp, dirty and magged, called at a house on the gate of which was a doctor's plate. A large, rather maseuline-looking lady opened the door. 'Senso me and the tramp, the Doctor

be relied upon to give plenty of milk; however, as they are much more difficult to fatten when old, they should not be kept too long. Young rams are better than old ones. I favor keeping a few sheep rather than stocking the land to its full capacity, with the risk of trouble in times of drought. Although sheep can be managed in conjunction with farming with little trouble, we must not overlook the fact that the more time and care bestowed on a flock the greater will be the profits.'

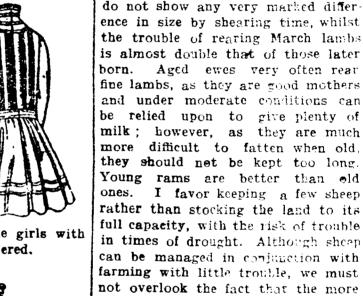

### CLIPPING HORSES.

I am in favor of clipping for several reasons. I have been clipping my horses for ten years and it has always been satisfactory to me, and if I were to use horses for 25 years more I would have them clipped. I am 63 years old and have been working horses ever since I was big enough to catch and harness and climb on. Have waggoned and farmed all my life, and have had lots of experience with horses. Suppose one of us goes out in the spring on a warm day with all our heavy underclothes and heavy winter coat on and is compelled to keep them on all day and work hard, can you imagine how we would feel? It's one of the most uncomfortable things any one has to do. So it is with the horse. can take two clipped horses in the spring and go to ploughing and I will do as much work as can be done with three that have not been clipped, with one-half the labour to care for them. If you never had a horse clipped you would be surprised to see the amount of dirt that is on the horse after he is clipped, and if he is not clipped when you take him in wet with sweat in the evening he won't dry till morning, and the sweat brings the dirt and dust out in the hair and you have a bad job on your hands to get him clean. On the other hand put your horse in that has been clipped and if he is a little warm throw a blanket of any kind on him. I have made them of old wool sacks as good as any and not very expensive. In an hour or less your clipped horse will be dry

### THE RIPONSHIRE ADVOCATE, SATURDAY, JULY 30, 1910.

### A BRAVE CAPTAIN'S TACT.

2.13

Planing for Life.

A notable instance of resource is related in connection with the voyage of an American - --- commanded by a certain Cartain theaker. There were a large to moer of passengers on board in addition to a valuable cargo of cotton. Three days out from . Bombay the captain had good reason to believe that the cotton was smouldering. Any knowledge of such a catastrophe would cause a general panic. It was Impossible to put back in the teeth of a north-east monsoon, so the commander quietly prepared for the inevitable. The passengers, bored from lack of occupation, were amused and interested when Captain Theaker proposed to play at having a fire on board. He said that they would go through all manoeuvres as if a conflagration were

really taking place. The passengers fell in with the sug gestion eagerly. The boats were got ready; provisions were put in, with water, sails, and compasses. The seats in the various boats were allotted, and the passengers, entering into the spirit of the game completely, made up bundles of the valuables they considered the most precious. Thus, quietly but quickly, the "joke" was carried out to the full.

When all was ready the captain calmly told the players that the game was in earnest and that the ship was really on fire, with the flames making toward the powder-magazine. The boats were speedily got off, and in less than an hour the explosion occurred. The boats were one thousand miles from land, but the weather remained fair, and in fourteen days all were landed in safety.

RESOURCE OF THE KHEDIVE.

### **Bold Diplomacy.**

One of the most dramatic stories connected with the career of a monarch is that which tells of an attempt upon the life of the Khedive. Looking out of a window, he saw a captain and soldiers crossing the square to wards the palace. He knew, by in tuition or from secret information that they were coming to assassinate him. He did not flee; he did not bar ricade himself in his quarters. He sent an aide-de-camp to receive the murderers, to tell them that the Khe dive was expecting them, and that they were to be conducted to his presence They meekly followed, and were brought to the man whom they had come to kill. He met them without flinching. He informed them that he knew the errand upon which they had come, but that he claimed the right of a doomed man to speak. He then told them that, no matter what they did, in the long run Britain must win; that they had some guarantee for the safety of the country so long as he, whom Britain was pledged to support. remained alive. It would be better for them to let him live. And then he offered them high rank in his personal service. When they left it was as distinguished members of the bodyguard of the man whom they had been sent to destroy.

