

CURVE AT JUNCTION OFQUEENSBERRY AND ERROLL STREETS.LINE 5.DESCRIPTION A.5.CURVE . . . . . AT JUNCTION OF QUEENSBERRY ST. WITH ERROLL STREET.

1. The Checks of Special check-rails of Nos. 2 Up and 4 Down Rails are badly worn in places. Tread of each of these rails beaded over in places.
2. The sides of heads of opposite rails - Nos. 1 Up and 3 Down - are badly grooved in places, as a result of the above check-wear.
3. No. 1 Rail - Up Track. A short length of Straight-rail, where Curve adjoins same, on North side, is pumping, and fishplates are presumably loose. Paving on each side of pumping rail is loose, and tarred surface here, and at several other places on Curve, is shattered.
4. No. 3 Rail - Down Track. A short length of straight rail, adjacent to Curved rail, on S. side, is pumping, and fishplates are presumably loose.

CLEARANCES, between flange and bottom of groove, also SUPER-ELEVATIONS, taken in Centre of Curve, - April 13th. 1916.

B Head Points, Tongue Wear.

CURVES and JUNCTION - at JUNCTION of ELIZABETH and VICTORIA STREETS.

1. The heads of special Check-Rails of Nos. 2 and 4 rails, are worn to varying amounts, and badly so in places. The sides of rails (Nos. 1 and 3) are grooved to varying degrees, and badly so in places, as a result of the above Check-wear.
  2. In three places, lengths of trans-rails are pumping, resulting in loosening of adjacent paving. Fishplates are presumably loose.
  3. 16 of the joints of rails, adjacent to Crossing-intersections, and Points, are wide (varying from  $1/8"$  to  $11/16"$ ) and in several cases are hammered.
  4. The heels of 3 of the four Points of Curve are of loose fit, and rocking. Tongues of all points are worn to varying degrees.
  5. Hammering and wear is taking place, to varying degrees, at the Crossing-intersections, also at intersections of Slot-rails with tram-rails.
- CLEARANCES, between flange and bottom of groove, also SUPER-ELEVATIONS, taken April 12th. 1916.

DESCRIPTION B 1.

SINGLE SRUNT at TERMINUS - AIRPORT RD STREET (opposite

POST OFFICE and ENGINE HOUSE)

1. The Checks, of the two Inner-Curve rails, are slightly worn.
2. The side of heel of the Outer Curve, between Nos. 3 and 4 Nails, is badly grooved. Curved Nails (between Nos. 2 and 4 Nails) are bottoming in places.
3. Three of the 4 heels of Points are rocking, and 2 of these are below level of rails, resulting in excessive hammering. Tongues are worn to varying degrees.
4. At the Crossing-Intersections, also at intersections of Slot-rails with Trans-rails, hammering, to varying degree, is taking place.
5. 11 of the Joints of Trans-rail, adjacent to Crossing-intersections and Points, are wide, (varying from  $1/6"$  to  $3/8"$ ) and in several cases (at the crossing intersections) the rail ends are SE) hammered.
