Mr Len Millar
The Tramway Museum Society of Victoria Ltd.
Box 4916 Mail Exchange
MELBOURNE VIC. 3001

Dear Sir,

re: ENVELON

Please pardon the long delay in response to your letter of May 7th 1984. It is indeed of pertinent interest to us and it is our intention to submit the following for your consideration.

As you mentioned, ENVELON is not "cheap." When considering the virtues and life of the coating however, it is very economical. It is not our normal practise to discount or give away our material. On some large government contracts we do offer a reduced price for quantities of over 10,000 litres with a 14 day payment settlement.

It is our proposal to offer to you ENVELON 442 and ENVELON Thinners at a vastly reduced note, as we consider "the Tramways" one of the customers we would like to continue to service, as we have for the past 30 years or more. Our prices F.I.S. Bylands would be as follows:-

ENVELON 442	\$5.00 / Litre
ENVELON Thinners	\$2.50 / Litre

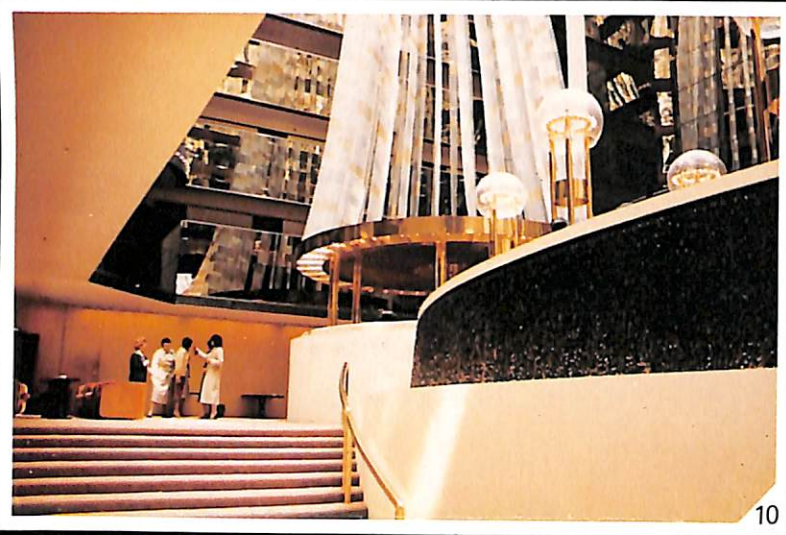

Please regard these prices in the strictest of confidence as we would not like any of our clients to hear of such allowances, but is our contribution to your cause.

We do trust that you regard our offer as favourably as we have regarded your request, and we look forward to your further instruction.

Yours faithfully
DOMINION PLASTIC INDUSTRIES

ENVELON 220

is a water white protective coating for metal surfaces for protection against tarnishing, oxidation and surface abrasion.

10. ENVELON was selected and used on ornamental brass in the sumptuous hotel complex in the Collins Street Tower of Melbourne, to protect from environmental tarnishing and oxidation.

TYPICAL APPLICATIONS:

- Aluminium, brass and copper feature WALLS and CEILINGS.
- WALL sculptures etc. etc.
- ORNAMENTAL metal work on ALUMINIUM, BRASS, COPPER and CHROME.
- LIGHT FITTINGS. ● BED HEADS.

The following are some of our satisfied customers:

- | | |
|---|-------------------------------|
| ● ESSO EXPLORATION | ● PETERSVILLE |
| ● GRAIN ELEVATORS BOARD | ● NISSAN MOTOR COMPANY |
| ● CO-OP. BULK HANDLING LTD., W.A. | ● MELBOURNE TRANSIT AUTHORITY |
| ● CSIRO | — TRAM DIVISION |
| ● R.A.A.F. | — TRAIN DIVISION |
| ● TUBEMAKERS | ● NORTHERN PEAR GROWERS |
| ● AUSTRALIAN WIRE INDUSTRIES | ● VARAPODIO |
| ● S.P.C. LIMITED | ● BHP AUSTRALIA |
| ● M.M.B.W. | ● W. F. MONTAGUE PTY. LTD. |
| ● MANY PROMINENT FRUIT GROWERS AND PACKING SHEDS. | ● SIMSON DUNDAS |

Associated Products . . .

ENVELON SOUND DEADENING COMPOUND is a sprayable rapid-drying flame-resistant compound (asbestos and bitumen free) providing a resilient, tough, thick and odourless coating of high efficiency and excellent adhesion.

SEAL'N'PEEL is a temporary protective coating for delicate surfaces. Simply spray SEAL'N'PEEL on and once your protective needs are complete, peel SEAL'N'PEEL away to leave a clean un-abused surface.

ENVELON

FOR TOTAL PERMANENT PROTECTION

BASED ON OUR ORIGINAL PRODUCT
"LIQUID ENVELOPE"™

ENVELON has been used successfully throughout Australia since World War II to effectively stop ...

- WATER ● DUST ● CORROSION ● ACID ATTACK ● GASES
- SCRATCHING etc. etc.

A complete spray applied enveloping system.

ENVELON 442

is a heavy-bodied self-supporting, permanently flexible impervious membrane for both interior and external industrial uses.

1. Kwinana W.A. Wheat Terminal. Australia's largest wheat storage facility utilises the permanent flexibility and the gas impermeability of ENVELON while making this storage weatherproof.

2. Wheat storage of all sizes including these "on farm" silos are gas-proofed by using ENVELON to seal all gaps and joints making the storage gas tight.

