K. S. Kings, Esq.,
135 Through Road,
BURWOOD, Vic. 3125

Dear Keith,

Enclosed is a list of the names contained on the electronic destination screens with which the M.A.N. "R" class buses Nos. 260-359 were originally provided. This was obtained from the former Northcote Workshops.

*Thanked,
21/7/99.*

I will write to you about matters of detail relating to the development of the tramway system as soon as an opportunity permits. On looking through the items released by the M.M.T.B. in connection with the cable conversion scheme and published in the "Argus", it seems likely that the section of line along the Esplanade, from Carlisle Street to Beaconsfield Parade was converted in time for the opening of the South Melbourne and St. Kilda Beach (Albert Park) line on 31st October, 1925. This was some time ahead of the electrification of the line from Windsor to St. Kilda Beach (Barkly Street) on 28th December, 1925. The object of giving this section priority would have been to enable trams needed for the new line to reach Hanna Street Depot.

*Letter,
21/7/99.*

An item in the Australian Tramway Employees' Association's journal indicates that the men needed for the new service were attached to Glenhuntly Depot.

The connection at Beaconsfield Parade (if it actually existed) may have been a temporary arrangement. Records compiled by someone in the M.M.T.B. indicate that the lines between Beaconsfield Parade and the Esplanade were connected on 24th March, 1928.

Any views which you may have about this intriguing matter would be appreciated.

Another matter which emerged was that the Board operated buses from the City to St. Kilda Beach (Barkly Street) from 19th July, 1925 in conjunction with the cable trams thither and to Brighton Road.

Yours sincerely,

Ross Wilson
