The Changing Nature of Tarralla Creek - Frog Walk

Join us on a frog walk of Tarralla Creek, listen for, record and learn more about the importance of frogs for urban biodiversity

Frogs play an important role in waterway ecosystems and are easily affected by changes to their environment. Through the Reimagining Tarralla Creek project, biodiversity at Tarralla Creek is likely to change. Join us, with frog specialist, Christina Renowden to learn about, listen and record frogs along Tarralla Creek to help establish baseline data of species on site.

Date: 10 December 2019

Time: 7:00pm - 8:30pm

Where: Spotted Marsh Frog Sculpture - Croydon Town Park, Civic Square, Croydon (between Council offices & Fred Geale Oval)

RSVP: Tess.Hayes@Maroondah.vic.gov.au

If you have a smartphone, please download the FrogID App before the event - and join the group "*The changing nature of Tarralla Creek*". Please bring a flashlight, wear shoes appropriate for walking and dress for the prevailing weather.