HE ANCIENT GRAVES IN PERU

Far away on the Nova Scotia side Some parts of Peru are literally of the Bay of Fundy is situated the little village of Saulnierville, which is honeycombed with graves, which belong to so remote a period that al' the centre of the district where the trace or tradition of the people who Arcadian settlers returned after the made them has been completely lost expulsion of the English in 1755, and On a road which branches off from. in this out-of-the-world spot may be Oscond, near Lima, there are foufound the victim of a mysterious ocmasses of tomb ruins, the cubic con currence which dates back many years. About forty years ago a large vessel tents of one being nearly fifteen mil was observed sailing close to the litlion feet of materials. tle strip of land known at Saulnier-

In another place travellers have ville as St. Mary's Bay. The ship was seen, walled in, groves of graves ex unusual in appearance and attracted tending over fifty acres at a stretch considerable attention, especially when and without a break. These rules are a boat put off from the shore, deposited something above the tide line. and not the work of the Incas, whose civil: returned to the ship, which immedisation suffered such disastrous eclips t the hands of the Spanish adventu: The next morning a fisherman made ers, when Spain, in the middle age: his way to the shore where the boat

put the whole of the New World t had landed, and saw what at first lookthe sword. They appear to date back ed like a bundle of clothes. One can to a period immensely anterior to Mol imagine his surprise when a closer inspection showed it to be a man! Hortezuma ror succeeded surprise when it was dis-In all history there is no more sad covered that both legs had been new-

lening picture than this vanishing of whole peoples; whole systems of go vernment, and the animated life and stir of immense nations stilling down nto a silence which is almost painful They lived and loved, sorrowed and ejoiced, traded and worked, did these intique tribes of men. Then they passed away into shadowland, leaving

behind them only the graveyards by the side of which they sat down and wept for their dead. Life in the unit must seem a most important possession to its owner;

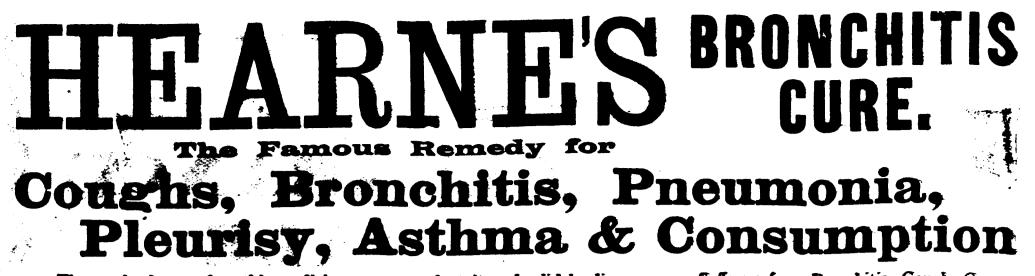

but Nature wipes out race after race ns carelessly as a schoolboy drawing wet sponge over a scrawl on his slate.

### FOR THE JILTED GIRL.

When a girl is jilted pride must come to her rescue-for in nine times out of ten when a man's love for one girl dies it is because another girl has ome into his life, and if the first girl can only make up her mind to drink her cup of bitterness to the dregs, and not lose control of herself, she will at least save her self-respect.

To hold him against his will is not only impossible but degrading. The mere fact that he is being held makes him more anxious for freedom. If the girl be strong enough to send him away, she will save her own pride. But it is very hard for a girl to be proud when her whole soul cries out for love, when she knows that her loss will be another girl's gain. She has jealousy as well as wounded love to

fight against. The fact that she has seen other girls go through exactly the same ex-

Those who have taken this medicine are amazed at its splendid healing power. Sufferers from Bronchitis, Cough, Croup. Asthma, Difficulty of Breathing, Hoarseness, Pain or Soreness in the Chest, experience delightful and rapid relief; and to thosewho are subject to Colds on the chest it is invaluable, as it effects a complete cure. It is most comforting in allaying Irritation in the Throat and giving Strength to the Voice, and it neither allows a Cough nor Asthma to become chronic, nor Consumption to develop. Consumption is not known where "Coughs" have, on their first appearance, been properly treated with this medicine. No house should be without it, as, taken at the beginning, a dose or two is generally sufficient, and a complete cure is certain.