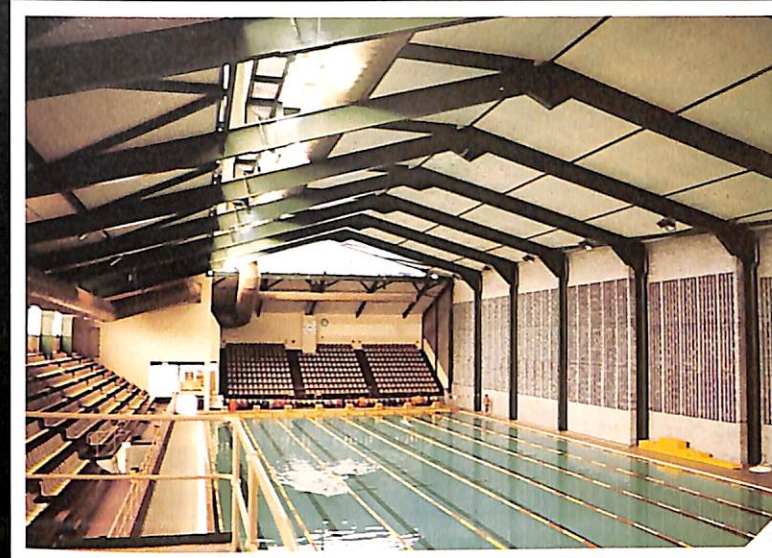

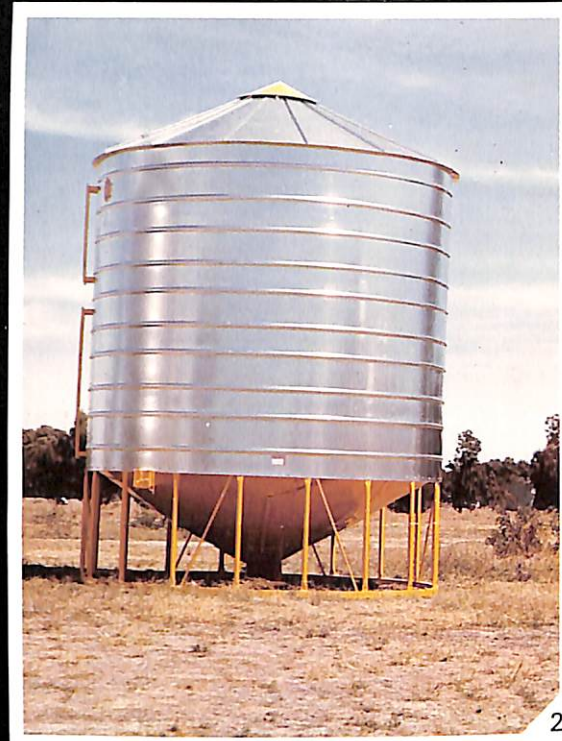

3. Sealing the hazardous dust of asbestos in the engine room of this tug on one of our harbours was made easy with ENVELON, while retaining the necessary acoustic values.

4. Along with hundreds of rail carriage roofs for transit authorities, "Puffing Billy" railway in the Dandenong Ranges, just out of Melbourne, have had the carriage roofs waterproofed by ENVELON. This provides a weatherproof roof, all year round, with the excessive stresses involved in carriage movement.

5. The famous Melbourne trams have had a roof treatment of ENVELON over tongue-and-groove roof lining boards to provide a low-maintenance weatherproof barrier.

TYPICAL APPLICATIONS

- WEATHERPROOFING of quarters on rigs, mining operations, etc.
- WATERPROOFING roofs, walls, parapets, etc.
- DUSTPROOFING at mines for living quarters, equipment, etc.
- SEALING of switch gear, circuits, etc.
- GASPROOFING of silos, fruit storage, sterile areas, laboratories, etc.

ENVELON 550

is an architectural, permanently flexible impervious membrane for interior and exterior application.

6. A group of leading architects selected ENVELON to be applied over the entire ceiling and wall area to protect the steel frame from chlorinated vapour attack of the heated Beaufort Pool in East Melbourne.

TYPICAL APPLICATIONS

- WASHABLE SEAM-FREE surfaces in food processing areas, etc.
- Protection in CHEMICAL attack environments.
- SEAM-FREE surfaces in hospitals, laboratories, corridors, etc.
- LINING of watertanks, channels, etc.

ENVELON 551/100 CF

is a low temperature flexible surface membrane to withstand below-freezing conditions.

7. After extensive testing by a government department, ENVELON was selected for use in the reconstruction program at an Antarctic base, to withstand extreme cold and weather conditions including the grit blast of blizzards while maintaining an impenetrable barrier.

8. ENVELON has been used over many years for fruit storage where a controlled atmosphere is maintained at low temperatures requiring the sealing properties of ENVELON to remain flexible to accommodate substrate movement.

TYPICAL APPLICATION

- C.A. FRUIT STORAGE.
- MEAT FREEZER rooms.
- FOOD PROCESSING areas requiring a seam free surface.

ENVELON 561

is a sprayable permanently plasticised coating specifically formulated for aggressive environments, both chemical and atmospheric.

9. ENVELON was selected for use on this old cooling condenser in a modernisation programme of one of the prominent frozen food purveyors in Victoria.

TYPICAL APPLICATIONS

- CHEMICAL ATTACK — industrial, marine and rural for steel and masonry surfaces.
- AVIATION STRUCTURES.
- SALT WATER protection.
- FOOD PROCESSING areas.
- BRIDGES and loading docks.
