WHAT DOES SPENDING COST?

How much does it cost you to spend £100 ? The answer is £100 down, and at least £4 per annum for the rest of your life. Yet what man would knowingly spend \$100 that put him under obligation to pay 24 per year for life. None, perhaps, but many do it unconsciously when they spend money that might otherwise have earned interest at 4 per cent. in-

Every pound you spend has attached to it an invisible string of pennies which you spend with it. Keep your money in a Savings Account and earn, not spend,

Guaranteed First Grade Why Pay Double The Price

The Paint manufactured by Newton's is guaranteed, if properly applied over a fairly good-condition of surface, to cover as well, work as easily, and het as long as other mixed point used under the same conditions. It is also guaranteed not to the crack or peel. Should Newton's Paint not conform to the above standard, the ve of same will be releaded in fall. Why on earth should you pay up to 20 - per gar for Pamt? Souther's all you first grade paint at practicely what it would not make it. Our profits are so small that the very life of our bashess a passive is weekly output of persons. The paint is mixed with gradian linglish what Lord, a Oxide and Pure Line and Oil. Ask any painter is it possible to procure better in the content of the persons of the paint is personal. The mixing and pounding are carried out by modern mechanity that policy and to the finest possible under any conditions. Newton's Paints can be bought locally at

Government Investigates First Grade Paint.

A commission to define the best standard composition for paint to be used on all buildings was appointed by the Dutch Government. Research was extended over a of seven years. White lead as a pigment was found to chalk after about the year. The results of Zinc Oxide were cracks during the third year. The combination of White Lead and Zinc Oxide proved decidedly better, and would last about five years. Further tests, however, proved that the addition of 10 per cent. inert pigment gave greater powers of durability, and the following standard was accepted for all paints to be purchased by the Government;

Lead Carbonate	. 45 per cent.
Total Pigments	100 per cent.
Linsced O.I	5 par cent.
Vahialaa	100 per cent

The addition of barium was found to extend the life of paint from five to seven years. No expense was spared to obtain this record of results, and every person who buys Newton's Guaranteed First-Grade Pure White Paint is securing the approximate standard recommended by a Government Commission.

The above information gives you the facts. There is nothing to hide. This is why the name "NEWION'S" appears on every can—that is why we give the guarantee to appears on every can-that is why we give the guarantee to refund money if dissatisfied Remember this fact. Even White Lead, Zinc, and Oil are easily adulterated. Why bother to make a test? Newton's will forward instructions to any person interested in testing Paint for Purity. We know the Price means nothing if the Paint is cheap in pigments. We know that Newton's Paint will stand any analytical test to prove