Small Size, 2/6; Large Size, 4/5 Sold by all Chemists and Medicine Vendore, and by W. Q. HEARNE & Co., Ltd., Geolong, Victoria. Forwarded to any Address, when not obtainable locally.

### GOOD NATURE.

Much of the misery of humanity **dould** be obviated by compassion, benevelence, and sympathy. There is nothing, therefore, which we ought more to encourage in ourselves and others than that disposition of mind which in our language goes under the title of good nature. Good nature is generally borne with us; health, pros perity, and kind treatment from the world are great cherishers of it where they find it; but nothing is capable of forcing it up where it does not grow of itself. This characteristic is one of the blessings of a happy disposition which education may improve but not produce.

He Objected.

"I don't see any use in ny son Boy jamin studyin' Latin," pessimistically said a certain honest but somewhat moss-grown farmer, addressing the principal of the village academy. " want him to get the kind of education that will be of value to him in afterlife, an' not a lot of things that isn't no good to nobody. I hope I make myself clear."

"But, my dear sir," expostulated the educator, "Latin is one of the foremost essentials of a liberal education It broadens the mind, strengthens the intellect, and----"

"Tut, tut! What I want him to learn is somethin' that will strengthen his financial grasp, so to speak. Latin is one of the dead languages, isn't it?"

"Yes; but----" "Very well, then; it won't be of no

manner of use to Benjamin. He's going to be a farmer, ye see, not an undertaker "

It is a blessed secret, that of living by the day. Anyone can carry his burden, however heavy, till nightfall. Anyone can do his work, however hard, for one day. Anyone can live sweetly, patiently, lovingly, and purely till the sun goes down. And this is all that life ever really means to us-just one little day.

"I suppose," remarked a man at a refreshment buffet, "that one of those

If every person who complains of his lack of money were asked why he is poor, how interesting the replies would be. Below are eighteen of the more frequent causes of poverty:-Same people are poor because their ideas and desires are larger than their burses. Many linger for ever in poverty be-

dreadful plight.

cause they are naturally lazy, and act under the belief that the world owes them a living. They do not keep an account of their expenditures. They reverse the maxim, "Duty before pleasure. They have too many and too expensive amusements.

They do not think it worth while to watch the pennies. They allow friends to impose upop

their good nature and generosity. They do not do to-day what they can possibly put off until to-morrow.

They try to do what others expect of them, not what they can afford.

They would rather incur debt than do work which they consider beneath them. They never seem to think that a

mortgage on their home can ever turn them out of doors.

They risk all their eggs in one basket when they are not in a position to watch or control it.

They think it will be time enough to begin to save for a rainy day when the rainy day comes. The head of the house may be a good man, but he has not learned to do business in a business-like way. The only thing the daughters can

lo is to develop a liking for smart clothes and expensive jewellery. They do not realise that one expensive habit may introduce them to a

whole family of extravagant habits. They do not know that giving a full power of attorney to an agent or lawyer puts their property quite at his mercy.

On a five-hundred-pound income. they try to compete in appearance with a one-thousand-pound-a-year neighbor.

### A PRODIGAL SON WHO NEVER CAME HOME.

In a town in Vermont a significant ombstone has been erected. It is over the body of a man who was discovered one night robbing a safe in the store of a merchant in the neighboring city. He was startled by the entrance of the owner, and grappled with him. In the struggle that ensued he succeeded in drawing a pistol, out his assailant was a bigger, strong-

er man than he, and prevented him from firing it. In trying to wrench himself from the grasp of the merchant, the burglar accidentally discharged the weapon when it was turned against himself, and he fell back dead. The authorities discovered that he was a member of a wealthy and highly-respectable family in a distant They refused to disclose the state. name or residence of the family, and he was buried in the town cemetery. Some person whose identity is also kept secret has had the monument placed over his grave. It bears the inscription "Unknown," with the date of his death. Evidently his family desired him to remain unknown, so that the circumstances of his death might

uot disgrace them. Endeavor to be always patient

perience does not warn her of the use essness of fighting what is sure to be losing game for her. When he does not answer her letters necessary. she does not give up without writing again and again, and every unanswered letter brings a fresh stab to her love. She makes such pitiful excuses for his neglect; he may be ill or busy. or perhaps she has offended him in some way. And all the time it is But move with them. Salts. Caster Oil, and harsh simply that he has grown indifferent. He will not stay, nothing can keep him, and if he makes a pretence of loving you, that is worst of all. Sure

ly you would not hold him when you know he is longing to be free? Let him go; it will hurt you desperately for a while, but it is better to send him away than to have him run away. Half the time he is not the right man for you. Fate has something far better in store for you, and some day you will realise the fact. There are many splendid men in the

world, but there are also men who are not worth one hour's heartache. If you are unfortunate enough to come in contact with one of the latter type, do not judge all other men by him.

