A Guide to Melbourne's Trams

By Arthur Winzenried

One of a series of Research Reports prepared for APW Productions by Dr Arthur Winzenried with assistance from Stephen Martin and the APW Productions archives.

APW Productions present this material as a report on the subject, more as a service to the interested student of transport history, than as any sort of definitive statement. No claims are made as to its completeness. The intention rather, is to present material as correct and as complete as possible, so that readers may study and, it is hoped, add to, what is presented. Please address any comments or corrections directly to the publishers at the address below.

.....
