to help YOUR DISTRICT to fill its LOAN QUOTA

During the war years a great deal of the success of Loan-raising campaigns was due to the vigorous efforts of the members of honorary War Loan Committees which sprang into existence throughout Australia. Today, many who served on these Committees, and others who have stepped forward since, are still setting an example by their efforts as members of Commonwealth Loan Committees. There are Loan Committees operating in almost every city, town and suburb in Australia which have accepted the task of seeing that the quotas of Loan money allotted to their districts are raised.

There is a Commonwealth Loan Committee in your district, composed of citizens who realise that only by investment of public money in the vast enterprise of Australia's development will the rewards of tomorrow be attained.

You can encourage and support your district Loan Committee by lodging an application for subscription to the Commonwealth Security Loan now open, and by inserting the name of your district in the space provided on your application form.

Buchanan — It was a bigger job than anticipated. In answer to Cr. Riddoch, the engineer said it was all tied up in drainage. The Council and Housing Commission had agreed to pay one-third of the cost of the service road. They could grade the footpath up and put gravel on it. It would be of a temporary nature Cr. Riddoch - That was what he was in favour of. He did not want any big expense. Cr. Buchanan — Ten years ago the C.R.B, constructed 8 ft. extra on the highway to divert steel wheeled traffic off the highway, and he thought there was room for the children to walk in safety. Seeing they were up for a service road for the new Hospital (which was on the tapis), he did not want to waste money. Cr. Riddoch's motion that a temporary footpath be made was seconded (Continued on Page 3).

Cr. Russell — They had a meeting in Snake Valley in reference to water and electricity supplies. A lot of people there were disappointed with the water supply scheme. All Mr Linsten guaranteed was to put in larger pipes and increase the pressure, but they would have to pump it in the summer into pressure tanks. It would cest £900 a year or £10 a year for each house. He majority would thought the pay that to get a domestic and garden supply. 'They should also apply to the Forests Department for control of Dawson's dam. The majority of people voted in favourr of the scheme but they did not all vote. He moved that they go on with the scheme and call another meeting, and that steps be taken by the shire to ask for a grant for this work; also that the Council apply for control of Dawson's dam. Seconded by Cr.

Cr. Russell said that some people said it was a waste of money to spend all that on a poor supply, but the position was desperate; the pipes being rusted through.

The President was granted leave of absence from next meeting.