A MYSTERY OF THE GREAT EASTERN.

### The Secret Revealed.

While the Great Eastern steamsh p was building, a pay-clerk, sent by one of the contractors with £1200 in wages for the men, disappeared. Neither he nor the money could be traced, though the police searched far and near. It was not unnaturally assumed that he had belted with the £1299. His wife and family were left unprovided for, with the stigma of his supposed crime upon them. Thirty years after her launch the

Great Eastern went into the "cemetery" at Birkenhead to be broken up the ship-breakers discovered between her inner and outer casings of steel the skeleton of a man. Papers which had fallen from his clothes enabled

his identity to be traced. It was the skeleton of the pay-clerk, who, thirty years before, had disappeared. There was no money; that was never recovered.

The supposition is that the poor fellow on going to the ship was pounced apon by workmen, who knew that he had the money with him; that they stunned him, and having a small place in the side of the vessel to complete. crammed his body in and built him up in it. No reward would have induced a sailor to sail in that vessel had he known of the terrible secret sealed up in her walls.

"Henry is not at all well this morning," announced a fond mother. "He is still in hed." "Don't fidget so much," the head of

the house replied. "You may be sure it's nothing particular."

The motion was carried. - " Coarier."

### DO NOT BE BEHIND THE TIMES.

But move with them. Sails, Caster On, and manage purgratives are cut of cate, and have been the cause of an any a case of constipation. Chamberlain's "Dets are the medicine that you want to take. "Any cure constipation, indigestion, billousness, and cure them permanently. Remember the name -Chamberlain's Tablets, and be sure you get them, "In them in arthur," inst as cond." For sale by for there is nothing "just as good." For sale by J. R. Wotherspoon & Co., Meschants, Beaufort.

Despite the assurances of the railway staff at Burrumbeet when ques- ed at him. The real "wowsers," contioned by Mr Allen, stationmaster at tinued Mr Woodfull, were the gambler Ballarat West, that there had been no and the man who supported gambling cause for alarm over the temporary the drunkard, and the man who supstoppage of the Adelaide express at posted drink ; and those who had vestthat station on Friday, 22nd inst., there ed interests in evil and malicious purappears to be more than an element of poses. There were in Melbourne gangs truth in the version narrated to a of crime-breeders, blood relations of "Courier" representative by a gentleman who arrived at Ballarat on board pires seeking the blood of maidenhood

and youthhood, persons who stopped at **'I RECOMMEND IT FOR NERVOUS** the express. This passenger stated nothing to gain evil. As far as he that as the train approached the could make out, "wowser" meant Burrumbeet station the signals indicated "line clear," but a second or two "joy-killer." He was a happy man himself, and he had a great deal to ater, the prompt application of the brakes, with the jolting inseparable make him joyful. If there was any

ferocious joy in lust, in gambling, in from such, before the train was brought to a stand, naturally induced others drinking, in the harsh cry of the book. maker, in the soul blackened with evil. ascertaining the cause of the unusual then he was a "joy-killer;" but if there was joy in saving child life, and in breaking the chains of sin, then he was not. the greater part of the goods train

into Australia for the betterment of the people, but rather because there were some folk who saw a gold mine

since to some back when it was "esol and collected." Did that not savor almost of an insult to the community?

The railway line to Cressy is com-

system, because it relieves and cures.

(Signed) HERBERT PERRY.

poor blood in women. For many of the ailments from which women suffer it is unequalled, especially those caused overwork, worry, or functional impair-ment. This letter from Mr. Herbert Perry, who is known all over Victoria as a dog-fancier, and breeder of the very best kinds, is right to the point, for all W. S. SMITH weak or sick men to read, and written from his business address, 14/1/'10. Mr. Perry speaks highly of this standard

ronage.
